## THE NEW BMW 4 SERIES - GREATER PRESENCE AND EXCLUSIVITY.

New exterior colour shades Sunset Orange and Snapper Rocks Blue.

LED rear lights.

New rear apron.

Four new wheel rim variants (Advantage, Sport, Luxury and M Sport).

- The new BMW 4 Series takes to the stage with even greater presence, perceived quality and dynamic flair.
- The introduction of the original BMW 4 Series in 2013 marked the dawn of a new era for the BMW brand. The BMW 4 Series Coupe, BMW 4 Series Convertible and BMW 4 Series Gran Coupe offer even greater sporting ability and exclusivity. This sets them apart clearly from their sister series, the BMW 3 Series. A figure of almost 400,000 cars delivered up to the end of 2016 is evidence of the global success achieved by the BMW 4 Series.
- Progressive appearance: The BMW 4 Series now comes as standard with new bi-LED headlights and LED front foglamps. The optional adaptive full-LED headlights sharpen the character of the new BMW 4 Series with their striking hexagonal graphic. In addition, the likewise newly designed full-LED rear lights lend the BMW 4 Series models a fresh and innovative new look.
- New design: An unbroken central air intake now marks out the front end of the BMW 4 Series. In the Sport Line and Luxury Line variants, an eye-catching bar frames virtually the entire air intake. The all-new and now more tightly contoured rear apron strengthens the already powerful, dynamic design language of the new BMW 4 Series models.

- **Eye for detail:** New electroplated elements, chrome applications and the centre console in high-gloss black accentuate the interior's exclusivity and rich sense of quality. The double stitching on the instrument panel brings another accent to the interior design. Three new upholstery colours and a trio of new interior trim strips further expand the selection of fixtures and fittings for customers.
- **Individual diversity:** The two new and vivid colour shades Snapper Rocks Blue and Sunset Orange join the list of exterior paint finishes. They are available exclusively for the BMW 4 Series models. Also reserved for the BMW 4 Series are four new wheel rim designs, which offer additional scope for individualisation.
- **Raising sporting appeal another notch:** The revised suspension of the BMW 4 Series Coupe and BMW 4 Series Gran Coupe sharpens their dynamic ability while delivering the same excellent ride quality.
- **Power and efficiency:** All of the petrol engines and the four-cylinder diesel units are part of the latest BMW EfficientDynamics engine family and feature BMW TwinPower Turbo technology. They combine unbeatable performance with outstanding efficiency.
- **New directions:** The latest version of the BMW Navigation system Professional is now also fitted in the BMW 4 Series. The use of a clear and customisable, tile-style display for the most important menu items makes the system even more intuitive to use.
- **Changing looks:** The Multifunctional Instrument Display available as an option for the new BMW 4 Series enables different visualisation options for the various driving modes.
- The new BMW 4 Series models will be available from the start of production in March 2017.
