The new MINI Clubman now available in Singapore. Open more doors.

Singapore. MINI Asia and Eurokars Habitat today announced the availability of the new MINI Clubman. With a precisely modified design, an extended selection of innovative equipment features, and the latest technology in the areas of operation and connectivity, the new MINI Clubman hones its profile as a stylish individualist in the premium compact segment.

Combining hallmark MINI driving fun with a high level of suitability for both day-to-day driving and long-distance travel, the variable 5-seater gains additional charisma with fresh accentuations for the

Corporate Communications

exterior and interior. The latest updates in the range of MINI Connected digital services underscore the progressive, lifestyle-oriented character of the new MINI Clubman.

In addition, ride comfort, space and variability define the all-round properties of the new MINI Clubman. With four side doors and five seats including a versatile luggage compartment behind the two split doors at the rear, customers are ensured a high degree of functionality and the kind of creative use of space that is characteristic of MINI. Customers enjoy the power of choice with 3 variants of the new MINI Clubman available – the One, Cooper, and Cooper S variants.

The new MINI Clubman: an overview of the highlights.

- Distinctive front design with newly designed radiator grill.
- LED headlights as standard.
- New LED fog lamps with driving light ring.
- LED rear lights as standard in Union Jack design.
- New body colours including new Piano Black exterior package on the MINI Cooper S Clubman.
- New light alloy wheels ranging from 17-inch to 18-inch sizes.
- New range of leather trims and interior surfaces.
- MINI Connected system as standard.
- Extended range of Original MINI Accessories.

Expressive and powerful: new distinctive design.

The body design of the new MINI Clubman is stylish, individual and exclusive. Signature aspects of its distinctive proportions include a powerfully domed bonnet and circular headlamps with chrome surrounds (Piano Black for Cooper S) at the front of the car, as well as a dynamically elongated roof line

and a steep rear. The split doors consisting of two laterally opening wings make the new MINI Clubman the only model in the compact segment to offer six doors, along with outstanding versatility – the car's luggage compartment can be extended from 360 litres to a maximum of 1,250 litres.

Corporate Communications

The most striking design feature of the new MINI Clubman is the newly designed radiator grille which now extends across the entire bumper. With powerfully modelled contours and a new structure for the air inlet, it gives the front view a particularly distinctive appearance. The radiator grille is bordered by a slim frame produced from a single piece. The air inlet is separated into six horizontal struts in black, which can be optionally upgraded to a chrome version. On the MINI Cooper S Clubman, specific features in the front section are the hexagonal grid pattern, the individual chrome strut in the air inlet, as well as a red “S” emblem.

Fresh look with LED technology, new body finishes, and light alloy wheels.

The characteristic front look of the new MINI Clubman is also a result of the modified design of the circular headlamps. The standard LED headlamps feature a new design with LED modules for low and high beam and a shield in black finish. A white ring of light surrounding the headlamps serves both as daytime driving light and turn indicator. LED fog lights are also available as standard – these take the place of the standard parking lights.

The new MINI Clubman is also fitted with LED rear lights as standard. The light units with chrome surround are especially integrated in the wings of the split door. The rear lights feature a horizontally oriented design that underscores the brand’s British origins: the graphic structure of their light sources traces the abstracted pattern of the Union Jack. With its striking lines, the flag motif provides a distinctive

form of identification – both during the day and in terms of night design. The brake light is now also generated from this newly designed light unit.

Corporate Communications

In terms of body finishes, three new colour choices are available – the new MINI Clubman is now available in Indian Summer Red metallic, British Racing Green metallic, or MINI Yours Enigmatic Black metallic. As an alternative to the body colour, customers may choose to have the roof and exterior mirror caps of their new MINI Clubman to be finished in black, white or silver. The Cooper S variant additionally features the Piano Black Exterior package where the surrounds of the headlights, rear lights and radiator grille are finished in high-gloss black.

Depending on the model variant, the new MINI Clubman is fitted as standard with light alloy wheels ranging between either 17-inch or 18-inch in size with runflat tyres. A summary of the standard fit wheels are as follows:

- MINI One Clubman – 17” Net Spoke black
- MINI Cooper Clubman – 17” Vent Spoke
- MINI Cooper S Clubman – 18” MINI Yours British Spoke 2-tone

Latest generation of MINI TwinPower Turbo Engines with Dual Clutch Transmission.

The engine portfolio for the new MINI Clubman includes two 3-cylinder and two 4-cylinder petrol engines, each featuring the latest generation of MINI TwinPower Turbo Technology. A 7-speed Steptronic transmission with double clutch is fitted as standard

on the MINI One Clubman and the MINI Cooper Clubman, while the MINI Cooper S Clubman is fitted with the 7-speed Steptronic sports transmission.

Corporate Communications

A stylish and modern interior.

Five full-sized seats and convenient access translates to plenty of space for all occupants in the new MINI Clubman. The One and Cooper variants sport a Leatherette in Carbon Black upholstery, as well as the MINI Yours Interior Style package in Piano Black illuminated – features include illuminated door bezels

along with the all-round cockpit bezel, the cockpit trim and the centre console trim elements, designed to harmonise in matching colours. The new MINI Cooper S Clubman sports a MINI Yours Walknappa Leather Sports Steering Wheel and the seat upholstery variant MINI Yours Walknappa Leather Lounge in Carbon Black. The seats acquire an extravagant touch by means of a Union Jack motif on the headrests which is applied with precisely positioned perforations. Particularly exclusive accentuations are also provided by the MINI Yours Interior Styles in Frozen Blue illuminated.

The standard range of equipment of the new MINI Clubman includes an audio system with six speakers and a USB socket, enabling audio streaming via a Bluetooth connection. There is also a hands-free telephone facility with USB interface, as well as the Radio MINI Visual Boost including a high-resolution 6.5-inch central display. Parking is aided by a Rear-View camera and the rear Park Distance Control system fitted as standard on all variants of the new MINI Clubman. The new MINI Cooper S Clubman also includes Navigation with voice-guided directions.

The new MINI Clubman is equipped with a 4G SIM card – this is used for the Intelligent Emergency Call with automatic detection of vehicle location and accident severity function, as well as MINI Teleservices. In conjunction with the Connected Navigation on the MINI Cooper S Clubman, it is possible to use the Real Time Traffic Information service, MINI Online, and Apple CarPlay.

Corporate Communications

In addition, the standard-fitted MINI Connected application offers an exceptionally wide range of digital services that allow seamless integration of the car into the driver's day-to-day digital routine. This includes the possibility of sending navigation destinations from smartphone to vehicle and receiving information regarding the ideal departure time, as well as Remote Services. The latter function

allows the driver not just to display vehicle location, fuel level and other vehicle status details on their smartphone, but also activate the headlight flasher, horn, ventilation and door lock/unlock function.

Individual style for retrofitting: MINI Original Accessories.

Attractive new features are also available as part of the extensive range of MINI Original Accessories. These high-quality retrofit options enable functionality, convenience, riding fun and individual style to be adapted even more precisely to personal preferences in the new MINI Clubman. The latest additions to the programme include side scuttles, exterior mirror caps and the Night Jack roof design, which features the graphic of the British flag in a striking black and grey finish. Furthermore, selected design features in brilliant Piano Black give the new MINI Clubman a discreet, sporty look. This jet black finish is offered for the "Clubman" and "Cooper S" inscriptions as well as for the MINI logo on the bonnet and at the rear.

The new MINI Clubman is now available for viewing at the Eurokars Habitat showroom.
