The new BMW 6 Series Gran Turismo now available in Singapore.

The stylish individualist with a powerful sporting character.

Singapore. BMW Asia and Performance Motors Limited today announced the availability of the new BMW 6 Series Gran Turismo, a car that is something of an individualist within the premium executive segment and meets the richly varied requirements of modern and extremely discerning customers. Its combination of long-distance comfort and sporting ability, luxurious interior ambience and intelligent functionality is unparalleled in its class. A precisely modified body design and refinements to various interior design details further sharpen the profile of this vehicle concept.

The new BMW 6 Series Gran Turismo captures the imagination more than ever with its striking sense of outward sportiness and presence, and the layered premium ambience of its interior. Driving pleasure and efficiency are enhanced by a further developed spread of engines and the introduction of 48V mild hybrid technology. The progressive character of the new BMW 6 Series Gran Turismo is also highlighted by innovations in the areas of driver assistance systems, control/operation and connectivity. For example, a fully digital instrument cluster and Control Display – each with a screen diagonal of 12.3 inches – are fitted as standard.

The unmistakable character of the new BMW 6 Series Gran Turismo and its cutting-edge innovations pave the way for the next chapter in its success story. More than 50,000 examples of the BMW 6 Series Gran Turismo have been sold worldwide to date. It is built at BMW Plant Dingolfing, alongside models including the BMW 7 Series luxury sedan and BMW 8 Series luxury sports car.

Exterior design: sharper presence, eye-catching sportiness.

Dynamically stretched proportions mark out the exterior design of the new BMW 6 Series Gran Turismo, which focuses primarily on sporting elegance and functional versatility. Distinctive features include a slim side window graphic, the frameless windows of the four doors, a roofline

flowing well into the rear end, the large tailgate and the active rear spoiler, which extends when the car reaches 120 km/h. The new design of the front and rear sections strengthens the imposing appearance of the new BMW 6 Series Gran Turismo and deepens its eye-catching sporting allure.

New contours for the BMW kidney grille and the headlights immediately bordering it on either side help the front end to make a striking impression. The kidney grille now spreads out further to the sides and reaches further down into the front apron. The slimmer contours of the headlights accentuate the wide front end of the new BMW 6 Series Gran Turismo. The air intake below the front bumper is now split into three segments.

New full-LED headlights including adaptive cornering function and the BMW Selective Beam non-dazzling High-beam Assistant with matrix technology are part of standard equipment. The clear

design of the light graphic is accentuated by two L-shaped daytime driving light sources arranged next to one another. The outer daytime driving lights now also perform the role of turn indicators. The dynamic light distribution function enables the illumination of the road ahead to be adjusted to the driving situation at hand.

The latest version of the Adaptive LED Headlights with matrix function and BMW Laserlight can be specified as an option. Comfort and range are significantly improved on country roads and motorways thanks to BMW Selective Beam incorporating the new Laserlight sources, which are unique in the new BMW 6 Series Gran Turismo's class. At higher speeds, BMW Laserlight increases high-beam range to a maximum 650 metres and follows the course of the road dynamically.

A new surface split also gives the rear apron a particularly wide and eye-catching appearance. The exhaust tailpipe finishers on all model variants are now trapezoidal in shape. Among the likewise newly designed body features of the M Sport package are a front apron with arrow-shaped surfaces pointing towards the road and mesh elements, and a large diffuser element in the rear end.

New exterior paint finishes, M Sport braking system now also with red callipers.

The precisely modified design of the new BMW 6 Series Gran Turismo is complemented by an extensively revised selection of body paint finishes. The Phytonic Blue metallic, Piemont Red metallic and Bernina Grey Amber effect metallic variants have been added to the range of colour shades

available to customers. On cars with the M Sport package, the Portimao Blue metallic finish can be specified, too. The three BMW Individual finishes Dravite Grey metallic, Tanzanite Blue metallic and Alvite Grey metallic are also offered.

Another new addition to the options list are BMW Individual lights Shadowline. Cars with the M Sport package can now be ordered with a BMW Individual High-gloss Shadowline package with extended features. The M Sport braking system now includes the customer's choice of blue- or red-painted callipers.

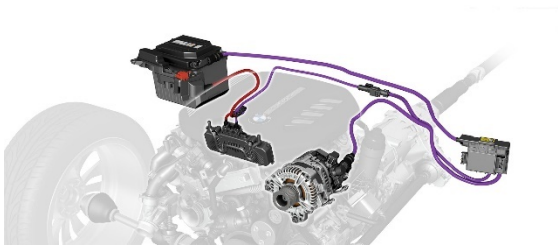

Interior: luxurious ambience with modern functionality.

The distinctive vehicle concept of the new BMW 6 Series Gran Turismo brings generous levels of space and modern functionality to the interior. Its luxurious ambience combines with a driver-focused cockpit, raised seating position and extensive versatility. Load compartment capacity

can be increased from 600 litres to a maximum 1,800 litres, as required.

The new BMW 6 Series Gran Turismo comes as standard with BMW Live Cockpit Professional, which includes the combination of a fully digital instrument cluster and a Control Display, each of which have a screen diagonal of 12.3 inches. The newly designed controls on the centre console – whose surfaces are now in High-gloss Black – and a sports leather steering wheel with newly arranged multifunction buttons are two of the features that provide an even more refined premium feel inside the new BMW 6 Series Gran Turismo.

Standard specification also includes electrically adjustable seats for the driver and front passenger, Dakota leather upholstery, ambient lighting with new dynamic interior lighting and four-zone automatic climate control. Among the available options are multifunction seats for the driver and front passenger, a rear seat bench with electrically adjustable backrest angle and exclusive Nappa leather trim. Also optional are new interior trim strips, a panoramic glass sunroof, the Bowers & Wilkins Diamond Surround Sound System and the latest version of the Rear-seat entertainment Professional.

48V mild hybrid technology.

The petrol engine available for the new BMW 6 Series Gran Turismo comes with the latest BMW TwinPower Turbo technology, producing an output of 258 hp. Mild hybrid technology ensures instantaneous power delivery and greater

efficiency. Fitting an extremely powerful 48V starter-generator and an additional battery allows an extremely high level of braking energy recuperation and storage. This energy can be used both to

supply the 12V electrical system, ease the combustion engine's workload and give it an extra injection of power.

With its ability to put an additional 8 kW/11 hp on tap instantaneously, the starter-generator provides an electric boost which adds fresh dynamism to both off-the-line getaways and acceleration when already on the move. The powerful starter-generator also increases efficiency by assisting the engine when driving at constant speeds, and improving comfort when the Auto Start Stop and coasting functions are in use. The engines teams up with an eight-speed Steptronic Sport transmission as standard.

Sophisticated chassis technology dials up sports performance or comfort, as desired.

The design and tuning of its sophisticated chassis technology give the new BMW 6 Series Gran Turismo its characteristic balance between sporting flair and comfort over long journeys. The standard rear-axle air suspension takes into account the car's high load-carrying capacity.

Adaptive two-axle air suspension with electronically controlled dampers is available as an option and enables ride height to be adjusted manually.

The latest version of the optional Integral Active Steering can come to the driver's aid when manoeuvring by turning the rear wheels as required even at speeds under 3 km/h. The optional Executive Drive combines the adaptive two-axle air suspension with active roll stabilisation, which enhances both the sports performance of the new BMW 6 Series Gran Turismo and the ride comfort on offer.

Advanced driver assistance systems with new functions.

Additional functions for the state-of-the-art driver assistance systems in the new BMW 6 Series Gran Turismo take it another few steps along the

road to automated driving. These functions enhance driving comfort on long journeys and increase safety in situations where the driver does not have a clear view. The Lane Departure

Warning system included with the standard Driving Assistant now also features lane return by means of steering assistance. The latest version of the likewise optional Driving Assistant Professional comes with the Steering and Lane Control Assistant. The optional Active Cruise Control with Stop&Go function offers drivers of the new BMW 6 Series Gran Turismo an adaptive distance control tool which takes into account the traffic situation and environmental conditions at hand.

The Parking Assistant's range of functions has been extended with the addition of the reversing assistant, which takes control of the steering while backing up for distances of up to 50 metres. The new Drive Recorder (optional and available for purchase on the BMW ConnectedDrive Store) allows up to 40 seconds of video footage from different points around the vehicle to be recorded and stored. And the 3D visualisation of the surrounding area in the instrument cluster provides an enhanced overview of the current traffic situation, the status of the driver assistance systems and the possible courses of action they offer.

New digital services: BMW Intelligent Personal Assistant, smartphone integration, Remote Software Upgrade.

The standard BMW Live Cockpit Professional also heralds the arrival of the new BMW Operating System 7.0 in the new BMW 6 Series Gran Turismo. This not only optimises intuitive operation and customisation of display content, it also allows drivers to use a host of additional digital services. Another standard feature in the new BMW 6 Series Gran Turismo is the BMW Intelligent Personal Assistant with extended functionality.

The standard smartphone integration feature makes both Apple CarPlay and now also Android Auto available inside the new BMW 6 Series Gran Turismo. The likewise new Remote Software Upgrade function allows the driver to import upgraded vehicle functions and additional digital services into the car over the air.

The new BMW 6 Series Gran Turismo is now available for viewing at the Performance Motors Limited showroom.

About Performance Motors Limited (PML)

Performance Motors Limited (PML) is a unit under Sime Darby Motors, a division of Sime Darby Berhad, and has been the dealer of BMW cars and BMW motorcycles in Singapore since 1979.

The PML showroom is located at 303 Alexandra Road, Singapore 159941.

Showroom opening hours are Monday to Saturday, 8am – 7pm; Sunday and Public Holiday, 10am – 6pm. For more enquiries, please call 1 800 2255 269.

PML has achieved various accolades in the areas of sales achievement and service excellence in its 40-year history in the luxury segment.

2016 - PML recorded an all-time high for new car registrations and was named the 'Best Dealer in Sales – Importer Region B4' at BMW Group's Excellence in Sales Awards 2016. The company also won the 'Best Lifestyle Dealership' from BMW Group Asia. PML launched the Future Retail concept at the newly renovated BMW showroom at Sime Darby Performance Centre, creating an engaging retail environment with the use of innovative digital tools. As a leading luxury car brand in Singapore, BMW remained the preferred limousine brand for events such as the Singapore Airshow 2016, SMBC Singapore Open 2016, and Louis Vuitton High Jewellery Event 2016, just to name a few.

2017 - PML was recognised at BMW Group's Excellence in Sales Awards 2017 as 'Best Retailer in Sales in the Importer Region Asia Pacific', and was accorded the 'Point Of Sales Award for Aftersales Marketing Excellence - Second Place' as well as the 'Best Accessories Performance' awards by BMW Group Asia. The introduction of five new plug-in hybrid electric vehicles (PHEVs) and an updated electric vehicle (EV) under the BMW i brand saw PML cementing its position as the industry leader for electromobility in Singapore. BMW was appointed the official car brand for numerous high-profile events including the ASEAN Tourism Forum 2017, SMBC Singapore Open 2017, Singapore Yacht Show 2017, IMDEX Asia 2017, Miss Universe Singapore 2017, and Singapore International Energy Week 2017.

2018 – In another record-breaking year of new car registrations, PML had for the first time surpassed the 5,000-unit mark. BMW cars also continued to be the favoured limousines for various prestigious events throughout the year, namely the SMBC Singapore Open 2018, Singapore Airshow 2018, 32nd ASEAN Summit, and Singapore International Film Festival 2018.

2019 – Celebrating its 40th year of distributing BMW Cars and Motorcycles in Singapore, PML took to the heart of Orchard Road for BMWFestSG with a myriad of activities to engage the masses and deliver sheer driving pleasure. BMW once again had the honour of being appointed as the preferred limousine provider for events such as the International Maritime Conference & Exhibition for Defence (IMDEX Asia) 2019, Singapore Convention Week 2019, and Singapore International Energy Week (SIEW) 2019.

2020 – BMW was the second best-selling car brand and leading premium automotive brand in Singapore, capturing 9.8% of the market share. November and December marked record-breaking months for car sales in PML's entire 41 year history. 2020 also saw the launch of 13 models including the first-ever BMW 2 Series Gran Coupe, new BMW X3 xDrive30e, and first-ever BMW M8 Competition, alongside eight virtual launches and events such as the eJoyFest and BMWFestSG. PML also launched the BMW Digital Showroom, BMW Convenience 360, and the BMW Performance Motors SG Mobile App to create a seamless customer journey between the virtual and physical landscapes.
