The all-new BMW X2 now available in Singapore. **The individualist in the premium compact segment – sportier than ever.**

Singapore. BMW Asia announced the availability of the all-new BMW X2, the car that first introduced the vehicle concept of a Sports Activity Coupé (SAC) for the premium compact segment. Now, the even more distinctive, sportier and forward-looking second generation is taking to the stage. Significantly larger dimensions and a pronounced coupé silhouette clearly showcase in its exterior design the development leap taken by the all-new BMW X2.

"The all-new BMW X2 is guaranteed to turn heads on the road with its athleticism, shaking up the premium compact segment in Singapore," said Mr. Lars Nielsen, Managing Director, BMW Group Asia. "As the entry-point into the BMW SAC lineup next to the BMW X4 and BMW X6, the BMW X2 appeals to the confident driver with an active lifestyle who also desires something stylish for the urban jungle. Plus, its Category A COE placement brings greater choice to our customers looking for a sporty drive."

The all-new BMW X2 is produced flexibly on a single assembly line at BMW Group Plant Regensburg. The progressive premium character profile of the compact SAC is underscored by further advances in sustainability encompassing the complete vehicle lifecycle – from resource-preserving production through the use phase to subsequent recycling.

Exterior design: authentic Sports Activity Coupé with dynamic lines and a confident presence.

The all-new BMW X2 has a distinctive, visually expressive design showing clear differentiation from the brand's compact Sports Activity Vehicle (SAV), the BMW X1. As such, it is instantly identifiable as a pure-bred SAC. Also characteristic of the new model are its dynamically stretched lines and a generous surface treatment. The all-new BMW X2 has grown by 194 millimetres in length over its predecessor to 4,554 millimetres, by 21 millimetres in width to 1,845 millimetres and by 64 millimetres in height to 1,590 millimetres. Plus, its increased wheelbase and wider tracks benefit space in both the five seats and the boot. The all-new BMW X2 has a luggage capacity of 560 litres.

The model-specific, upright front end of the all-new BMW X2 exudes confidence and presence. Its defining elements are striking Adaptive LED headlights with non-dazzling matrix high beam and an almost hexagonal BMW kidney grille.

The roofline, which flows along an unbroken path into the rear end, creates a slim, coupé-shaped silhouette and proportions in the signature style of an SAC from BMW. At the rear, the prominently flared wheel arches and muscular shoulders come to the fore. The horizontal contours of the model-specific rear light design further enrich the sporting flavour, as do a Gurney-style spoiler and an eye-catching rear apron.

The M Sport package brings aerodynamically optimised exterior details like M High-gloss Shadowline exterior trim, and M roof rails with High-gloss Shadowline. Customers can choose from four paint finishes including two two-tone variants for the exterior of their all-new BMW X2, including the new Fire Red metallic variant.

Premium ambience with a sporting flavour; impressive functionality.

The interior of the all-new BMW X2 has a modern premium ambience with sporting touches. The slender instrument panel, housing the BMW Curved Display, is joined in the cabin by a “floating” armrest with integral control panel. In the front section of the centre console are two cup holders and a smartphone tray with indirect illumination and wireless charging.

The newly developed seats are also offered in the Veganza perforated upholstery with sport seats, electric seat adjustment, and memory function for the driver. Further improvements have been made to both acoustic comfort and occupant protection. Standard equipment now includes an interaction airbag between the driver’s seat and front passenger seat.

Expanded standard equipment, targeted individualisation.

Two-zone automatic climate control, the navigation system BMW Maps and an M Sport leather steering wheel all come as standard in the all-new BMW X2, as do automatic tailgate operation, four USB-C ports and a 12V power socket in both the centre console and the boot. The number of driver assistance systems and digital services available has also increased significantly over the predecessor model. Other standard equipment includes the interior and exterior mirror package.

Efficient petrol engine, seven-speed Steptronic transmission with double clutch as standard.

A three-cylinder petrol unit from the latest modular generation of the Efficient Dynamics engine family powers the all-new BMW X2 sDrive16i. The 1.5-litre engine delivers maximum output of 90 kW/122 hp. A standard seven-speed Steptronic transmission with double clutch is available in the all-new BMW X2.

Optimum blend of agility and ride comfort, 21-inch light-alloy wheels optionally available for a compact BMW model for the first time.

The compact SAC's sophisticated chassis technology produces a perfectly harmonious balance between sporty, agile handling on the one hand and long-distance comfort on the other. All the tools required here are provided by a body construction that reduces weight while increasing rigidity, a long wheelbase, wider tracks than the predecessor model, and targeted upgrades to the single-joint spring strut axle at the front and the three-link rear axle. Near-actuator wheel slip limitation is fitted as standard in the new BMW X2, benefiting both traction and directional stability. Other new features include the integrated braking system and the extra, lift-related damping at the front axle. The optional adaptive M suspension features frequency-selective damping, sport steering and a 15-millimetre drop in ride height. The all-new BMW X2 sDrive16i comes as standard with 20-inch M light-alloy wheels.

State-of-the-art driver assistance systems for greater comfort and safety.

The standard and optional assistance systems for automated driving and parking available in the all-new BMW X2 increase comfort and safety both in everyday driving and on longer journeys. Standard features include Cruise Control with brake function while the Parking Assistant includes Reversing Assist Camera and Reversing Assistant also forms part of the standard equipment roster.

The new BMW Operating System 9 and BMW Digital Premium.

The latest version of the BMW iDrive display and control/operation system featuring QuickSelect rapid-access tech is fitted in the all-new BMW X2. Based on BMW Operating System 9, it is packaged together with the BMW Curved Display and BMW Intelligent Personal Assistant, meaning it has been carefully geared to operation using the touchscreen and natural language. BMW Operating System 9 also paves the way for a highly customisable selection of additional digital services. In addition to this, a Personal

eSIM designed for 5G mobile technology, the BMW Digital Key Plus, the BMW ID functionality and standard smartphone integration using both Apple CarPlay® and Android Auto™ are also all available in the all-new BMW X2.
