POSTCARD STORY. THE MINI COOPER SE IN HAMBURG.

P90511626

The MINI Cooper SE offers the perfect combination of locally emission-free mobility and the typical MINI driving pleasure. Thanks to its famous go-kart feeling and impressive agility, it is a loyal companion in Hamburg's city traffic.

Thanks to its powerful electric motor, the all-electric MINI is ideal for exploring the streets along the Alster to the Elbphilharmonie in an environmentally friendly way. The MINI Cooper SE in the Resolute Edition impresses not only with its sportive design, but also with its performance. The 135kW/184 hp accelerate the vehicle from 0 to 100 km/h in just 7.3s.

The 17" MINI Electric Power Spoke 2-tone wheels give the vehicle a dynamic look. The elegant Nanuq White exterior color rounds off the stylish appearance.

Fuel consumption, CO₂ emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment. For vehicles newly type-approved since 01.01.2021, the official specifications exist only according to WLTP. In addition, according to EU Regulation 2022/195, the NEDC values will no longer be included in the EC certificates of conformity as of 01.01.2023.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
