Postcard Story. The MINI Countryman SE ALL4.

P90556718

Urban or off-road — the new all-electric MINI Countryman SE ALL4 is the ideal companion. The MINI trunk volume, which can be extended up to 1450 l, offers plenty of storage space — for a family trip or an adventure holiday.

The timeless Melting Silver exterior color and the modern look of the Classic Trim give the MINI a superior appearance. Whether in the historic old town or in the mountain ranges of Greece — the Countryman SE ALL4 is also visually multi-talented. The versatility of the MINI is ideally emphasized by the 21-inch 950 Rallye Spoke rims (available as an accessory), roof rails and black panoramic glass roof. 313 hp guarantee typical MINI driving pleasure at all times — electric and locally emission-free. A range of up to 432 km and all-wheel drive complement the repertoire of the new MINI Countryman SE ALL4 perfectly.

MINI Countryman SE ALL4 (electricity consumption combined: 18.5 - 16.8 kWh/100 km according to WLTP; CO₂ emissions combined: 0 g/km; CO₂-class: A; Range in km according to WLTP: 399 - 432).

Fuel consumption, CO₂ emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment. For vehicles newly type-approved since 01.01.2021, the official specifications exist only according to WLTP. In addition, according to EU Regulation 2022/195, the NEDC values will no longer be included in the EC certificates of conformity as of 01.01.2023.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
