Postcard Story. The MINI Cooper S 5-Door in Classic Trim.

More space for adventure with a sunny disposition. The MINI Cooper S 5-Door provides good mood with its excellent functionality, powerful drive, and radiant Sunny Side Yellow.

P90591093

Thanks to its well-thought-out proportions and the efficient two-litre four-cylinder petrol engine, the MINI Cooper S 5-Door knows no bounds. Compared to the 3-Door model, the 5-Door offers more spacious accommodation with increased storage space and legroom due to the additional 172 mm in length. The two additional doors make it easier for rear passengers to get in and out, as well as loading and unloading the vehicle. The 60:40 split-folding rear seats increase the boot volume from 275 to 925 litres. With compact exterior dimensions and short overhangs, the 5-Door has a perfect turning circle of 11.4 metres, making it an ideal companion for exploring narrow alleyways.

Page 2

With the help of the four-cylinder engine with 150 kW/204 HP, the MINI Cooper S 5-Door reaches a top speed of 242 km/h.

With this release, we are providing new images of the MINI Cooper S 5-Door.

MINI Cooper S 5-Door (WLTP combined: Power consumption 6.8 - 6.3 l /100 km; CO2 emissions 152 - 141 g/km; CO2 class E).

All model variants, equipment and technical data described here refer to the German market. Consumption and emission data refer to the German Passenger Car Energy Labelling Regulation (EnVKV).

Fuel consumption, CO₂ emission figures and power consumption and range were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
