Postcard Story. The MINI JCW Countryman ALL4.

Pure adventurous spirit in its strongest form – with its powerful four-cylinder twinpower turbo engine and sophisticated storage space, the MINI John Cooper Works Countryman ALL 4 combines unique power with incomparable driving comfort.

P90592870

The powerful 2-litre four-cylinder TwinPower Turbo engine with an output of 221kW/300 hp guarantees MINI-typical driving pleasure on any terrain. With a maximum torque of 400 Nm and a top speed of 250 km/h, the MINI JCW Countryman ALL4 proves its performance. The all-wheel drive distributes the power precisely and reliably, providing the sporty crossover model with sufficient grip and traction even in challenging conditions.

With an additional 13 centimetres in length and eight centimetres in height compared to its predecessor, the MINI Countryman provides ample space for up to five passengers. The rear seat, which can be shifted by up to 13 centimetres and folded down, allows the luggage compartment volume to be conveniently and easily adjusted from 450 litres up to 1460

litres. The interior benefits from a panoramic glass roof, which provides additional brightness and all-round visibility.

With this release, we are providing new images of the MINI John Cooper Works Countryman ALL4.

MINI John Cooper Works Countryman ALL4 (WLTP combined: Power consumption 8,3-7,8 l /100 km; CO2 emissions 187 - 177 g/km; CO2 class E).

All model variants, equipment and technical data described here refer to the German market. Consumption and emission data refer to the German Passenger Car Energy Labelling Regulation (EnVKV).

Fuel consumption, CO₂ emission figures and power consumption and range were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
