

Press release - **FRENCH MARKET**
22 September 2021

**BMW model update measures as of autumn 2021.
New drive variant for the new BMW 4 Series Convertible -
BMW X1 xDrive18d and BMW X2 xDrive18d now feature 8-speed
Steptronic transmission as standard - New exterior paint finishes
for BMW 1 Series, BMW 2 Series Gran Coupé, BMW X2, BMW X3
and BMW X4 - My BMW App now with tyre pressure and tyre
condition display.**

Munich. The sales launch of the BMW iX and the BMW i4 in November 2021 marks the beginning of a new era of purely electric premium mobility. In addition to sustainable driving pleasure, the two new models also offer the latest innovations in the field of driver assistance systems and, with the new generation of the BMW iDrive operating system, represent the future of intuitive interaction between driver and vehicle. Parallel to this, the BMW model range will also undergo targeted further development in autumn 2021. Additional drive variants and innovations in the areas of design and digital services increase the diversity and attractiveness of the current range.

The model range of the new BMW 4 Series Convertible will be expanded by 1 new drive variants from November 2021. In future, an 8-speed Steptronic transmission will be standard equipment for one additional model variant each of the BMW X1 and the BMW X2. New paint finishes are available for the BMW 1 Series, BMW 2 Series Gran Coupé, BMW X2, BMW X3 and BMW X4 models. The functional scope of the My BMW App is complemented by further digital services. The BMW i brand is not only setting trends with its two new models. And in the BMW iX3, a predictive battery heat management system will optimise the way in which DC fast charging stations will be used in the future.

BMW 4 Series Convertible: additional BMW M automobile.

The combination of sporty performance and open-air pleasure in a BMW 4 Series model will be enriched even further in autumn 2021.

An inline 6-cylinder diesel engine and the intelligent BMW xDrive all-wheel drive system make the second new BMW M automobile a thrilling open-top drive. With a peak output of 250 kW/340 hp, a maximum torque of 700 Nm and 48-volt mild hybrid technology, the new BMW M440d xDrive Convertible (combined fuel consumption: 6.6 – 6.0 kWh/100 km according to WLTP; combined CO₂ emissions: 172 - 157 g/km according to WLTP) has impressive pulling power. 5.0 seconds are sufficient for the sprint from 0 to 100 km/h. An 8-speed Steptronic sports transmission and an M sports differential are also standard equipment in this model variant.

BMW X1 xDrive18d and BMW X2 xDrive18d now feature 8-speed Steptronic transmission as standard.

Driving pleasure and comfort will be enhanced in autumn 2021 as the 8-speed Steptronic transmission is included in further model variants of the BMW X1 and BMW X2 as standard. The fast and efficient automatic transmission is characterised by a high level of shifting comfort and a particularly favourable internal efficiency. In future, it will also be available as standard with the 110 kW/150 hp 4-cylinder diesel engine of the BMW X1 xDrive18d (combined fuel consumption: 6.6 – 5.9 kWh/100 km according to WLTP; combined CO₂ emissions: 159 – 142 g/km according to WLTP) and the BMW X2 xDrive18d (combined fuel consumption: 6.1 – 5.4 kWh/100 km according to WLTP; combined CO₂ emissions: 160 - 142 g/km according to WLTP).

With the new drive combination, both models accelerate from zero to 100 km/h in 9.4 seconds. An optional 8-speed Steptronic sports transmission is also available, operated by paddle shifts on the steering wheel.

New paint finishes for numerous model series.

New paint finishes for numerous current BMW models allow for additional customisation opportunities. The Skyscraper Grey metallic variant will be available for the BMW 1 Series, the BMW X2 and the BMW X3 from November 2021. Also new to the range are the BMW Individual paint finishes Frozen Pure Grey metallic for the BMW 1 Series and the BMW 2 Series Gran Coupé, as well as Aventurine Red metallic for the BMW X3 and the BMW X4.

My BMW App with extended range of functions.

Planning travel routes and transferring them to the car, receiving information about the car' status and live images from its surroundings, arranging service appointments or receiving news from the brand - the My BMW app makes all this possible on the customer's smartphone. It serves as a universal interface for communication between car and customer, the BMW brand and the BMW dealer. The range of functions of the My BMW App will be expanded again in autumn 2021. In future, for example, the images transmitted by the Remote 3D View service will be stored in a gallery, including information about the location and time of the shots. The status of the vehicle's air conditioning and ventilation is now also clearly displayed in the My BMW app.

In addition, the My BMW app now also provides drivers with comprehensive information on the condition of the vehicle's tyres on their smartphone. This new feature helps to minimise the risk of breakdowns and is available for the BMW 1 Series, BMW 3 Series and BMW 4 Series models, the new BMW 2 Series Coupé, the BMW 2 Series Gran Coupé, the BMW Z4 as well as the BMW X5, BMW X6 and BMW X7. The My BMW app displays the wheel-specific values as measured by the tyre pressure system. In addition, the digital tyre diagnosis, which is unique in the competitive environment, can also transmit information about a defect or wear of the tyres via the My BMW app. In the BMW backend, the data from the tyre pressure control system is processed together with the values for temperature and wheel speeds to create a forecast of the remaining life of the tyres. As a supplement to tyre pressure control, indications of tyre damage are also registered.

Intelligent battery heat management for the BMW iX3.

To ensure the fastest and most efficient power feed at DC fast-charging stations, regardless of operating and outside temperatures, the BMW iX3 (combined power consumption: 19.0 - 18.6 kWh/100 km according to WLTP, 17.8 - 17.5 kWh/100 km according to NEDC) will be equipped with intelligent thermal management for the high-voltage battery as in the BMW i4 / BMW iX from November 2021. As soon as the active

route guidance of the navigation system foresees a stopover at a High Power Charging Station, it already ensures that the battery is automatically preconditioned before arrival.

The appropriate heating or cooling ensures that the high-voltage battery is at the ideal temperature for charging at maximum power on arrival. The thermal management takes into account, among other things, the battery temperature, the remaining range, the predicted charging power and the planned scope of the charging process as part of the overall route calculation.

At a glance: The new BMW models for autumn 2021*

| BMW 4 Series Convertible | Output (kW/hp) | Fuel consumption WLTP (l/100 km) | CO ₂ emissions WLTP (g/km) |
|---------------------------------|-------------------|-------------------------------------|--|
| BMW M440d xDrive Convertible | 250/340 | 6.6 – 6.0 | 172 – 157 |

* all new models available from start of production in November 2021

Fuel consumption, CO₂ emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the automotive market in Germany. For ranges, the WLTP figures take into account the effects of any optional equipment.

All figures are already calculated on the basis of the new WLTP test cycle. WLTP values are used as a basis for the assessment of taxes and other vehicle-related levies that are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/> free of charge.
