Wide range of BMW M Performance Parts for the new BMW 5 Series, the BMW M5 and the BMW M5 Competition.

High-quality exterior and interior parts, wheels and drive components enhance the sporty character of the new BMW 5 Series and its BMW M models.

Munich. Concurrently with the market launch of the new BMW 5 Series, the BMW M5 (combined fuel consumption: 10.6 – 10.5 l/100 km; combined CO₂ emissions: 242 – 239 g/km*) and the BMW M5 Competition (combined fuel consumption: 10.6 – 10.5 l/100 km; combined CO₂ emissions: 242 – 239 g/km*), BMW is also offering in July 2020 an extensive range of BMW M Performance Parts for the new models. The accessories, which were developed using the comprehensive know-how of the BMW M GmbH, set additional sporty accents in terms of design, driving dynamics and performance and sharpen the particularly sporty character of both the BMW M5 and the BMW M5 Competition high-performance sedans even further. All components are aligned in the best tradition to the specific character of each model and, in addition to the sporty look, also fulfil the functional requirements as regards lightweight construction and aerodynamics. Most of the M Performance Parts for the BMW 5 Series will be available directly after the market launch of the new models.

High quality exterior carbon parts.

Numerous BMW M Performance Parts made from high-quality carbon render BMW's motorsport DNA permanently visible on the BMW 5 Series even off the racetrack. The M Performance front attachment on both sides and the M Performance front splitter made from the high-grade material provide for a sporty look at the front. In addition to a variant of the kidney grille surround in high-gloss black, the M Performance front grille is also available in a carbon version. Likewise, the M Performance exterior mirror caps, M Performance Air Breather in the front fenders and M Performance side sill attachments are made from this high-quality material. The M Performance rear spoiler Carbon and the M Performance rear spoiler Pro Carbon are both available for the sedans, with the M Performance carbon rear diffuser providing for a sporty looking rear end.

M Performance steering wheel and carbon parts for the interior.

The M Performance steering wheel creates a particularly intense bond between driver and vehicle. With distinctively shaped Alcantara grip recesses, large thumb-rests and special lining it guarantees maximum grip and a direct steering feel at all times. Together with the Alcantara, silver-grey, hand-sewn cross-stitching and the red 12 o'clock marking provide for a genuine motor sports atmosphere. As an alternative to the standard leather-covered steering wheel trim, M Performance carbon/leather or carbon/Alcantara steering wheel trims are also optionally available. The M Performance steering wheel Pro available exclusively for the BMW M5 and the BMW M5 Competition is fitted with a high-gloss polished carbon and Alcantara trim and the lower clasp bears the M Performance lettering. The 12 o'clock marking is finished in Motorsport Blue, the tricolour decorative stitching in the BMW M colours. The M Performance carbon shift paddles are also available for all other steering wheels. The carbon M Performance gear shift trims are exclusive to the BMW M5 and the BMW M5 Competition.

M Performance sports suspension for M5 models.

The outstanding driving dynamics of the BMW M5 and the BMW M5 Competition can be enhanced even further with the M Performance sports suspension without a change of the damper settings. The coilover suspension allows the vehicle to be lowered by between 5 and 20 millimetres, resulting in a lower centre of gravity, less roll tendency and higher cornering speeds. The optional M Performance sports brake system ensures corresponding deceleration values under maximum load. 20-inch M Performance forged wheels with Y-spoke design and 863 M Ferric Grey matt finish are also exclusively available for the two M5 models. These are manufactured using a sophisticated forging and milling process, offering a unique and patented three-dimensional spoke geometry, milled M Performance lettering as well as a coloured M Logo. Apertures in the spokes reduce air build-up in the wheel, so that less power is required to cut turbulence at high speeds. Further light alloy wheels comprising the M Performance 20-inch forged wheels in a multi-spoke 732 M bicoloured design are available for 5 Series vehicles. Moreover, the range of M Performance Parts includes exhaust systems for diesel engines.

M Performance also outside the vehicle.

Thanks to special accessories, BMW 5 owners can exhibit their sporty style outside the car as well. The M Performance key case Alcantara/Carbon is also made of the high-quality materials known from motor racing and serves as a daily commodity and eye-catcher. The M Performance tyre bag in the characteristic M design is recommended for storing and transporting an additional set of wheels. Also, the custom-fit breathable and machine-washable M Performance Indoor Car Cover with a soft, paint-protective interior as well as imprinted design elements such as the BMW kidney grille and a large “M” on the roof are available for both M 5 models.

BMW M Performance Parts for the BMW 5 Series, the BMW M5 and the M5 Competition:

Exterior:

- M Performance front attachment carbon left/right
- M Performance front splitter carbon

* The fuel consumption, CO₂ emissions, electric power consumption and operating range figures are determined according to the European Regulation (EC) 715/2007 in the version applicable. The figures refer to a vehicle with basic configuration in Germany. The range shown considers the different sizes of the selected wheels/tyres and the selected items of optional equipment, and may vary during configuration.

The values are based on the new WLTP test cycle and are translated back into NEDC-equivalent values in order to ensure comparability between the vehicles. With respect to these vehicles, for vehicle-related taxes or other duties based (at least inter alia) on CO₂ emissions, the CO₂ values may differ from the values stated here (depending on national legislation).

Further information on official fuel consumption figures and specific CO₂ emission values of new passenger cars is included in the following guideline: 'Leitfaden über den Kraftstoffverbrauch, die CO₂ Emissionen und den Stromverbrauch neuer Personenkraftwagen' (Guide to the fuel economy, CO₂ emissions and electric power consumption of new passenger cars), which can be obtained free of charge from all dealerships, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1. 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
