BMW model update measures as of spring 2022.

Additional drive options for the new BMW 2 Series Coupé, the new BMW 2 Series Active Tourer and the new BMW 4 Series Gran Coupé - Premiere for the new Parking Assistant Professional in the BMW iX - My BMW App with new functions for models with electrified drive - Extended choice of body finishes and light-alloy wheels for the BMW i4, the new BMW 4 Series Gran Coupé, the BMW M5 and the BMW iX - Additional driver assistance systems available for the new BMW 2 Series Active Tourer, the BMW X3 and the BMW X4 - Classic "BMW Motorsport" emblems to mark the 50th anniversary of BMW M GmbH.

Munich. Parallel to the launch of the new BMW 8 Series, the new BMW M8 model family, the BMW iXM60 (power consumption combined: 24.5 – 21.9 kWh/100 km according to WLTP; CO₂ emissions: 0 g/km) and the special edition BMW X2 Goldplay, BMW is increasing the appeal of numerous other models with additional drive variants and equipment features as of spring 2022. From March 2022, new model variants will expand the range for the BMW 2 Series Coupé, the BMW 2 Series Active Tourer and the BMW 4 Series Gran Coupé. The Parking Assistant Professional, presented for the first time, is optionally available for all model variants of the BMW iX and allows the vehicle to be manoeuvred via smartphone. The My BMW app also features additional functions that make charging the high-voltage battery in the purely electric and plug-in hybrid BMW models even more convenient.

New driver assistance systems, which are optionally available in the BMW 2 Series Active Tourer as well as the BMW X3 and BMW X4 models, provide added comfort. In addition, the range of body finishes, upholstery variants and light-alloy wheels for the BMW 4 Series Gran Coupé, the BMW i4, the BMW iX and the BMW M5 (fuel consumption combined: 11.3 – 11.1 l/100 km; combined CO₂ emissions: 259 – 253 g/km according to WLTP) receives further variants. To mark the 50th anniversary of BMW M GmbH, particularly striking "BMW Motorsport" emblems are optionally available for BMW M automobiles in conjunction with an M sports package.

Additional engine variant for the new BMW 2 Series Coupé.

Sheer driving pleasure in the BMW 2 Series Coupé can be experienced in a further variant from March 2022. The fourth engine option for the dynamic two-door model is a 2.0 litre 4-cylinder petrol engine with an output of 180 kW/245 hp and a maximum torque of 400 Nm. The new drive unit will feature in the BMW 230i Coupé (fuel consumption combined:

7.2 – 6.5 l/100 km; CO₂ emissions: 163 – 149 g/km according to WLTP) with classic rear-wheel drive. Power delivery and emissions behaviour have been optimised by an exhaust manifold integrated into the cylinder head and an advanced turbocharging system for the BMW TwinPower Turbo technology.

The new engine is combined with an 8-speed Steptronic sports transmission as standard. The range of equipment and functions includes gearshift paddles on the steering wheel and Launch Control, which enables the new BMW 230i Coupé to accelerate from a standstill to 100 km/h in 5.9 seconds. Among other things, an M sports differential in the final drive is available as an option for the new model variant.

New BMW 2 Series Active Tourer now also with BMW xDrive, additional body finishes and optimised Driving Assistant Plus.

Versatile functionality, hallmark driving pleasure and distinctive dynamic design characterise the second generation of the BMW 2 Series Active Tourer, which will also be available with intelligent all-wheel drive from March 2022. The new BMW 223i xDrive Active Tourer (fuel consumption combined: 7.1 – 6.5 l/100 km; CO₂ emissions: 160 – 148 g/km according to WLTP) is the fifth model variant of the modern all-rounder in the premium compact segment. Its BMW xDrive system transfers the power of a 4-cylinder petrol engine with 48-volt mild hybrid technology to all four wheels as required. The drive of the new BMW 223i xDrive Active Tourer delivers 160 kW/218 hp, generated jointly by its combustion engine with up to 150 kW/204 hp and the electric drive with up to 14 kW/19 hp. The electric auxiliary drive contributes to a particularly spontaneous accelerating response. The new model variant sprints from a standstill to 100 km/h in 6.9 seconds.

The new Piedmont Red metallic body finish will also be available from March 2022 for the new BMW 2 Series Active Tourer. In addition, the range of functions of the optionally available Driving Assistant Plus has been expanded to include Steering and Lane Guidance Assist. At speeds of up to 180 km/h, the system uses corrective steering interventions to help the driver keep the new BMW 2 Series Active Tourer in the centre of the lane. The steering assistance also ensures that a suitable distance to lane markings and vehicles on the adjacent lane is maintained when driving through narrow spaces, for example at motorway construction sites. In addition, Driving Assistant Plus includes Active Cruise Control with Stop & Go function, including automatic Speed Limit Assist. This is based on the Speed Limit Info system with anticipatory display of speed limits and overtaking bans.

Active Cruise Control with Stop & Go function now also available for the BMW X3 and BMW X4.

The range of optionally available driver assistance systems will also be extended for the BMW X3 and BMW X4 models as of spring 2022. Active Cruise Control with Stop & Go function will be available for the Sports Activity Vehicle and the Sports Activity Coupé in the premium mid-size class from April 2022.

Unlike the already standard cruise control with braking function, it not only keeps the desired speed between 30 and 160 km/h constant, but also the distance to vehicles ahead, which can be selected by the driver in four stages. Distance control is carried out by means of a radar sensor integrated into the front bumper and, if necessary, makes the vehicle decelerate to a standstill. The range of functions also includes automatic restarting after short intermediate stops of up to three seconds. In addition, the system offers the driver the option of adopting speed limits registered by the Systems Speed Limit Info traffic sign recognition system as the new desired speed at the touch of a button.

New BMW 4 Series Gran Coupé with further all-wheel-drive variant.

The model range for the new BMW 4 Series Gran Coupé will include a further variant as of spring 2022. The BMW 430i xDrive Gran Coupé (fuel consumption combined: 7.9 – 7.1 l/100 km; CO₂ emissions: 180 – 162 g/km according to WLTP) is the third model in the range in which intelligent all-wheel drive delivers particularly superior power transmission. The BMW xDrive system distributes the power generated by a 2.0-litre 4-cylinder engine with an output of 180 kW/245 hp and a maximum torque of 400 Nm to all four wheels as required.

The standard equipment of the new BMW 430i xDrive Gran Coupé also includes an 8-speed Steptronic transmission. This combination of engine, transmission and all-wheel drive enables acceleration from zero to 100 km/h in 6.1 seconds.

New equipment options for the BMW 4 Series Gran Coupé and the BMW i4.

In addition to the new drive variant, the BMW 4 Series Gran Coupé will also offer numerous additional options for customising the exterior and interior from March 2022. These are also available for the all-electric BMW i4 and include new body finishes and leather trims as well as an M Carbon exterior package.

The BMW Individual special paint finishes Brilliant White metallic and Frozen Dark Grey metallic are new to the range of body colours. In addition, the BMW Individual body

finishes Frozen Pure Grey metallic and Frozen Portimao Blue metallic are also available for the respective BMW M automobiles and in conjunction with the M Sport model. The BMW i4 M50 (power consumption combined: 22.5 – 18.0 kWh/100 km according to WLTP; CO₂ emissions: 0 g/km) for which the M Carbon exterior package was exclusively reserved so far, will also be available for all other model variants of the BMW i4 and the BMW 4 Series Gran Coupé from March 2022, also in conjunction with the M Sport model. It includes surrounds for the air curtains in the front apron, exterior mirror caps, a rear spoiler and diffuser insert trims made of the equally light and striking carbon-fibre-reinforced plastic.

In the interior of the BMW i4 and the BMW 4 Series Gran Coupé, customers can select particularly high-quality features with the extended BMW Individual Merino leather upholstery in the colour variants Black, Ivory White, Tartufo, Fjord Blue/Black and Fiona Red/Black. For an even more exclusive ambience, the BMW Individual full leather Merino interior, available in the same colours, also includes leather upholstery on the instrument panel. In addition, individual interior design preferences can also be fulfilled from March 2022 onwards thanks to special upholstery from the BMW Individual programme.

Parking Assistant Professional premieres in the BMW iX.

The BMW iX underpins its status as a technology flagship with the premiere of a new and unique system for automated parking. Available from March 2022 for all model variants, Parking Assistant Professional enables particularly convenient parking in automated driving mode.

Using GPS and trajectory data defined by steering movements, the system can store various manoeuvres with a route length of up to 200 metres each. When arriving again at the respective starting point, Parking Assistant Professional can then take over the complete driving task including accelerating, braking, steering and changing between forward and reverse gear. The driver can concentrate on monitoring the surroundings during the automated manoeuvre.

The BMW Individual paint finish Oxid Grey metallic and 22-inch M aerodynamic wheels in Bicolour Titanium Bronze with 3D gloss finish are new to the equipment range for all model variants of the BMW iX.

My BMW App with new functions for convenient charging.

The My BMW App is the universal interface for communication between the driver, the vehicle, the BMW brand and the BMW dealer. In spring 2022, its range of functions will be expanded to include digital services from BMW Charging for convenient electric mobility.

This makes it even easier for drivers of a BMW model with purely electric or plug-in hybrid drive to find and select public charging stations. The My BMW app shows charging stations and their availability on a map section.

In addition, the My BMW app also makes it easier to use public charging points. Drivers of a BMW iX or a BMW i4 can now start charging the high-voltage battery by scanning a QR code or with just one operating step in the My BMW app.

Individual dynamics: New body finishes for the BMW M5, classic emblems to mark the anniversary of BMW M GmbH.

New and particularly expressive paint finishes will be available for the BMW M5 high-performance sedan as of spring 2022. The exterior of the high-performance model can now also be given an individual look with the body finishes Sophisto Grey Brilliant Effect metallic, San Remo Green metallic and Skyscraper Grey metallic as well as with the BMW Individual paint finish Frozen Deep Grey metallic.

A historic logo also makes a comeback in the BMW M GmbH anniversary year. The classic "BMW Motorsport" emblems for the engine compartment lid, tailgate and wheel hub covers are available on request for all of the brand's performance and high-performance sports cars, as well as for BMW models delivered as an M Sport model or with an M sports package. Their design is based on the logo in the colours blue, purple and red, which was first used in 1973 on the racing cars of BMW Motorsport GmbH, which had been established the year before. On the occasion of its 50th anniversary, BMW M GmbH is offering its customers the opportunity to express their passion for racing and their sense of tradition with these historic emblems.

At a glance: The new BMW models for spring 2022*

BMW 2 Series Coupé	Output (kW/hp):	Fuel consumption WLTP (l/100 km)	CO ₂ emissions WLTP (g/km)
BMW 230i Coupé	180/245	7.2 – 6.5	163 – 149

BMW 2 Series Active Tourer	Output (kW/hp):	Fuel consumption WLTP (l/100 km)	CO ₂ emissions WLTP (g/km)
BMW 223i xDrive Active Tourer	160/218	7.1 – 6.5	160 – 148

BMW 4 Series Gran Coupé	Output (kW/hp):	Fuel consumption WLTP (l/100 km)	CO ₂ emissions WLTP (g/km)
BMW 430i xDrive Gran Coupé	180/245	7.9 – 7.1	180 – 162

* all new models available from start of production in March 2022

All the model variants, equipment levels, technical specifications, consumption and emission values described correspond to what is available on the automotive market in Germany.

Fuel consumption, CO₂ emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the WLTP figures take into account the effects of any optional equipment.

All figures are already calculated on the basis of the new WLTP test cycle. WLTP values are used as a basis for the assessment of taxes and other vehicle-related levies that are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
