Ready for new adventures: Individual accessories for the MINI Cooper S Countryman ALL4 in the Untamed Edition.

With the newly developed all-terrain complete wheels, the MINI Cooper S Countryman ALL4 can also make the most of its capabilities off paved roads. With the help of the roof-mounted sleeping space of the five-door all-rounder, the largest model of the British premium brand becomes a hip camper and thus even more versatile.

Munich. A hidden forest lake, a secluded beach cove or the view back down into the valley from a scaled mountain peak - the MINI Cooper S Countryman ALL4 (fuel consumption combined: 7.1 - 6.6 l/100 km; CO2 emissions combined: 163 - 151 g/km according to WLTP) encourages adventures beyond the city limits more than ever in the characterful Untamed Edition. When paved roads come to an abrupt end, 18-inch all-terrain wheels with GRABBER AT3 tires now support the vehicle's exceptional off-road capabilities in all weather conditions. And if the particularly spirited engine not only takes you to the end of the road, but also to the end of the day, the roof tent from the Italian specialist manufacturer AUTOHOME provides a spontaneous overnight accommodation option.

Page 2

The MINI Cooper S Countryman ALL4 is characterized by maximum traction and driving stability. The 18-inch alloy wheels with GRABBER AT3 tires underscore the off-road characteristics of the edition model with an attractive finish featuring high-quality clear lacquer. Thanks to the special design and the paint finish with a blue shimmer, the Untamed 2 Tone Spoke styling of the wheels emphasizes the sporty driving pleasure of the MINI Cooper S Countryman ALL4 visually as well.

As soon as the GRABBER AT3 tire hits loose ground, numerous grip edges interlock with the ground. On the one hand, it transmits the power of the 131 kW/178 hp four-cylinder engine with MINI TwinPower Turbo technology in all weather conditions, while at the same time ensuring safe driving pleasure off paved roads. The tread pattern, which is open to the side, gives additional traction in muddy and wet conditions thanks to efficient self-cleaning.

If you want to take your adventurous spirit to even more remote paths, you can carry your mountain bike conveniently from the folding rear bike rack of the MINI Cooper S Countryman ALL4 and pedal away. The easy attachment and space-saving transport make it easy to decide to take additional gear along on discovery tours.

For the necessary rest off the track, the AUTOHOME roof tent offers the perfect place to sleep. The black box weighs 58 kilos and measures 210 by 130 centimeters. With carrier the MINI becomes thereby straight times 2.05 meters high. The interior height of the mobile accommodation is 94 centimeters. The tent is easy to erect: Unlock the box at the front and back, gas pressure springs open the flap. The tent is boarded via an aluminum folding ladder. Mesh pockets hold the nightly and indispensable small items, an LED light provides an illuminating view.

All exterior materials of the mobile sleeping space are made of recycled polyester from 2022. The walls of the roof tent are also made of polyester fibers, for the extraction of which PET bottles from the sea were recycled. Thus, each square meter of the fabric contains recycled plastic from five PET bottles, providing sustainable sleeping comfort for spontaneous overnight stays. On the Ecofoam mattress made of ecological polyurethane, exhausted explorers lie comfortably and allergy-free thanks to the neutral and dirt-repellent material properties and can set off for the next adventure in the morning well-rested.

Fuel consumption, CO2 emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO2 emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO2 emissions of new cars, please refer to the "Manual on the fuel consumption, CO2 emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
