POSTCARD STORY. MINI COOPER S 5-DOOR.

P90478801

The MINI Cooper S 5-door shows its sporty side. The characterful bodycolor Island Blue, the color-contrasting roof and mirror caps in black and the 17-inch lightalloy wheels in Roulette Spoke 2-tone design lend the MINI its superior charisma.

The sporty character of the MINI Cooper S 5-door is most evident in the form of the 131 kW/178 hp four-cylinder engine, which accelerates from 0 to 100 km/h in 6.7 seconds. This dynamism is accentuated by the high-quality MINI Yours Trim interior. This is particularly distinguished by the standard Sport leather steering wheel in Nappa finish, the seats in MINI Yours Leather Lounge Carbon Black and the exclusive MINI Yours Aluminium interior surface.

With enough space for five people and a maximum capacity of 941 liters, the MINI Cooper S 5-Door also offers plenty of opportunities for active leisure. Despite its expandable storage space and powerful Steptronic sports automatic transmission, the 5-door can also impress with its compact and agile appearance, typical of the brand. This allows the MINI Cooper S to move deftly through the narrow streets of the mallorcan capital Palma de Mallorca, attracting attention not least because of its tail lights in the shape of the Union Jack.

Fuel consumption, CO_2 emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment. For vehicles newly type-approved since 01.01.2021, the official specifications exist only according to WLTP. In addition, according to EU Regulation 2022/195, the NEDC values will no longer be included in the EC certificates of conformity as of 01.01.2023.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO_2 emissions of new cars, please refer to the "Manual on the fuel consumption, CO_2 emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at https://www.dat.de/co2/.
