Postcard Story. From the city to the countryside with the MINI Countryman S ALL 4.

Dynamic in the city, comfortable in the country: the MINI Countryman S ALL4 presents itself as both versatile and powerful on the US East Coast. The 4-cylinder petrol engine gives the largest member of the MINI family a brand-typical driving experience.

P90609967

New York. From the heart of New York City to the idyll of Long Island: the MINI Countryman S ALL4 (combined fuel consumption: 7.4 - 6.8l/100 km, combined CO2 emissions: 169 - 155 g/km according to WLTP) shows just how versatile driving pleasure can be. With an output of 160 kW/218 hp, it brings superior performance to the road - from the dense traffic of Manhattan to the open coastal road in the Hamptons in the south-east of the metropolis. Its intelligent all-wheel drive ensures traction, driving stability and safety. Thanks to its clever interior architecture, it offers enough space for weekend luggage, surfboard and picnic basket in 450 to 1,450 litres of luggage space. Dynamic, reliable and comfortable: a MINI made for longer adventures and spontaneous time-outs.

Topic Postcard Story. From the city to the countryside with the MINI Countryman S ALL 4.

Page 2

With this release, we are providing new image material of the MINI Countryman S ALL 4.

MINI Countryman S ALL4 (fuel consumption combined: 7.4 – 6.8 l/100 km according to WLTP; CO₂ emissions combined: 169-155 g/km).

All of the stated model variants, equipment features, technical data relate to the German market. Energy consumption and emission figures relate to the German PKW-EnVKV regulation.

Fuel consumption, CO₂ emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment. For vehicles newly type-approved since 01.01.2021, the official specifications exist only according to WLTP. In addition, according to EU Regulation 2022/195, the NEDC values will no longer be included in the EC certificates of conformity as of 01.01.2023.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
