BMW Motorrad presents the BMW Motorrad Clothing Collection 2026. Rider's Gear and Casual Wear for safe, comfortable, in style motorcycling at all times.

P90627019

Munich. It is well known that there is no such thing as bad weather when riding a motorcycle, only unsuitable clothing. BMW Motorrad took this into account more than four decades ago and was the first motorcycle manufacturer in the world to present its first in-house rider equipment in 1978, in addition to the BMW Motorrad flip-up helmet introduced in 1976.

In the decades that followed, BMW Motorrad consistently implemented the maxim of making motorcycling as safe and comfortable as possible and at the same time fashionably attractive and stylish.

For the coming season, BMW Motorrad is once again offering numerous innovations and innovative solutions with the 2026 Clothing Collection.

Highlight: the new innovative BMW Motorrad System 8 Carbon and System 8 helmets for maximum safety and comfort.

The eighth-generation **System 8 Carbon** flip-up helmet, homologated in accordance with ECE 22.06, offers optimum safety with minimum weight thanks to its helmet shell made of a carbon-aramide-fiberglass mix. The innovative MIPS Integra TX® (Multi-directional Impact Protection System) reduces the rotational movement of the head in the event of an impact and reduces the risk of injury.

The **System 8** helmet variant is also homologated in accordance with ECE 22.06 and made from a glass fiber/aramid mix.

P90627058

Both helmets offer best impact absorption values and an optimum safety performance. Thanks to two helmet shell sizes, they are also only as big as they actually need to be.

Page 3

The polystyrene inner construction with different densities ensures maximum safety and comfort, while integrated neck straps ensure a secure fit. The inner padding, certified to OEKO-TEX 100, and the efficient ventilation system for the head and visor offer best functionality and optimum comfort.

Thanks to the multi-joint mechanism of the chin section, the new BMW Motorrad System 8 Carbon and System 8 helmets are very compact even when open and can be ridden in that position thanks to the integrated chin section latch. When riding with the helmet closed, the extremely effective spoiler supports wearing comfort. The aerodynamics and aeroacoustics have also been noticeably optimized for this purpose. Thanks to Pinlock 200, the visor offers the best possible anti-fog protection in all weather conditions. Other practical features include the central button for opening the chin section and the chin strap with snap-in buckle. The infinitely adjustable sun visor and the specially developed visor mechanism with quick release offer the greatest possible ease of use.

For an even more intensive motorcycling experience, the new BMW Motorrad System 8 Carbon and System 8 helmets can be upgraded with the innovative BMW ConnectedRide communication system; the corresponding antennas and devices are integrated ex works in all System 8 helmets. Optional visor kits are also available (orange, clear, tinted, blue mirrored, silver mirrored). Cheek pads in different thicknesses are available to enable an even more individual fit. The System 8 helmet is available in five colors, while the System 8 Carbon helmet is also available in five decor variants.

The **Glandon AIR jacket** in a sporty blouson cut is the perfect companion for summer rides. The focus here lies on the use of recycled materials or materials that can be returned to the cycle. The BMW logo and the BMW Motorrad emblem have therefore been embossed and are visual highlights. The combination of abrasion-resistant and air-permeable mesh fabric ensures safety and optimum ventilation at all times.

The jacket is therefore an ideal companion, especially in very warm temperatures. The jacket with protection class AA has protectors on the elbows and shoulders as well as a back protector. Reflective prints on the sleeves provide extra safety at night. Elastic ribbed cuffs and hem ensure a high level of comfort while three outer pockets with zippers and two inner pockets (one of which is waterproof) provide space for utensils.

The waterproof, modern **Soulor GORE-TEX boot** offers protection and an innovative ventilation system for optimum comfort on long rides. The effective GORE-TEX FLOW SURROUND technology ensures a pleasant climate balance with ventilation channels in the sole. Thanks to the waterproof and breathable GORE-TEX membrane, the boot is ideal for all weather conditions. The non-slip, shock-absorbing and oil and fuel-resistant VIBRAM® sole with reinforced protection zones provides additional safety. The upper shoe is made from a sturdy 3D knitted fabric. The inside zipper makes it easy to put on and take off while the FREELOCK quick-release system enables an optimum fit. Ankle and shin protection as well as integrated reinforcements in the toe and gearshift area ensure safety and comfort.

The Allrounder **Taurus GORE-TEX boot** is a waterproof and breathable touring boot that offers a high level of comfort and reliable protection on motorcycle tours. Made from hard-wearing leather and equipped with a waterproof and breathable PTFE-free GORE-TEX membrane, it is ideal for all weather conditions. The OrthoLite insole ensures a high comfort level. The boot has ankle, shin and shift lever protection as well as a non-slip and oil-repellent rubber sole. The covered zipper and an additional Velcro fastener make them easy to put on and take off. The **Taurus GORE-TEX Plus** version of the boot offers a 6 cm higher standing height.

Adventure seekers will get their money's worth with the Adventure collection. For the coming motorcycle season, it once again offers valuable additions in the area of functional clothing.

For example, the **GS Coro GORE-TEX jacket** (protection class AA), which impresses with its comfortable fit and excellent freedom of movement. Thanks to the GORE-TEX Z-Liner construction with GORE-TEX ePE membrane, it is waterproof, breathable and windproof (water column 28,000 mm). Removable protectors on the elbows and shoulders and a long back protector offer protection, while stretch inserts on the inside of the arms increase freedom of movement and comfort. Fall-prone areas on the elbows are reinforced with a gridded acrylic coating. In addition to the "2way Climate System", effective air inlets ensure optimum ventilation. The interior is equipped with a 3D spacer fabric to ventilate the back protector area. A specially tailored women's cut with infinitely variable waist adjuster ensures the perfect silhouette, while press studs and Velcro fasteners at the cuffs allow the width of the sleeves to be adjusted. The width of the collar and jacket hem can be adjusted using press studs or an elasticated band. A short zipper and an all-round zipper allow the jacket, which is available in black and olive for men and women, to be worn with matching trousers.

The matching **GS Coro GORE-TEX trousers**, also available for men and women in black and olive, offer a comfortable fit and excellent freedom of movement. They are also waterproof, breathable and windproof. Removable protectors on the hips and knees offer additional protection and stretch inserts increase comfort.

The **Reschen GORE-TEX gloves** made from a leather/textile mix are the perfect match for this suit and are an indispensable companion for extended rides: the touring gloves provide superior protection against wind and weather and the breathable GORE-TEX X-TRAFIT membrane reliably keeps out water and cold. Leather reinforcements, highly abrasion-resistant SuperFabric® and a soft knuckle protector round off the robust overall package, while the goatskin leather palm, thumbs and index fingers with tactile leather for smartphone operation ensure a high level of comfort and ease of use. They are already available in the color anthracite and will be available in the new color olive in 2026.

Page 6

The **GS Tabernas GORE-TEX boot** in black and olive was specially developed for off-road and on-road use. A modern enduro boot made of leather with plastic elements that offers a perfect balance of high comfort and optimum protection. Thanks to the PTFE-free GORE-TEX membrane, the boot is breathable and waterproof. The internal lacing system and two external buckles ensure stability and mobility. An oil and fuel-resistant VIBRAM® tread sole ensures optimum grip even on loose surfaces. Shin protection and shift lever protection ensure safety and comfort. The OrthoLite insole offers a high level of comfort and temperature-regulating properties. The iconic light design of the BMW R 1300 GS is taken up as a graphic in the shin guard and heel cap.

The waterproof **GS Takyr GORE-TEX sneaker** made from a 3D knitted fabric in black and blue combines functionality and comfort and is perfect for the road and outdoor activities. The breathable and waterproof PTFE-free GORE-TEX membrane defies all weathers. The stable, oil and fuel-resistant VIBRAM® Traction Lug sole offers lateral stability and optimum grip, even on loose ground. Thanks to the high-quality materials, the shoe not only offers protection from wind and weather, but also excellent cushioning and durability. The FREELOCK quick-release system ensures an optimum fit. The side zipper on the inside allows easy entry. A large TPU gearshift, toe and side protection offer comprehensive safety and comfort. The OrthoLite insole offers temperature-regulating properties.

The **GS Rallye Carbon helmet** (ECE 22.06 homologated) offers state-of-the-art safety technology and is based on the design of the GS models. The innovative MIPS Integra TX® (Multi-directional Impact Protection System) reduces the rotational movement of the head in the event of an impact and reduces the risk of injury. Thanks to two helmet shell sizes, the M-Forge® carbon/aramid-fibre mix helmet shell is only as large as is actually necessary. The helmet is available in black and in the Tramontana, Trophy, Calama, Lima and Nasca designs.

The **GS Rallye helmet** (ECE 22.06 homologated) is another ideal companion for on- and off-road adventures. An efficient ventilation system ensures optimum climate comfort. Here too, the helmet shell made of glass fiber-reinforced M-Forge® is available in two sizes and is therefore only as large as necessary. It is available in white, matt gray, black and neon yellow.

Page 8

Both helmet variants offer impact absorption values and a safety performance at the highest level and very balanced aerodynamics on and off-road as well as a Pull Rescue system for removing the cheek pads before removing the helmet (in the event of an accident). The infinitely adjustable sun visor as well as the specially developed visor mechanism with quick release and the removable helmet shield with self-locking mechanism offer the greatest possible ease of use.

The Pinlock 120 XLT® inner lens ensures perfect anti-fog protection. The outer visor has a scratch-resistant coating. The chin section with dust filter has a removable flap for maximum air flow for off-road use. Both helmet models can be upgraded with the newly developed BMW Motorrad ConnectedRide communication system.

The **GS Rallye GORE-TEX jacket** (protection class AA) with a functional, quick-drying and breathable material blend is perfect for off-road and on-road use. The clever ventilation options on the chest, back, shoulders and arms as well as the AirVent insert in the front area as an additional ventilation option guarantee a high level of comfort in warm to moderate temperatures.

Thanks to the waterproof 3-layer laminate GORE-TEX outserts with a 28,000 mm water column (included with the blue color - optionally available with the black color of the jacket), the jacket offers outstanding performance even in bad weather. The integrated storm hood in the collar of the outserts keeps wind, weather and dirt out of the collar, while the soft fabric part acts as a storm hood under the helmet for additional warmth. The waterproof GORE-TEX outer material defies bad weather. A specially developed carrying system allows the jacket to be worn like a rucksack, leaving your hands free, which is convenient and comfortable for city tours or breaks. The jacket is available for men and women in blue/red and black. It is complemented by the optimally ventilated **GS Rallye trousers** – sold with or without an outsert (according to the color logic of the jacket).

The **GS Rallye gloves**, made from a lightweight, breathable material mix in blue/red, are the ideal companion for all bikers who ride off-road in warm temperatures. The backhand is made of elastic textile in combination with goatskin for ideal comfort. The large knuckle protection is ideally prepared for the stresses and strains of off-road use while the kangaroo leather palm with reinforcements offers maximum grip. The summer glove with long cuff is also available in black and sand.

The **GS Rallye GORE-TEX gloves**, available in black, are also designed for off-road use. The goatskin leather palm provides best possible grip. A large knuckle shell made of hard plastic, lined with shock-absorbing foam, protects against impacts. The all-season gloves with a long cuff for road and off-road use are windproof, waterproof and breathable thanks to the GORE-TEX membrane and offer an optimum fit. The gloves are also available in anthracite/white.

The **GS Trophy GORE-TEX jacket** (protection class AA) in blue/red has been uncompromisingly developed for sporty and active riding, even off the beaten track. The extremely lightweight, robust and highly elastic polyamide softshell technology with innovative ventilation options ensures a comfortable fit in high temperatures. Together with the supplied very robust 3-layer GORE-TEX laminate outer jacket (water column 28,000 mm) the GS Trophy GORE-TEX jacket is a comfortable companion even at low temperatures. As part of the Adventure collection, it features the iconic light design of the BMW R 1300 GS as a graphic element. The outer jacket can also be worn separately as an outdoor jacket. As an additional highlight the jacket features an integrated pocket for the Hydra TrinkPak for physically demanding rides. The GS Trophy GORE-TEX trousers in blue provide the perfect complement and have also been uncompromisingly developed for sporty and active riding. The extremely lightweight, robust and elastic softshell technology with innovative ventilation and the GORE-TEX outer shell ensure a pleasant climate.

Sporty, ambitious motorcyclists as well as racetrack cracks will find everything their biker heart desires in the Sport collection. For example, the **Nitrous sneaker**, a light and airy sneaker in BMW M Motorsport design made from a breathable 3D knitted fabric. It offers the best wearing comfort with very good impact absorption values. The comfortable, lightweight and oil- and fuel-resistant sole in a two-tone design with BMW Motorrad logo and "M" inlay makes it ideal for motorsport enthusiasts. The TPU-reinforced parts in particularly stressed areas, such as the toe and ankle, offer additional comfort and protection.

With the Urban Mobility collection, BMW Motorrad offers practical and stylish products that are ideal for everyday motorcycling, but are also absolutely suitable for everyday use off the bike. Be it a stroll through town, shopping or just sitting in a café.

Take the **Tokyo GORE-TEX jacket** in olive, for example. Thanks to the three-layer, windproof, waterproof and breathable GORE-TEX Pro 3-layer material (water column 28,000 mm), the AirVent ventilation system and the removable inner jacket, this comfortable parka in a streetwear look with a casual fit and dropped sleeves can be used all year round. The full-length front zipper offers a clever dual function: two waterproof outer pockets with the zipper open from the top and more legroom with the zipper open from the bottom. The Tokyo GORE-TEX jacket also features a detachable, adjustable hood and two inside pockets.

The lightweight and airy **Ginza sneaker** made from a breathable 3D knitted fabric in black, blue and brown are a perfect match. It combines a sporty look with optimum comfort in dry weather. Thanks to the robust, lightweight and oil- and fuel-resistant sole with BMW Motorrad inlay, TPU-reinforced surfaces in the gearshift and toe area and excellent cushioning properties, the modern, sporty sneaker is ideally suited to the demands of everyday motorcycling. Thanks to a side zipper they are also easy to put on.

With the **Schwabing LTD Edition jacket** (protection class AA), BMW Motorrad has reissued a classic in a limited edition. Each jacket is unique thanks to the embroidered serial number. The black jacket with the metal BMW emblem on the sleeve impresses with the highest material and manufacturing quality. Its premium, water-repellent and slightly elastic nubuck leather is hand-selected. Ventilation options and two outside and three inside pockets maximize comfort and usability.

The **Grand Racer helmet** (homologated in accordance with ECE 22.06) in the new color matt black combines the charm of earlier motorcycle days with modern functionality. It not only goes along perfectly with the Schwabing LTD Edition jacket, but also with the BMW Motorrad Heritage models in general.

What sets it apart from other helmets in retro design is above all its pleasant aeroacoustics. High-quality materials and details made of brass and copper complete the classic look. Thanks to four different helmet shell sizes, the Premium Heritage helmet is only as big as absolutely necessary in each size.
