

BMW CRUISE BIKE 2013.

Stylish, high quality, light: the BMW Cruise Bike. The frame's ergonomic design ensures optimal weight distribution. The tilt degree of the fork and wheel base guarantee smooth riding performance with an optimal ratio of stability and agility. High torsional stiffness and an individually adjustable stem guarantee top comfort on this sophisticated sports product. Elegant appearance with smooth-welded seams and cable ducts through the frame. With high-quality adjustable fork and precise Shimano Alivio 27-gear derailleur.

Weight: (13.2 kg).

Aluminium frame (AL6061-T6): hydro-formed and powder-coated smooth-welded seams.
