### **First BMW Remote Software Upgrade for an Operating System 8 model, the BMW i4.**

Content summary of 21-11-550 Software Version.

#### **Personal eSim: Turn your BMW into a driving smartphone.**

With Personal eSim, your vehicle is turned into a further device that you can simply link to your mobile phone contract. The feature also uses your vehicle's external antenna to improve your mobile phone signal.

<b>Market availability:</b>	DE, JP, US
<b>Required SAs:</b>	SA6PA

#### **Lane Departure Warning: More convenient return to original lane after having passed vehicles.**

Your BMW is now capable of identifying that you want to return to your original lane after having passed vehicles on country roads and highways. This means that the vehicle will not output a Lane Departure Warning or actively intervene when pulling back into the original lane.

The system does not release you from your responsibility to correctly assess visibility and the traffic situation. There is a risk of accident. Adjust your driving style to the traffic conditions. Observe surrounding traffic and actively intervene when appropriate.

<b>Market availability:</b>	All CD markets
<b>Required SAs:</b>	5AU / 5AQ / 5AS / 5AV

#### **Lane Departure Warning: Optimized steering intervention for increased driving comfort.**

Steering interventions of your Lane Departure Warning when leaving the lane are smoother, as the steering duration and steering forces adapt more to the individual driving situation, i.e. the slower you leave the lane (for example), the smoother your vehicle will steer. Your BMW now aligns itself close to the lane marking that had previously been crossed to ensure that you return to an optimum driving position faster.

The system does not release you from your responsibility to correctly assess visibility and the traffic situation. There is a risk of accident. Adjust your driving style to the traffic conditions. Observe surrounding traffic and actively intervene when appropriate.

### The BMW Group

With its four brands BMW, MINI, Rolls-Royce and BMW Motorrad, the BMW Group is the world's leading premium manufacturer of automobiles and motorcycles and also provides premium financial and mobility services. The BMW Group production network comprises 31 production and assembly facilities in 15 countries; the company has a global sales network in more than 140 countries.

In 2021, the BMW Group sold over 2.5 million passenger vehicles and more than 194,000 motorcycles worldwide. The profit before tax in the financial year 2020 was € 5.222 billion on revenues amounting to € 98.990 billion. As of 31 December 2020, the BMW Group had a workforce of 120,726 employees.

The success of the BMW Group has always been based on long-term thinking and responsible action. The company set the course for the future at an early stage and consistently makes sustainability and efficient resource management central to its strategic direction, from the supply chain through production to the end of the use phase of all products.
