## Postcard Story: MINI JCW Aceman.

**Electric and dynamic – the MINI John Cooper Works Aceman on the streets of Tokyo. The MINI combines true MINI racing DNA with a confident, sporty presence and a driving experience that impresses instantly.**

P9062938

**Tokyo.** Electric performance in its most intense form – the MINI JCW Aceman combines spontaneous power delivery with MINI's signature sporty character. The Midnight Black exterior finish, paired with unmistakable JCW accents in Chili Red, gives the vehicle an expressive motorsport look that stands out in Tokyo's urban landscape.

Inside, the JCW color concept continues seamlessly. The JCW sport steering wheel with its textile six-o'clock spoke in JCW design and standard paddle shifters ensure precise control in any traffic situation. Meanwhile the black JCW sport seats with red accent stitching and multicolored knitted fabric at the shoulder guarantee optimum support even during dynamic driving.

With an output of 190 kW (258 hp), the MINI JCW Aceman delivers powerful acceleration, sprinting from 0 to 100 km/h in just 6.4 seconds. The specific John Cooper Works suspension settings maximise the go-kart feeling and ensure agile

handling. A powerful braking system in Chili Red ensures even in demanding driving situations precise and safe deceleration.

Compact, agile and electrifying – this is how the Aceman masters the challenges of one of the world's most exciting cities.

With this release, we are providing new image material of the MINI JCW Aceman.

## **CO2-Emissions & Consumptions:**

MINI JCW Aceman: (WLTP combined: energy consumptions 16,4 kWh/100 km; CO2 emissions: 0 g/km; CO2 class: A).

All of the stated model variants, equipment features, technical data relate to the German market. Energy consumption and emission figures relate to the German PKW-EnVKV regulation.

Fuel consumption, CO<sub>2</sub> emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment. For vehicles newly type-approved since 01.01.2021, the official specifications exist only according to WLTP. In addition, according to EU Regulation 2022/195, the NEDC values will no longer be included in the EC certificates of conformity as of 01.01.2023.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO<sub>2</sub> emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at [www.bmw.de/wltp](http://www.bmw.de/wltp).

For further details of the official fuel consumption figures and official specific CO<sub>2</sub> emissions of new cars, please refer to the "Manual on the fuel consumption, CO<sub>2</sub> emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
