

Model name semantics / Development codes.

Here is a table showing the current and valid model names of the vehicles sold under the BMW, MINI and Rolls-Royce brand names. The model names are arranged so that you can easily allocate the appropriate development numbers and market segments to them.

Please note that development numbers are only to be used in internal communication. The model names and their correct written form are mandatory for external communication, e.g. with trade outlets or customers.

The segment designations have been agreed with AK in German and English.

Product line L2

Segment	Predecessor	Current / new model	Model name
