BMW Benefits.

■ BMW Motorplan.

Included in the selling price of all new BMWs is a standard 5 year/100 000km Motorplan Maintenance Contract. This contract covers all service, maintenance and repairs resulting from normal wear and tear, excluding tyres, fuel and top-up oil. As with any maintenance agreement, there are certain exceptions which are clearly specified in the Motorplan agreement. Repairs resulting from negligence or an accident are not covered. For all BMW models the contract can be extended up to 7 years or 200 000km, dependant on your individual needs.

■ BMW On Call.

Comprehensive back-up service is provided to BMW customers through the BMW Customer Contact Centre in case of an accident, breakdown, theft or any emergency, 24 hours a day, 7 days a week. Free roadside assistance, towing services, emergency medical assistance, accommodation and car-hire can be provided (if further than 100kms from residence). For more information call 0800 600 777.

■ BMW Accident Management.

BMW Accident Management provides a managed response to an accidental vehicle immobilisation. The service includes using the BMW Approved Repair Centre network and overall co-ordination by the BMW Customer Contact Centre. Call 0800 600 777 for more information.

■ Original BMW Accessories.

BMW's high standards are reflected in the service that your BMW dealership provides in the choice and fitment of vehicle accessories. The comprehensive range of high quality Original BMW Accessories covers every aspect from the exterior to the interior and from mobile communication to transport and safety accessories. Your BMW dealership will be able to assist you with a catalogue of accessories specially suited to your BMW model.

■ BMW Lifestyle Accessories.

Even when you're not driving your BMW, you can still enjoy the unique fascination of the BMW experience, with exclusive products from BMW Lifestyle. From the X3 outdoor range to the Kids' Collection, F1 and GOLFSPORT clothing, to BMW miniatures, you'll be spoilt for choice. You can explore the range of quality BMW Lifestyle products by simply contacting your nearest BMW dealership.

■ BMW Financial Services.

BMW is also a powerful partner when it comes to financial matters. BMW Financial Services offers tailor-made solutions with attractive conditions in the fields of leasing, financing and insurance. Find out more at www.bmwfinance.co.za or contact your preferred BMW dealership.

■ BMW Owner's Circle.

The BMW Owner's Circle website is an online innovation that offers BMW drivers the opportunity to interact with BMW within a secure, personalised web environment. Registering at www.bmw.co.za/ownerscircle using your surname and ID number, gives you access to information and functionalities specifically relevant to your personal and vehicle profile.

■ BMW Magazine.

As a BMW driver, you will receive four complimentary issues of the BMW Magazine each year. Every issue covers the latest local and international developments in the world of BMW, including new product and technology news and sport, cultural and lifestyle features.

■ BMW Driver Training.

BMW has a commitment to road safety, not only through research and development and the manufacture of superior motorcars, but also through a worldwide involvement in driver training. BMW Driver Training courses help develop sophisticated driving skills and reduce the greatest cause of motor accidents - human error. For bookings and more information regarding courses visit www.bmw.co.za

BMW Innovations.

BMW continues to lead when it comes to ground-breaking automotive technologies that enhance your driving experience. Contact your preferred BMW dealership for more information on the innovations available for your specific BMW model.

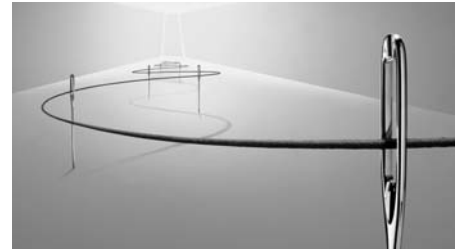

xDrive.

xDrive, the intelligent all-wheel drive system that thinks ahead. Unique technology distributes power flexibly at continuously variable levels – in a split second. And if one axle has no traction, power is transferred to the other one. Whether navigating through mud, rain or leaves, your car retains power, grip and performance.

Dynamic Drive.

Once tested, you will never want to do without it. The system measures the side tilt of your BMW through bends. And uses stabilisers to balance it out. The effect is a significant increase in sporty flair and comfort. You will experience the feeling of taking a bend with the same vehicle stability you would have on a straight stretch of road.

Active Steering.

Experience direct and directionally stable steering with the Active Steering system by BMW. When driving slowly the wheel angle increases making parking easier and providing greater precision when driving on bends. At higher speeds, the steering angle is reduced resulting in better tracking and enhanced control in all driving conditions.

Head-Up Display.

This technology projects important and helpful driving information directly onto the windscreen – right into your field of vision. This means you can always concentrate on what's most important: the road.

BMW Night Vision.

A thermal imaging camera uses innovative infrared technology to show what is ahead of your car on the central on-board monitor. The more heat the object gives off, the lighter it is displayed by BMW Night Vision. So when driving in the dark, with BMW Night Vision you can always be sure of one thing: a feeling of safety.

Adaptive Headlights.

Adaptive Headlights light up what is in front of the vehicle – right into the darkest corner and with greatly improved road illumination. And these are headlights which follow the road, making bends easy to see and the road in general more predictable. You'll feel safer when driving in the dark. And enjoy even greater driving pleasure.

High Beam Assist.

While you concentrate entirely on driving, High Beam Assist independently changes between high and low beam. Its sensors detect light sources and adapt the intensity of the headlights accordingly. This makes your life easier. And also sheds just the right amount of light on oncoming traffic. Without dazzle.

Active Cruise Control.

BMW's Active Cruise Control allows you to choose your desired speed, and then through a sophisticated radar system maintains a safe following distance between you and the car ahead. This provides assurance on long distances and in heavy multi-lane traffic. And it gives you more time to enjoy driving in your BMW.

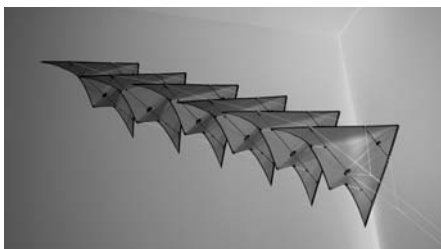

BMW Runflat Tyre Technology.

BMW Runflat tyres allow you to drive for approximately 150 kilometres in the event of total pressure loss. You don't need a spare tyre, which reduces weight and fuel consumption. They also set standards in driving dynamics with improved handling and a significantly shorter brake distance, so you can rely on them with and without air.

The 50:50 axle load concept from BMW.

BMW cars acquire their sporty qualities from a unique driving dynamics concept: the balanced axle load distribution of 50:50 and the characteristic BMW drive system. This means that all four wheels have the same solid grip on the road. Perfect conditions for a precise response, agility and exceptional driving pleasure.

BMW six-cylinder engines.

Meet the lightest in-line six-cylinder engine in its class with outstanding acceleration. An engine whose casing is made of an extremely light magnesium-aluminium composite. With significantly higher output yet lower fuel consumption. Making every trip one to remember.

Satellite Navigation.

As the pioneers of in-car navigation, BMW's navigation systems work in conjunction with GPS to automatically establish your current location and select the ideal route for your journey. Voice controls may also be used to assist you, ensuring you arrive at your destination with precise accuracy.
