NOVEMBER 2017.

## BMW 6 SERIES GRAN TURISMO PRICE LIST. NOVEMBER 2017.

CO <sub>2</sub> Tax including 14% VAT	630d	640i xDrive
8-speed Sports Automatic Transmission Steptronic	3 078.00	8 550.00

### Recommended retail price including 14% VAT, but excludes CO<sub>2</sub> emissions tax

Standard Model	630d	640i xDrive
8-speed Sport Automatic Transmission Steptronic	1 081 300	1 114 800

Sport Line	630d	640i xDrive
8-speed Sport Automatic Transmission Steptronic	1 101 300	1 134 800

Luxury Line	630d	640i xDrive
8-speed Sport Automatic Transmission Steptronic	1 116 400	1 149 900

M Sport Model	630d	640i xDrive
8-speed Sport Automatic Transmission Steptronic	1 143 400	1 176 900

Engine Specifications and Performance*	630d	640i xDrive
Cylinders/valves	6/4	6/4
Capacity (cc)	2 993	2 998
Maximum Power (kW/rpm)	195/4 000	250/5 500 - 6 500
Maximum Torque (Nm/rpm)	620/2 000 - 2 500	450/1 380 - 5 200
Acceleration 0 – 100 km/h	6.1	5.3
Top speed (km/h)	250	250
Combined Consumption (l/100 km)	5,6	8,5
CO <sub>2</sub> (g/km)	147	195

\*The published fuel consumption and CO<sub>2</sub> emission figures are established according to legislated technical specifications (UNECE Regulation 101/UN Regulation 83 and SANS 20101 standards), which sets out the procedures that are used to measure the CO<sub>2</sub> emissions and fuel consumption. The claimed figures are established using specific tests under standardised, carefully controlled conditions and may differ from consumption achieved under real world conditions with the influences of altitude, road surface, geographic conditions, vehicle options, temperature, humidity, tyres size and driving behaviour amongst others.

Code	Drivetrain Technology	630d	640i xDrive
SA2TB	8-speed Sport Automatic transmission Steptronic with adaptive transmission control and gearshift paddles on the steering wheel. Also includes Launch Control and predictive gear shift in combination with the standard Navigation system Professional	■	■
SA2VR	Adaptive 2-axle air suspension, with automatic self-levelling, manual raising up to 35 km/h by 20 mm and automatic lowering from 120 km/h by 10 mm	28 100	28 100
	Automatic Start/Stop function	■	■
	BMW TwinPower Turbo inline 6-cylinder diesel engine, with common rail direct injection and turbocharger with variable turbine geometry	■	–
	BMW TwinPower Turbo inline 6-cylinder petrol engine, with single turbo twin-scroll technology, combined with Valvetronic, Double VANOS and High Precision Injection	–	■
	Brake Energy Regeneration	■	■
	Brake pad wear indicator, single-stage wear measurement on one side, front and rear	■	■
	Driving Experience Control, with settings for Sport, Comfort, Eco Pro and Adaptive modes. Settings selectable via the driving experience control switch in the centre console. Adaptive mode is an intelligent mode that automatically supports a more sporty or comfortable driving mode in accordance with the individual driving behaviour. With navigation assistance predictive adjustments can be made via the Adaptive mode.	■	■
SA169	EU3 exhaust emissions standard	■	–
	EU6 exhaust emissions standard	–	■
SA2VT	Executive Drive, combines high driving comfort with dynamic driving characteristics. Due to the active roll stabilisation function the movement of the vehicle is reduced to a minimum when cornering at high speed or taking sudden evasive action. Also includes the adaptive 2-axle air suspension with automatic self-levelling (only with SA2VH)	56 100	56 100
SA2VH	Integral Active Steering, speed-dependent adaptation of the steering angle of both front and rear wheels combined with reduced effort applied to steering wheel for more agile handling.	23 400	23 400
SA2NH	M Sport brakes. Blue brake callipers with M designation (630d: only with SA337)	9 700	9 700
	Oil sensor for level and grade, electronic assessment of oil quality and level	■	■
	Park brake with automatic hold function, electromechanical, activated or deactivated via park brake switch in centre console	■	■
	Self-levelling pneumatic rear suspension, with standard coil and dampers on the front axle	■	■
	Servotronic steering system, servo assistance is optimised at all speed ranges (e.g. minimum steering effort required at parking speeds)	■	■
	Ventilated (inner) front and rear brake discs	■	■
	xDrive, permanent intelligent all-wheel-drive system with variable torque split between the front and rear axle	–	■

	Active rear spoiler, depending on travelling speed automatically extends and retracts to increase downforce at the rear in order to achieve optimum driving dynamics. Manual operation also possible via a button in the centre console	■	■
SA552	Adaptive LED headlights. With LED technology: accent lighting with turn indicators, low-beam and high-beam headlights and daytime running lights. Expanded lighting functions for improved visibility include: no-dazzle high-beam headlights (BMW Selective Beam), light colour close to that of ordinary daylight, optimum homogeneous illumination of the road and the contents of SA524 Adaptive headlights. Daytime driving LED tubes with specific design that extend up to the kidney grille (only with SA5AC)	25 500	25 500
	Automatic tailgate operation, with remote opening via remote control and closing via tailgate button or remote control	■	■
SA760	BMW Individual high-gloss Shadow Line, contents in Black high-gloss: exterior mirror frame, exterior mirror base, side frame decorative moulding and window recess cover. Mirror triangle and B-pillar finisher in Black high-gloss is part of the standard vehicle specification	3 800	3 800
SA3DZ	Deletion of additional exterior designation: removal of designation on the front side panels (only with SA337, SA7AC or SA7S2)	□	□
SA4T8	Driver side exterior mirror with automatic anti-dazzle function and exterior mirrors fold-in function	■	■
	Exhaust tail pipes, left and right with round chrome exhaust tail pipe finishers (2 x 80mm diameter)	■	–
	Exhaust tail pipes, left and right with trapezoidal-shaped visible chrome exhaust tail pipe finishers	–	■
	Exterior mirrors, electrically adjustable	■	■
	Exterior parts in body colour, including bumpers, air breather, door handles and roof trims	■	■
	Fog lights, rear, with LED technology	■	■
	Front kidney grille with surround and front-side longitudinal struts in chrome, intermediate kidney struts in black. Including Active Air Stream for optimum aerodynamics: opens and closes the air flaps depending on the engine and conditioning air requirements	■	■
	Headlight beam-throw control, automatic	■	■
SA502	Headlight washer system, high-pressure system for cleaning main headlights with automatically extending lifter jets (not with SA337)	3 950	3 950
SA5A1	LED fog lights, integrated into the front bumper system with LED lights in a horizontal arrangement (not with SA337)	■	■
	LED headlights for low and high-beam with automatic beam-throw control, including LED technology for turn indicators and daytime driving light rings	■	■
SA2PA	Locking wheel bolts	■	■
SA320	Model designation, deletion. Removal of the model and GT designation on the tailgate (640i xDrive: removal also of the xDrive designation)	□	□
SA402	Panorama glass sunroof. Two-panel panoramic glass sliding roof. With electrical operation of glass roof and sun protection with floating headliner. The front glass panel includes sliding and tilting function while the rear panel is fixed. With wind deflector for reduced wind buffeting and convenient opening and closing possible via the vehicle key	■	■
SA5DN	Parking Assist Plus, camera and ultrasound-based parking assistance system consisting of <b>Parking Assist</b> including: <b>Surround view</b> : optimum 360 degrees imaging of the area around the vehicle in Top View, Panorama View and 3D View by cameras integrated into the exterior mirrors, at the front and at the rear. Panorama Side View allows for an early view of intersecting traffic/junctions in situations where the vision to either side is restricted. <b>Remote 3D View (only in combination with SA6AP)</b> : transfer of static 3D View images to a mobile device via the mobile phone network	10 300	10 300
SA5DM	Parking Assist, the system assists in both parallel and lateral parking manoeuvres. Parking space measurements are done via ultrasonic sensors and the parking space search is shown in the Control Display. Optimum calculation of the line to be followed for parking and control of the steering, braking and acceleration in done by the system. Including Active Park Distance Control for braking assistance when reversing into a space (function limit up to 5 km/h)	2 900	2 900
SA8SL	Preparation for trailer tow hitch	■	■
	Rain sensor and automatic headlight control, automatic activation of the wipe control for the windscreen wipers (including intermittent-wipe) and automatic activation of the driving lights in low light conditions	■	■
SA5DV	Remote parking. For parking spaces where it is difficult for the driver and occupants to access the vehicle, the vehicle can be automatically parked into and out of lateral parking spaces by activating the function Remote Control Parking on the BMW display key. The driver is outside the vehicle during the parking process. The position of the vehicle to the longitudinal axis of the parking space can deviate by up to 10° (in any direction). Activation of the function is possible up to max. 5% downhill / uphill gradients (only with SA322 + SA5DN + SA3DS)	7 900	7 900
	Side turn indicators integrated into exterior mirrors	■	■
	Sun protection glazing for all windows (green tint), reduces heat rise inside the passenger compartment when the car is in direct sunlight.	■	■
SA420	Sun protection glazing, reduces heat rise inside the passenger compartment when the car is in direct sunlight. More strongly tinted glass from the B pillar back means that the glass in the rear compartment absorbs more of the sun's rays	6 500	6 500
	Third brake light using LED technology along the top of the rear window	■	■
SA3AC	Trailer tow hitch, fully electrically operated with operating switch in the luggage compartment. Includes trailer stabilisation monitoring	11 400	11 400
	Welcome lights (interior lighting and outer door handle area lighting are activated when unlocking)	■	■
	Window surrounds and window recess covers in chrome. Exterior mirror frame, mirror triangle and B-pillar finisher in high-gloss Black	■	■

SA4NM	Ambient Air Package. Air ionisation and scents for the vehicle interior. Intensity of the scents can be controlled in three stages via the iDrive controller or button in the air conditioning control panel. Two selectable scent cartridges can be fitted in the glove compartment with a durability of approx. six months with average use. Refills can be ordered via BMW accessories. The starter kit contains four scents: Blue Suite No. 1 (fresh water scents), Green Suite No. 1 (fresh plant scents), Golden Suite No. 2 (warm, rich scents) and Authentic Suite No. 2 (natural scents)	4 600	4 600
SA4UR	Ambient interior lighting, with mood lighting designs. Eleven pre-defined selectable lighting designs with contour and mood lighting in the instrument panel, door panels and centre console. Additional functional contents include reading lights in the rear, storage compartment lighting in the front centre armrest, exit lighting in the rear and handle-area lighting in the outside door handles	■	■
	Armrest front, in the centre console with storage compartment	■	■
SA4NB	Automatic air conditioning with 4-zone control and microfilter. Fully automatic temperature control with temperature stratification and air volume control. Controlled by means of separate displays for driver / front passenger and rear-seat occupants. Front air conditioning control panel with full-colour display and control through touch operation on function buttons. Two extra vents in the B-pillars. Including Automatic Air Recirculation, residual heat utilisation, solar sensor and fogging sensor	7 900	7 900
SA534	Automatic air conditioning with microfilter, 2-zone automatic air conditioning with extended contents. Separate temperature control and adjustment of air volume and air distribution for driver and front passenger. Common temperature control for rear passengers. Including Automatic Air Recirculation control, residual heat utilisation, solar sensor and fogging sensor	■	■
SA3DS	BMW display key. With touch control LCD colour display for vehicle status information (e.g. fuel range, service information, vehicles locking status, etc.). Charging also possible within the vehicle via the phone wireless charging function when in combination with SA6NW. Key dimensions: approximately 90mm x 55mm x 15mm. Range for info update up to approximately 300m and for locking functions approximately 30m	3 600	3 600
SA6U8	BMW Gesture Control. Specifically defined functions can be controlled in the detection range above the front centre console using hand gestures. Functions that can be operated by gestures include volume control, accepting and rejecting an incoming telephone call, closing externally triggered popups (e.g. traffic news), confirmation of Check-Control messages, triggering of a personally configured function and Surround View	3 600	3 600
SA775	BMW Individual headliner anthracite. Headliner, parcel shelf, pillar trims and sun visors in anthracite (with upholstery LCCY and LCDO: parcel shelf in Canberra Beige)	6 700	6 700
	Central locking with remote control, central locking for all doors, fuel filler flap and tailgate, convenient opening and closing of the windows and sunroof, adjustable automatic locking after setting off by means of vehicle settings	■	■
	Centre armrest in rear, foldable	■	■
SA4U1	Ceramic surround for controls. Details in ceramic: gear selection lever, surround for iDrive controller, audio and A/C controls	7 900	7 900
	Cruise control with brake function	■	■
	Cupholders, two in front centre console	■	■
	Cupholders, two integrated into rear armrest	■	■
	Door sill finishers in aluminium fine cutting finish with BMW designation at the front and rear	■	■
SA461	Electrically adjustable rear seat back rest, button for adjustment at the side of the seat cushion	7 800	7 800
SA456	Front comfort seats, electric adjustment with memory for driver and front passenger seats including lumbar support and adjustment of the upper backrest section, backrest width and thighrest. Front Comfort headrests with electric headrest height adjustment	■	■
	iDrive controller (touch-sensitive interface including writing recognition) with direct-selection buttons and fixed 10.25" high resolution full-colour touch display	■	■
SA4AW	Instrument panel in Sensatec, top section of instrument panel in Black Sensatec (in combination with upholstery LCFF and LZFF in Dark Coffee)	10 200	10 200
	Interior rear-view mirror with automatic anti-dazzle function	■	■
	Keyless engine start via Start/Stop button (key must be inside vehicle)	■	■
SA5DS	Luggage compartment emergency release	■	■
SA488	Lumbar support for driver and front passenger, electrically adjustable (only with SA481)	□	□
SA710	M Leather steering wheel	2 300	2 300
SA4GQ	M seat belts, consisting of black seat belts with fine M seam for all seats (only with SA337)	4 350	4 350
SA4T7	Massage function front, with eight massage programmes, each with three intensity levels for muscle activation and relaxation (not with SA481)	14 300	14 300
	Multifunction buttons for steering wheel, for operation of audio, cruise control and telephone functions	■	■
	Multifunction hooks integrated into the side cover in the luggage compartment on the left and right side	■	■
SA6WB	Multifunctional instrument display. High-resolution 12.3" colour display using black-panel technology. Changes the visual and graphical appearance of information in the instrument display according to the driving mode set via the Driving Experience Control button	7 000	■
	Personal Profile, key-specific saving of settings for important control functions	■	■
	Power sockets (12V), one in the centre console front storage compartment, one under the armrest in the centre console, two in the rear centre console and one in the luggage compartment	■	■
	Rear backrest, foldable with 40:20:40 split and button for remote unlocking in the luggage compartment on the upper trim panelling and on the upper backrest	■	■
SA416	Roller sunblinds for rear side windows, electric	■	■
SA459	Seat adjustment, electric with memory for driver's seat. Including electrically adjustable steering column, headrest height and easy entry/exit facility as well as electrical adjustment for seat fore-and-aft position, seat tilt, seat height, backrest rake and seat tilt - seat tilt only for driver's seat (only with SA481)	□	□
SA494	Seat heating for driver and front passenger, can be regulated in three stages	5 500	5 500
SA4HA	Seat heating for front and rear seats (not with SA494)	10 900	10 900
SA441	Smoker's package	■	■
SA323	Soft close automatic system for doors. Enables the doors to be closed conveniently and safely without much effort or noise nuisance in quiet surroundings. If a door is inadvertently left partly open (in first door catch position) it is automatically pulled to the fully closed position	9 600	9 600

Interior Equipment continued		630d	640i xDrive
	Sport leather steering wheel with gearshift paddles (in combination with upholstery LCFF: steering wheel in Dark Coffee)	■	■
SA481	Sport seats for driver and front passenger (not with SA456)	□	□
	Start/Stop button for starting and turning off the engine, including Automatic Start/Stop 'OFF' button	■	■
	Steering wheel column adjustment in height and length, electrically with memory	■	■
SA248	Steering wheel heating (only with SA494 or SA4HA)	3 600	3 600
	Two-part rear removable parcel shelf, storage possible under the luggage compartment floor panel	■	■
SA423	Velour floor mats	■	■
SA8SM	VIN visible from exterior	■	■
	Window lifts front and rear, electrical with trap release and convenient opening/closing feature	■	■

Code	Safety	630d	640i xDrive
	3-point seat belts on all seats, including pyrotechnic belt tensioners at front and belt force limiters for the front and outer rear seats	■	■
SA5DF	Active cruise control with Stop&Go function, Camera and radar based system enabling the driver to select a speed dependent distance to vehicles ahead. Can be set in the speed range from approx. 30 to 210 km/h with 4 selectable stages for the following distance. The Stop&Go function makes it possible to automatically maintain queue speed and distance in stop-and-go traffic and in traffic jams right down to a complete standstill. Include Speed Limit Info (not with SA5AT)	20 700	20 700
SA5AL	Active Protection. This safety package initiates protective measures for the occupants if an accident situation is imminent (seat belts tensioned, windows are closed, sliding sunroof is closed and vehicle is automatically braked after impact)	5 000	5 000
SA524	Adaptive headlights. Variable headlight beam distribution for better illumination of bends. Beam direction controlled by horizontally pivot-mounted LED headlights. Not active when vehicle is reversing or steering is turned to the right while the vehicle is at a standstill so as not to dazzle oncoming traffic. Additional cornering lights in the main headlights improve vision at close range and is operated by activation of the direction indicator or with corresponding steering wheel input and a speed range up to max. 35 km/h (not with SA552)	6 500	6 500
	Airbags, front for driver and front passenger	■	■
	Airbags, head for front and rear seats (curtain airbag that opens from the headliner)	■	■
	Airbags, side for driver and front passenger. Airbags deploy from the seat backrests of the driver and front passenger seats	■	■
SA302	Alarm system with radio remote control. Doors, engine compartment lid and tailgate are monitored. Including interior movement sensor, tilt sensor, emergency power supply for siren and anti-theft electronic vehicle immobiliser security system (EWS IV)	■	■
	Antilock Braking System (ABS), incl. Cornering Brake Control (CBC). Maintains the steerability of the vehicle irrespective of road condition. Prevents the wheels from locking by regulating the braking pressure for each individual wheel	■	■
	Attentiveness Assist, recognises tiredness and increasing lapses in concentration by monitoring driving behaviour (time of day and travel time is also taken into account). System suggests when to take a break in the Control display	■	■
SA8S3	Automatic door locking when driving away	■	■
	BMW Mobility kit, for emergency puncture repairing	■	■
SA6UK	BMW Night Vision with person recognition. Camera based system employing infrared technology to enable people and animals to be seen more readily in poor visibility situations. In potentially dangerous situations, a yellow pre-alert appears and in very critical situations an acute approach warning with red warning symbol will appear, an acoustic warning will sound and the brakes will be preconditioned. Includes Dynamic Marker Lights that illuminates the endangered objects through the main headlights (if without SA337 then only with SA502)	28 800	28 800
	Brake assist, maximum braking force assistance to shorten stopping distance on abrupt brake application	■	■
	Bumper system with replaceable deformation elements at front and rear for impacts up to 15 km/h, capable of withstanding impacts up to 4 km/h undamaged	■	■
	Check control, provides information on vehicle condition (oil level, coolant temperature, etc.)	■	■
	Child proof locks on rear doors, mechanical	■	■
	Child seat ISOFIX attachments for the two outer rear seats. ISOFIX child seats are available from BMW Accessories (not included)	■	■
SA322	Comfort access, "keyless" opening and locking of the vehicle including contactless opening and closing of the tailgate	12 800	12 800
	Crash sensor, controls activation of the airbags, hazard warning flashers, interior lights, unlocking of the doors, activation of the safety battery terminal and deactivation of the fuel pump in the event of an accident	■	■
	DataDot	■	■
SA8TN	Daytime driving lights selectable by Lights menu	■	■
	Door-integrated side impact protection	■	■
SA5AT	Driving Assist Plus, camera and radar based driver assistance system consisting of <b>Driving Assist</b> including the following systems: <b>Active cruise control with Stop&amp;Go function:</b> Camera and radar based system enabling the driver to select a speed dependent distance to vehicles ahead. <b>Steering and lane control assist:</b> Supports the driver in keeping to the middle of the lane by means of comfortable corrective steering interventions in the speed range up to 210 km/h and also in monotonous situations (Traffic jam assist). The driver can override this function at any time. <b>Lane keeping assist with active side collision protection:</b> Assists the driver in keeping in lane and actively preventing potential side collisions by means of comfortable corrective steering interventions in the speed range of 70 km/h to 210 km/h (Restricted function in the speed range of 30 km/h to 70 km/h: Warning via a single steering impulse in the opposite direction) <b>Crossing traffic warning, front:</b> Supports the driver when entering intersecting traffic and warns of potential collisions in traffic situations where it is difficult to see approaching traffic <b>Collision Avoidance:</b> Provides steering assistance at speeds of up to 160 km/h should a rapid lane change become necessary in order to avoid an impending collision with a stationary vehicle.	40 300	40 300

Code	Safety continued	630d	640i xDrive
SA5AS	<p>Driving Assist, camera based driver assistance system consisting of:</p> <p><b>Lane Departure Warning:</b> Detects lane markings at speeds above approx. 70 km/h and helps prevent inadvertent departure from the lane by transmitting perceptible vibrations via the steering wheel as a warning. When an indicator is on or the indicator stalk is held in 'short on' position (desired lane change) the function is suppressed. With display in the instrument cluster.</p> <p><b>Lane Change Warning:</b> Permanently monitors the zones to each side of the vehicle, detects vehicles in the 'blind spot' when above approx. 10 km/h for desired lane change (indicator is activated or stalk is held in 'short on' position), haptic warning via the steering wheel (vibration) and flashing symbol in the exterior mirror.</p> <p><b>Person Warning and Approach control warning with light city braking function:</b> Warns and brakes in a speed range from approx. 10 km/h to 60 km/h. If an accident cannot be avoided, the city braking function helps to reduce the impact speed. Approach control warning also warns of potential collision with a vehicle ahead at higher speeds, with preconditioning of the brakes for faster brake response and shorter braking distances.</p> <p><b>Crossing traffic warning, rear:</b> Supports the driver, for example, when reversing out of parking spaces and warns of potential collisions with intersecting traffic in situations where it is difficult to see approaching traffic. The Crossing traffic warning rear is extended by an additional real image display.</p> <p><b>Rear Collision prevention:</b> Detects the threat of rear collisions via rear sensors and warns the traffic behind via the hazard warning lights (flashing in double frequency).</p> <p>Also includes <b>Speed Limit Info</b></p>	15 700	15 700
	Dynamic Brake Lights, different light functions depending on how brakes are applied: under normal braking the brake lights show in the normal way; under severe braking (brake application to avoid hazard) the brake lights initially flash, when the vehicle has slowed to an appropriate speed the hazard warning flashers are activated and the brake lights show normally without flashing	■	■
	Dynamic Stability Control (DSC) with extended content, including pull away assist, braking readiness, dry braking and fading compensation	■	■
	Dynamic Traction Control (DTC), switchable function of Dynamic Stability Control (DSC) for improved traction	■	■
	Follow-me-home function. If the headlight flasher is activated after the ignition has been shut off, the low-beam headlights continue to shine for a period of time. The duration can be set via the iDrive controller	■	■
	Front passenger airbag deactivation, through keyswitch on front passenger's side	■	■
SA610	Head-up display. Full-colour projection onto the windscreen of information relevant to driving and specific to the situation, with automatic brightness control and 3D graphics for junction view (realistic display of turns and junctions). User-friendly display adjustments possible by means of the iDrive Controller. The following can be displayed: navigation information, speed, Speed Limit Info, warning information from the driver assistance systems, situational display of entertainment and communication lists, Driving Experience Control modes, BMW EfficientDynamics functional contents and check control messages with 3D graphics	17 100	17 100
SA5AC	High Beam Assist. Automatic switching on and off of the high-beam headlights depending on the traffic situation. In combination with SA552 also with BMW Selective Beam that controls the no-dazzle high-beam headlights	2 150	2 150
	Park Distance Control (PDC), front and rear. With acoustic and visual distance warning of obstacles to the front and rear of the vehicle. Function can also be manually activated/deactivated. Includes Auto PDC: automatically activates PDC when the vehicle starts driving forward towards an obstacle at < 3 km/h	■	■
	Rear fog lights, integrated in rear lights with LED technology	■	■
SA3AG	Rear view camera. Assists with reverse parking and reverse manoeuvring by imaging the zone behind the vehicle on the Control Display. Activation when transmission position "R" is selected. Located in the tailgate	■	■
SA258	Runflat tyres. Reinforced sidewalls mean tyres do not totally collapse and remain on the rim, even if they have lost all tyre pressure. Depending on the extent of tyre damage, can be driven at reduced speed - max. 80 km/h - for approx. 80 km	■	■
SA2VB	Tyre Pressure Monitoring. Sensors on all four wheels facilitate an exact and individual monitoring of the pressure in each individual tyre. Consists of a 3-stage tyre pressure warning system with text and image display in the instrument cluster	■	■
SA428	Warning triangle and first aid kit	■	■
Code	Entertainment and communication	630d	640i xDrive
SA698	Area code 2 for DVD	■	■
SA6F1	Bowers & Wilkins Diamond surround sound system. Featuring a fully active 10-channel amplifier with 1400W and 16 loudspeakers: 1 centre midrange speaker in the middle of the instrument panel with Bowers & Wilkins designation, 1 centre tweeter in the middle of the instrument panel with Bowers & Wilkins designation, 2 illuminated midrange speakers in the front door trims featuring Kevlar® technology, 2 illuminated diamond tweeters in the mirror triangles featuring Nautilus™ spiral technology, 2 illuminated midrange speakers in the rear door trims featuring Kevlar® technology, 2 tweeters in the rear door trims, 2 midrange speakers in the upper trim of the D-pillar, 2 tweeters in the upper trim of the D-pillar and 2 central bass speakers underneath the front seats featuring Rohacell® technology. Including Quantum Logic Surround with 7-band aqualiser (Dynamic Sound Equalising) and three analogue crossover networks for a constant sound quality in all seats. Stainless steel finishers with 'Fibonacci' hole pattern design ensure an optimum degree of efficiency for a pure sound experience	67 000	67 000
SA6NW	Comfort telephony with wireless charging. Wireless connection for compatible Bluetooth® mobile phone with extended functionality including handsfree operation. Wireless connection for audio streaming possible with the vehicle via Bluetooth. Smartphone holder at the front, in front of the cupholders with inductive charging according to Qi standard for suitable mobile telephones (including LED charge level indicator and forgotten mobile phone alert) and connection to the external aerial possible (max. device size 160x80 mm). For ensuring the charging function and external aerial connection, the smartphone must be positioned with its back to the charging surface. For selected smartphones without an inductive charging function according to Qi standard, special charging cases are available via BMW Parts and Accessories. Extended functionality (also dependant on the features of the Bluetooth® / USB device) include: improved hands-free capability for front passenger by provision of a second microphone, 2 x USB connections with 2.1A charging current for shorter charging times of smartphones and tablets, Bluetooth® / Wi-Fi audio streaming (possibility of playing compressed videos via the USB interface), at any given time 2 mobile phones and one audio player can be paired via Bluetooth®, display of organiser data from the customer's telephone on the Control Display by selecting 'Office' or 'Communication' from the menu, display of contact photos from the address book of the customer's telephone on the Control Display, display of album covers and software update for multimedia and telephony via the USB interface (for information on compatible devices, see www.bmw.co.za/bluetooth)	■	■
SA688	harman/kardon Surround Sound system. Featuring a 9-channel digital amplifier with individually adjustable equalising, 600W and 16 loudspeakers: 1 centre tweeter in the middle of the instrument panel, 1 centre midrange speaker in the middle of the instrument panel, 2 tweeters in the mirror triangles (with 'harman/kardon' designation), 2 midrange speakers in the front door trims (with 'harman/kardon' designation), 2 central bass speakers underneath the front seats, 2 tweeters and 2 midrange speakers in the rear door trims (with 'harman/kardon' designation), 2 tweeters in the upper trim of the D-pillar and 2 midrange speakers in the upper trim of the D-pillar	18 300	18 300
SA676	Hi-Fi loudspeaker system. Featuring a digital amplifier with 205W and 12 loudspeakers: 1 centre tweeter in the instrument panel, 1 centre midrange speaker in the instrument panel, 2 tweeters in the mirror triangles, 2 midrange speakers in the front door trims, 2 central bass speakers underneath the front seats, 2 tweeters in the rear door trims and 2 midrange speakers in rear door trims	7 600	7 600
SA866	Language version Chinese simplified, enables the display of all text in the central information display, instrument cluster and integrated owner's manual in Chinese (excludes map data that will remain in English and voice control not possible)	□	□

Code	Entertainment and communication continued	630d	640i xDrive
SA609	Navigation System, Professional. Fixed 10.25" high-resolution (1440 x 540 pixels) touch display. 3D map display (incl. digital terrain modelling, land marks, city modelling, satellite imagery and detailed street view). iDrive Touch Controller (touch-sensitive interface including writing recognition) with direct access buttons and 7 programmable favourites buttons. Hard drive supported system including 20 GB memory for music storage (incl. Gracenote® file). Large split-screen display with onboard Digital map storage and MP3 compatible DVD drive. Including 3-year free map update (1 map update per year). Operation of items of equipment such as telephone or navigation system can also be done via natural voice control	■	■
	On-board computer, informs about average speed, average consumption, range, outside temperature, time and date	■	■
	Radio BMW Professional incl. front-loading DVD drive (can do playback of video DVDs, MP3 compatible) and integrated Owner's Handbook with operation via the iDrive controller and readout on the Control Display	■	■
SA6FH	Rear-seat entertainment Professional. Including 2 high resolution tiltable 10.2" screens with a BluRay® drive. Operation via remote control. Separate connection options for MP3 players, game consoles, USB devices and headphones are available. Connectivity for wireless 'Kleer' headphones possible (headphones not included in scope of supply). Also allows access to the vehicle's entertainment functions, navigation system (driver independent navigation), online functions and telephone	33 700	33 700
	Stereo speaker system. Featuring 6 loudspeakers: 2 midrange speakers in the front door trims, 2 central bass speakers underneath the front seats and 2 midrange speakers in the rear door trims	■	■
SA601	TV-function, analog. With integrated roof aerial. Operation via iDrive Touch Controller	16 600	16 600

Code	BMW ConnectedDrive Services and Apps*	630d	640i xDrive
SA6AN	Concierge Services, personal 24/7 in-car concierge service provided by BMW. Person-to-person assistance for finding points of interest (e.g. restaurants, hotels, nearest pharmacy, ATMs, etc.), selecting destinations and planning a journey. Address data for the Navigation system can be transmitted directly from the BMW call centre to the vehicle and then accepted by the driver via the iDrive system (Concierge Service only supported in South Africa)	3 700	3 700
SA7S9	ConnectedDrive services package (package content consists of SA6AN and SA6AP)	4 200	4 200
SA6AK	ConnectedDrive Services, provides the services and functionalities of BMW Online and BMW Apps. BMW Online: in-car online portal that offers news, weather forecasts, online-search and Office functions. BMW Apps: permits the integration of certain smartphone applications (Apple and Android devices) such as the free BMW Connected App. This enables access to functions such as Twitter, Wiki Local, news and web radio via the iDrive system and Control Display (BMW ConnectedDrive Services only supported in South Africa)	■	■
SA6AC	Intelligent emergency calling, telematics service with manual emergency calling via SOS button and automatic emergency calling in case of an accident (based on a complex algorithm analysis of different sensor data). Transmitted data to the BMW Call Centre include information like vehicle location, severity of accident and status of the front airbags and seat belts (Manual and Automatic Emergency Call - without data transmission - supported in Namibia, Botswana and Swaziland)	■	■
SA6CP	Preparation for Apple CarPlay. Enables wireless and comfortable usage of your iPhone® in your vehicle via Apple CarPlay®. Smartphone content like music, messages, telephony, selected third-party apps and navigation can therefore be displayed and operated seamlessly via the user interface of the vehicle. The compatibility and functional scope of your iPhone® with Apple CarPlay® depends on the model year of the iPhone® and software version installed on it and must be enquired about with the mobile phone manufacturer. If you use Apple CarPlay® preparation, selected vehicle data is transferred to your iPhone. Further data processing is the responsibility of the mobile phone manufacturer or 3rd party app provider. The mobile phone manufacturer is responsible for all contents and functions displayed in the vehicle via Apple CarPlay® preparation	4 300	4 300
SA6AM	Real Time Traffic Information, supplies real-time traffic information on highways and national roads (extended coverage of urban main and secondary roads; excludes residential areas) with detailed information about the traffic situation and alternative route suggestions (consideration is also given to historical data such as rush hour traffic) (RTTI only supported in South Africa)	■	■
SA6AP	Remote Services, enables usage of remote functions (e.g. door lock and unlock, horn blow, flash lights and vehicle finder – displays the current position of the vehicle on a map on your compatible Smartphone in order to find your parked vehicle) by means of the My BMW Remote App (Remote Services only supported in South Africa)	1 100	1 100
SA6AE	TeleServices, telematics service for automatic and manual service need transmission and for initiation of breakdown assistance (BMW Teleservice Call, BMW Teleservice Breakdown Call and BMW Teleservice Battery Guard). Depending on the situation, service information is transmitted on an as-needed basis to the customer's preferred BMW Dealership (TeleServices only supported in South Africa)	■	■

Code	Service	630d	640i xDrive
	5 Year/100 000km Motorplan, non-contributing service and maintenance contract	■	■
	BMW On Call (outside South Africa, On Call is supported in Botswana, Namibia and Swaziland)	■	■

- Standard feature
- No cost option
- Not available

- SL Option included in Sport Line
- LL Option included in Luxury Line
- MSP Option included in M Sport package

Please note that not all options are listed. For a comprehensive list of additional options, visit your nearest BMW dealer.

# \*BMW CONNECTED DRIVE SERVICES – INFORMATION.

## 1. General information

Bayerische Motoren Werke Aktiengesellschaft, Petuelring 130, 80788 München, headquartered in Munich and registered in the Commercial Register at the local court of Munich under HRB 42243 (hereinafter referred to as “BMW”) provides the customer with certain vehicle-related information and assistance functions (hereinafter called “Services”) under the name of “BMW ConnectedDrive”. BMW collects, stores or processes car-related data in compliance with applicable law and only to the extent necessary to provide the Services. BMW does not collect, store or process personal data in the course of rendering the Services – except where this is explicitly stated in the description of the individual Services. In the case of Services that require personal data to be collected, stored and processed so that such Services can actually be provided, BMW informs customers of this in advance by providing this data protection notice. The Services are provided by means of a SIM card installed in the vehicle. Charges for the speech and data connections are included in the price for the Services.

## 2. BMW ConnectedDrive basic services

The BMW ConnectedDrive basic services “Teleservices” (6AE) and “Intelligent Emergency Call” (6AC) have already been activated at the point of vehicle transfer. In the case of BMWi vehicles, the basic services will include “Remote Services” (SA6AP) as an additional basic service.

### a. Teleservices (SA6AE)

The Service “Teleservices” is aimed at maintaining the customer’s mobility. Technical data for the vehicle (e.g. service information on the wear and tear of individual parts, vehicle status information such as control messages, battery charge level, data for identifying and localizing the vehicle in the event of a breakdown) are transmitted to BMW as required or if this process is triggered or ordered by the customer himself/herself. In the case of a service requirement, these data, together with the name and the email address of the customer as stored within the BMW ConnectedDrive customer portal, will be forwarded via the SIM card permanently installed in the vehicle to the responsible Service Partner, BMW Roadside Assistance or appropriate service provider for the purpose of establishing contact or arranging an appointment. These data will be stored by the recipient until the operations have been duly processed. No additional transfer of the data to third parties takes place. Technical data are transmitted from the vehicle to BMW at regular intervals, where they are evaluated for the continuing development of BMW products, in a process called the “Teleservice Report”. This exclusively involves purely technical data relating to the status of the vehicle. Other data, such as position data, are not transmitted within the scope of the “Teleservice Report”. The “Teleservice Battery Guard” continuously inspects the battery charging status of the vehicle. If the battery charging status falls below a defined level, information to this effect is transmitted to the responsible Service partner, who will, if necessary, establish contact with the customer in order to arrange a service appointment. By registering in the BMW ConnectedDrive customer portal (“My BMW ConnectedDrive”), the customer can also arrange to be notified of a critical battery charging status due to a parking light having been left switched on by text message or, in the case of BMWi, by push mail.

### b. For BMWi vehicles only:

The “Teleservice Battery Guard” continuously monitors the battery-charge status of the vehicle. If the battery-charge status falls below a fixed value, the responsible service partner will be informed. The responsible service partner will then contact the customer if necessary to arrange a service appointment. By registering in the BMW ConnectedDrive Customer Portal, the customer can also be informed about a critical battery status by text message or, for BMWi by push mail, by means of illuminated side or parking lights. Additional vehicle status information includes information about the location of the vehicle and information about the charging status, data about every begin, end, interruption and errors during charging as well as turning on and off the vehicle is sent from the vehicle to BMW and received by the BMW Car IT GmbH. This data is used for verification and quality assessment of charging stations. Verified and assessed charging stations will be displayed to the customer in the navigation system, BMW Online, BMW Remote App and in the ConnectedDrive Customer Portal. Furthermore, the identification of potential locations for new charging stations or new locations is possible.

The “Efficiency” service uses vehicle status information that every time the vehicle is turned off is sent from the vehicle to BMW. This data is calculated from driving performance measures, and can be viewed in the BMW Remote App and in the BMW ConnectedDrive Customer Portal.

The driving performance measures are statistically processed within the “Community” function with other BMWi drivers and shown as anonymous within the BMW Remote App and the BMW ConnectedDrive Customer Portal. The service “Community” first requires the consent of the customer within the customer portal or in the BMW Remote App.

The service “Range Map”, “Route to Vehicle”, “Vehicle Position” uses vehicle status information as well as information about the location of the vehicle, that every time the vehicle is turned off is sent from the vehicle to BMW. This data is used to represent the geographical position of the vehicle, which is display in the BMW Remote App and in the ConnectedDrive Customer Portal.

### c. Intelligent Emergency Call (SA6AC)

When the crash sensors are activated (air bag deployment, front seat belt tensioners, etc.) the Service “Emergency Call” triggers an emergency call to the BMW emergency switchboard via the integrated telephone unit. An employee then establishes contact with the customer, enquires about the condition of the vehicle occupants and alerts the rescue services. The “Emergency Call” Service can also be activated manually in order to summon assistance for other road users. Use of the Service “Intelligent Emergency Call” requires the identification and localisation of the vehicle as well as transmission of the information necessary to provide assistance to the responsible emergency call control centre. The user’s request as well as the necessary data will be transmitted to service

providers commissioned by BMW to perform the Services and will be used by this service provider exclusively for providing the respective Service and stored until the operations have been duly processed. In addition, for the purpose of warning other road users, certain completely anonymous environment-related information is used for traffic information and therefore forwarded to a service provider. No additional transfer of the data to third parties takes place.

### d. BMW Roadside Assistance

The Service “BMW Roadside Assistance” can be triggered manually by the customer in the event of a technical fault. In addition to the current position of the vehicle, the vehicle identification number, colour and model of the vehicle are also transferred to the Mobile Service of BMW during this process. The data are transmitted to the service provider commissioned by BMW to perform the Services, who uses them for purposes of managing the service provision and stores them until the operations have been duly processed. In addition, for the purpose of warning in order to other road users, certain completely anonymous environment-related information is used for traffic information and therefore forwarded to a service provider. No additional transfer of the data to third parties takes place.

### e. Automatic Map Update (depending on the vehicle equipment)

The Service “Automatic Map Update” automatically updates the map data stored in the BMW navigation system of the home country up to four times a year. The Service runs for a period of two years from the initial registration of the vehicle. The customer can renew the Service at a charge after it has expired Via “My BMW ConnectedDrive” at [www.bmw-connecteddrive.co.za](http://www.bmw-connecteddrive.co.za). In order to use the service “Automatic Map Update” the vehicle’s identification and localization during the update process are a prerequisite.

### f. Anonymous evaluation of sensor data and usage information for data quality enhancements and product development

For the purpose of enhancing service data quality and product development, vehicle sensor data of the surrounding traffic infrastructure (usually supplemented with time and location reference information), the vehicle status and additional usage information are being evaluated within the vehicle, transferred to BMW and anonymised immediately. It is impossible to trace the anonymised vehicle sensor data and usage information back to an individual customer. This vehicle sensor data includes (amongst others) information about traffic signs, traffic lights, construction sites, local hazards, traffic flow, road characteristics, parking spots, or vehicle error entries. For example, information about traffic signs are being used to enhance map data quality and to optimize route guidance. Local hazards like fog are being used to enhance data quality of traffic information and to avoid accidents.

The usage information is collected to create anonymous usage statistics about the system functionality. Based on this information BMW is continuously enhancing the experience and quality of its products and services.

The transmission of vehicle sensor data to BMW is activated by default. However, a customer can freely configure the categories of information (e.g., information about the traffic infrastructure) in the data privacy menu of a vehicle for which the transmission to BMW shall be allowed. The transmission of vehicle sensor data can also be deactivated completely by a customer. In addition, the data privacy menu of a vehicle provides detailed information about what the categories of vehicle sensor data are evaluated and what information is being transferred. The submission of usage information is deactivated by default, but the user can activate and configure the submission of usage information in the data privacy menu of the vehicle. Users who activate the submission of usage information are helping BMW to further enhance the quality of its products and services.

## 3. ConnectedDrive Services (SA6AK)

### a. BMW ConnectedDrive Services

The “ConnectedDrive Services” (6AK) service is activated for 36 months after first registration. The customer can extend the service for an additional charge beyond the initial period via the BMW ConnectedDrive Customer Portal.

### b. BMW Connected+

“BMW Connected+” is available for 12 months after initial registration.

The customer can extend the service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal ([www.bmw-connecteddrive.com](http://www.bmw-connecteddrive.com)).

“BMW Connected+” is an upgrade to BMW’s personal mobility companion BMW Connected. The “Plus” stands for a more seamless integration of the BMW Connected app into the BMW vehicle and offers a wider range of personalised services powered by BMW’s Open Mobility Cloud.

In order to use “BMW Connected+” the BMW Connected mobile application needs to be installed on the customer’s mobile device and the customer’s vehicle needs to be paired to his/her ConnectedDrive account. In order to use the in-car functions the customer’s smartphone needs to be connected via Bluetooth or USB-cable with the BMW Vehicle.

The feature “Send my routes to car” offers the customer the possibility to plan a multi-stop trip before entering the vehicle, e.g. by integrating a recommended fuel stop to the route and then seamlessly transferring the new route to the vehicle.

“BMW Connected Onboard” is the customer’s personal command center that gives access to all functions of BMW Connected in one personalised screen in the vehicle. It provides relevant information at the right time in one place and shows personalised content like the next meetings or the traffic situation alongside the current route.

"Share Live Trip Status" offers a service to safely share the arrival time and current live whereabouts in a map view with family, friends or business partners. They receive a link to a dedicated website where they can find all necessary information about the trip status.

"BMW Connected+" allows seamless door-to-door navigation from the customer's current position to the BMW vehicle and from the vehicle to the final destination also including walking times.

The feature "My Destinations" gives easy access to all relevant destinations anytime and on all BMW Connected touchpoints in and outside of the BMW vehicle.

Details about the processing of personal data in course of the "BMW Connected+" services can be found in the privacy policy of BMW Connected.

#### **c. BMW Online**

The Service "BMW Online" is a mobile Internet portal that provides various information services such as current weather conditions and the latest news. The customer can query local information via the online search function. The addresses found can be adopted directly into the navigation system as destinations. In addition, the customer also has access to office functions with the Service "BMW Online".

BMW aims to provide an advanced and high-quality range of information services within the scope of BMW Online. To ensure that this aim is met, the information services provided within the scope of "BMW Online" undergo regular inspection. As a consequence of this inspection, it is not only possible for further information services and functionalities to be added but also for individual information services or constituent parts thereof to be removed from the "BMW Online" portfolio temporarily or even permanently.

Use of the Service requires identification of the vehicle and processing of the information needed for providing assistance. The data are subsequently deleted. When the Points of Interest query is used, the customer's enquiry is transmitted, where appropriate, to the service provider commissioned by BMW to perform the Services, where it is used exclusively for providing the respective Service and stored until the operations have been duly processed. The data are subsequently deleted. No additional transfer of the data to third parties takes place.

#### **d. Send to Car**

The Service "Send to Car" provides the option of transmitting complete address data records from the customer's personal computer directly to the vehicle via "My BMW ConnectedDrive". This can take place either before or during the journey. Addresses can be transferred to the telephone directory or to the navigation system as a destination.

The Service "Send to Car" is supplemented by the "Send to Car" functions. Addresses can be found on Google Maps™ on the Internet and then sent directly to the vehicle by the driver. This also applies to the Service "HRS Send to Car", which enables the address data record for a hotel room booked with the Hotel Reservation Service (HRS) to be transferred from the driver's own PC to the vehicle. Both address and telephone number can then be called up in the vehicle under the menu command "My Info", from where they can be entered directly into the navigation system as a destination or to the mobile telephone. Calls to third-parties are made at the driver's cost via the mobile telephone connected with the vehicle.

### **4. Concierge Services (SA6AN)**

The "Concierge Services" (SA6AN) service is activated for 36 months after first registration. The customer can extend the service for an additional charge beyond the initial period via the BMW ConnectedDrive Customer Portal.

To use the service, the customer is connected to the BMW call centre at the push of a button using the integrated telephone unit. In this way, data concerning the vehicle's identification, location and – if route guidance is activated – the selected route may be transmitted to the service providers commissioned by BMW to provide the service – in that case, this data shall only be used to help process the provision of the service and shall be retained until all procedures have been properly completed. The data shall then be deleted. Beyond this, no data shall be forwarded to third parties.

### **5. Real Time Traffic Information (SA6AM)**

The "Real Time Traffic Information" ("RTTI" - SA6AM) service is activated for 36 months after first registration. The customer can extend the service for an additional charge beyond the initial period via the BMW ConnectedDrive Customer Portal.

The traffic information required for the service is calculated by a variety of means including using what is known as Floating Car Data. In this sense, every ConnectedDrive-capable BMW functions as a "mobile traffic reporter" (Floating Car). The individual position and sensor data of the vehicle calculated during the trip is transferred – completely anonymously – to BMW and a service provider together with up-to-date time information.

### **6. Remote Services (SA6AP)**

Registration on "My BMW ConnectedDrive" at [www.bmw-connecteddrive.de](http://www.bmw-connecteddrive.de) is a prerequisite for the "Remote Services" (SA6AP) function. This Service has to be booked once and can then be used for an unlimited period of time.

Using this Service, the customer can lock or unlock his/her vehicle from a distance via smartphone and, in the case of selected vehicles, sound the horn and flash the lights. At the customer's request, vehicle condition information, such as the geographic vehicle position are transmitted from the vehicle to BMW. Furthermore, with the special equipment option of auxiliary heating, the customer can also programme the heating periods. The "BMW ConnectedDrive" and "My BMW Remote App" applications are available for iPhone® in the Apple App Store<sup>SM</sup> and for Android<sup>TM</sup> in Google Play<sup>TM</sup>. Further information, including that on data processing, can be viewed prior to installation of the applications.

### **7. eDrive Services (SA6AG)**

a. The service "eDrive Services" comprises functions that are displayed to the driver in the vehicle, in the BMW ConnectedDrive App and in the BMW ConnectedDrive portal. The service supports the driver with information relevant to electronic mobility. The service serves among others to verify and evaluate the quality of the charging stations. For this purpose, location information as well as charging process information is sent to BMW and transmitted to the BMW Car IT GmbH for each charging start, finish, interruption and error as well as for each power on and off. Verified and evaluated charging stations are displayed to the customer in the GPS, BMW Online, BMW ConnectedDrive App and ConnectedDrive customer portal. Furthermore, possible locations for new charging stations or locations can be identified.

b. The "Efficiency" service utilises vehicle condition information which is sent from the vehicle to BMW with every vehicle switch-off. These data serve to calculate the driving performance index which is displayed in the BMW ConnectedDrive App and in the ConnectedDrive customer portal.

c. The driving performance index will be statistically processed with the index of other BMW drivers in the "Community" function displayed anonymously in the BMW ConnectedDrive App and the BMW ConnectedDrive customer portal. The service "Community" requires the customer's agreement in the customer portal or in the BMW ConnectedDrive App.

d. The service "Route to the vehicle" and "vehicle position" uses vehicle condition information as well as information regarding the position of the vehicle, which are sent to BMW with every vehicle switch-off. These data serve to display the geographic vehicle position, which is displayed in the BMW ConnectedDrive App and in the ConnectedDrive customer portal.

### **8. Interconnection of the vehicle with portals and apps (depending on the vehicle equipment)**

The Service "Interconnection of the vehicle with portals and apps" transmits vehicle data (e.g. vehicle position, service information, range, etc.) upon certain changes of the vehicle's state (e.g. start of driving, end of driving, locking, etc.) from the vehicle to BMW. These data are used to display the geographic vehicle position, the route to the vehicle and further vehicle condition information in BMW apps and BMW customer portals. The transmitted information is being used for the purpose of quality improvement and the development of connected services and future vehicles in a fully anonymised form. The BMW apps are available for iPhone® in the Apple App Store<sup>SM</sup> and for Android<sup>TM</sup> in Google Play<sup>TM</sup>. Further information, including that on data processing, can be viewed prior to installation of the app.

The Service Apple CarPlay Preparation is available for a period of 3 (three) years. While Apple CarPlay Preparation is available for customers, the functionality of this is entirely dependent on any updates which may be published by the developer and any enquiries in this regard should be directed to the developer. For more information on Apple CarPlay Preparation, please go to <http://www.apple.com/ios/carplay>.

### **9. Availability of the service**

The Services described are supplied within Germany for selected models and only for customers whose vehicles are registered in Germany and who have the necessary items of special equipment. "Emergency Call" is available for vehicles with the permanently installed SIM card (P-SIM) in Germany, Austria, Italy, San Marino, Vatican City, France, Monaco, Switzerland, Liechtenstein, Belgium, the Netherlands, the United Kingdom, Ireland, Spain, South Africa, Andorra, Portugal, Sweden, Norway, Czech Republic, Poland, Turkey and Russia. The Services "TeleServices", "Concierge Service", "Remote Services" and "BMW Online" can in principle be called up via the SIM card (P-SIM) permanently installed in the vehicle in every European cellular telephony network. When the Services are used in a foreign country, their scope and properties may vary from the afore-mentioned scopes and properties and differ from country to country. "RTTI" is available in Germany, Austria, Italy, France, Switzerland, Belgium, Luxembourg, the Netherlands, the United Kingdom, Ireland, Spain, South Africa, Portugal, Sweden, Denmark, Norway, Czech Republic, Poland, Turkey and Russia. "V-Info+" is available in Germany, the United Kingdom, France and Italy. The Service "Internet" is exclusively available in Germany.

### **10. Deactivation**

The customer can deactivate the BMW ConnectedDrive basic services "Teleservices" (6AE) and "Intelligent Emergency Call" (6AC) (and "Remote Services" (SA6AP), in the case of BMWi vehicles) at any time at an authorised BMW dealer, a regional BMW branch or an authorised BMW workshop. Deactivation of this service will also deactivate the SIM card installed in the vehicle. This results in the Emergency Call in the vehicle also not functioning. The other services can also be deactivated by the customer (from July 2014 via the BMW ConnectedDrive Customer Portal ("My BMW ConnectedDrive")), although the agreement between the customer and BMW in respect of those services will remain in operation and will not be suspended by the deactivation.

**For further information on BMW ConnectedDrive and the General Terms and Conditions of Business and Use for Connected Drive, please visit [www.bmw-connecteddrive.co.za](http://www.bmw-connecteddrive.co.za).**

The BMW Customer Interaction Centre is available on: +27 (0) 800 627771 from Monday to Friday, 8.00 am – 5.00 pm and by e-mail at [info@bmw-connecteddrive.co.za](mailto:info@bmw-connecteddrive.co.za)

## BMW BENEFITS.

**BMW Service Concept: always up to date.** When you buy a BMW, you can look forward to superb service and comprehensive customer care, with over 3 300 BMW Service Dealerships in more than 150 countries ready to assist you at any time. Thanks to the vehicle's integrated on-board diagnostics system, you will always know exactly when the next service is due, and what work will be required. **Condition-Based Service** measures the condition of key parts subject to wear, tracks fluid levels and monitors your BMW's time- and mileage dependent service requirements. Then simply get in touch with your BMW Dealership, who will provide expert care for you and your car. Staffed by highly trained personnel, your BMW Dealership is also equipped with the latest computer-aided information and diagnostic tools. Important data such as your chassis number, mileage and current service requirements are also stored on your car key, ensuring a quick assessment of your car's status. Meaning that staff have more time to assist you. And naturally, your BMW Service Dealership will have **Original BMW Parts** available for any work to be done. In short - quality and safety are at the heart of BMW Service.

**BMW Motorplan.** All new BMWs sold in South Africa include a 5 year/100 000 km Motorplan maintenance contract. This covers all service, maintenance and repairs resulting from normal wear and tear, excluding tyres and fuel. As with any maintenance agreement, there are certain exceptions which are clearly specified in the Motorplan agreement. Repairs resulting from negligence or accident damage are not covered. For all BMW models the contract distance can be extended up to 200 000 km, dependent on individual needs.

**BMW On Call.** In the event of a breakdown, BMW On Call is available 24 hours a day, 365 days a year at 0800 600 777. Specifically trained BMW technicians will do everything necessary to get your BMW back on the road, with telephone or on-site assistance as required. Car rental and/or towing of your car can be arranged if necessary.

**BMW Accident Management.** BMW Accident Management provides a managed response to an accidental vehicle immobilisation. The service includes using the BMW Approved Repair Centre network and overall coordination by the BMW Customer Service Centre, who will select and approve the best service suppliers in the industry. Call 0800 600 555 for more information.

**Original BMW Accessories and BMW Lifestyle Accessories.** The comprehensive range of high quality Original BMW Accessories covers every aspect from the exterior to the interior and from mobile communication to transport and safety accessories. BMW Lifestyle Accessories mean that even when you're not driving your BMW, you can still enjoy the unique fascination of the BMW experience with exclusive products from BMW Lifestyle. Your BMW Dealership will be able to assist you with a catalogue of accessories specially suited to your BMW model and you can explore the range of quality BMW Lifestyle products at the same time.

**BMW Financial Services.** There's only one more thing you could wish for: the perfect financing solution. One that leaves enough scope for all your other wishes. BMW Financial Services offers tailor-made solutions in the areas of leasing, financing and insurance individually developed to suit you and your budget. Leasing through BMW Financial Services lets you realise your dream of driving an exceptional BMW. And you yourself can decide on deposit, duration and the extent of your monthly instalments. A wide range of financing plans from BMW Financial Services meets your every requirement. Your local BMW Dealership will assist you to put together your own individual plan. And if you opt for insurance from BMW Financial Services, you'll be prepared for all eventualities. The comprehensive spectrum of options reflects the safety and quality you'd expect from BMW. For more information, go to [www.bmwfinance.co.za](http://www.bmwfinance.co.za) or call us on 0861 269 346. Your BMW Dealership can also provide you with more details on BMW Financial Services.

**BMW Magazine: Information and entertainment.** The BMW Magazine is a competent source for the latest, comprehensive news from the world of BMW. You receive a complimentary subscription when you purchase a new BMW.

**Internet.** Apart from the international website, [www.bmw.com](http://www.bmw.com), BMW maintains websites in many countries around the world. Visit the South African website at [www.bmw.co.za](http://www.bmw.co.za) to find out more about options available and to locate dealerships in your vicinity.

**BMW Owner's Circle.** The BMW Owner's Circle website is a personalised customer website that offers BMW drivers the opportunity to interact with BMW within a secure web environment. Each BMW driver is already a member of this online community, and can activate their membership by registering at [www.bmw.co.za/ownerscircle](http://www.bmw.co.za/ownerscircle). The internet site offers information and functionality specifically relevant to their personal and vehicle profile. A member can:

- Update personal and vehicle information;
- Review Motorplan details and extend their contract;
- View BMW Financial Services statements and apply for credit;
- See the service history on their BMW and submit online service booking requests;
- Contact BMW via a priority email service;
- View their owner's manual online;
- Book a BMW Driver Training course or Plant tour;
- Track a vehicle that has been ordered as it passes through various production and distribution processes.

Register by visiting [www.bmw.co.za/ownerscircle](http://www.bmw.co.za/ownerscircle).

**BMW Driving Experience.** BMW Driving Experience is the only driver training programme which offers you the opportunity to expand your driving knowledge and learn to keep your vehicle superbly under control, in a variety of situations, using an exclusive BMW vehicle. You will have an expert companion at your side while you push your driving skills to their very limits in a wide range of driving situations. By passing on their expertise in practical driving situations, our highly skilled instructors will ensure that participants learn as much as possible in the time allotted, as well as having a memorably enjoyable time. Courses covered are:

- Collision Avoidance and Skid Control.
- High Performance Driving.
- Defensive Driving.
- Hijack Prevention.
