2002 TO PRESENT ADVANTAGE: 40.5% FUEL CONSUMPTION: 10.5L/100KM

BMW R1150 GS Adventure

You don't have to be lapping the world to want one

YOU SAY

It's hard to look myself in the mirror, it's like the US. Some things.

Beloved of round-the-worlders and movie stars, the Adventure is the real deal when it comes to crushing continents. Or looking like you could. It boasts taller suspension, a bigger, 30-litre tank, greater crash protection and an ECU that lets the bike run on low-octane fuel. Just don't drop it because the weight makes it a struggle to pick up. The standard 1150 is a better bike in many ways, but the Adventure has that extra tough-guy kudos.

"The real deal when it comes to crushing continents"
