The BMW 1 Series
Sport 3 and 5-door

The Ultimate
Driving Machine

The BMW 1 Series Sport 3 and 5-door.

With near-perfect 50:50 weight distribution, award-winning BMW EfficientDynamics engine technologies and as the only car in its class with rear-wheel drive, the BMW 1 Series already sets the benchmark for dynamic performance, handling and agility.

But with the Sport trim, available on 116i, 116d and 118d 3 and 5-door models, you can enhance this sporting character even further with £1,315 worth of complimentary additional equipment, including:

- 17" Star-spoke style 256 light alloy wheels
- Front foglights for increased safety and visibility
- Heated exterior mirrors and windscreen washer jets
- Network cloth upholstery in Anthracite, Monaco Blue or Cranberry Red
- Sport leather steering wheel with multi-function controls
- Sport seats with electric side bolster adjustment

Every BMW 1 Series model comes equipped with a range of EfficientDynamics technologies to deliver lower fuel consumption and reduced emissions, without compromising the class-leading performance.

This means for example, that both the 118d (2008 World Green Car of the Year) and the 116d (the cleanest and most fuel efficient BMW ever produced) will cost just £35 in annual road tax and travel over 700 miles on a single tank of fuel on the combined cycle.

The new BMW 1 Series Sport models provide a superior combination of sporting performance, enhanced efficiency and customer value – all adding up to an even more rewarding driving experience.

Sport 3 and 5-door

The Ultimate
Driving Machine

This is how much has gone in.

The pleasure you get from driving a BMW is the result of fine engineering – always setting the benchmark because it is based on much more than engine power. This is the thinking behind BMW's programme of EfficientDynamics. A change in philosophy, this programme of technologies helps to make positive changes in reducing CO₂ emissions and improving fuel consumption whilst enhancing driving dynamics. Changes for both today and tomorrow. Today's solutions include Brake Energy Regeneration, an innovative process for harnessing energy previously lost. As for tomorrow – even more advanced technologies to improve emissions and fuel consumption as we move towards BMW's vision of CleanEnergy and the use of hydrogen-powered engines. Nothing lost, but much gained. BMW EfficientDynamics: pushing the boundaries in terms of performance and dynamism – without compromise.

High-precision direct injection

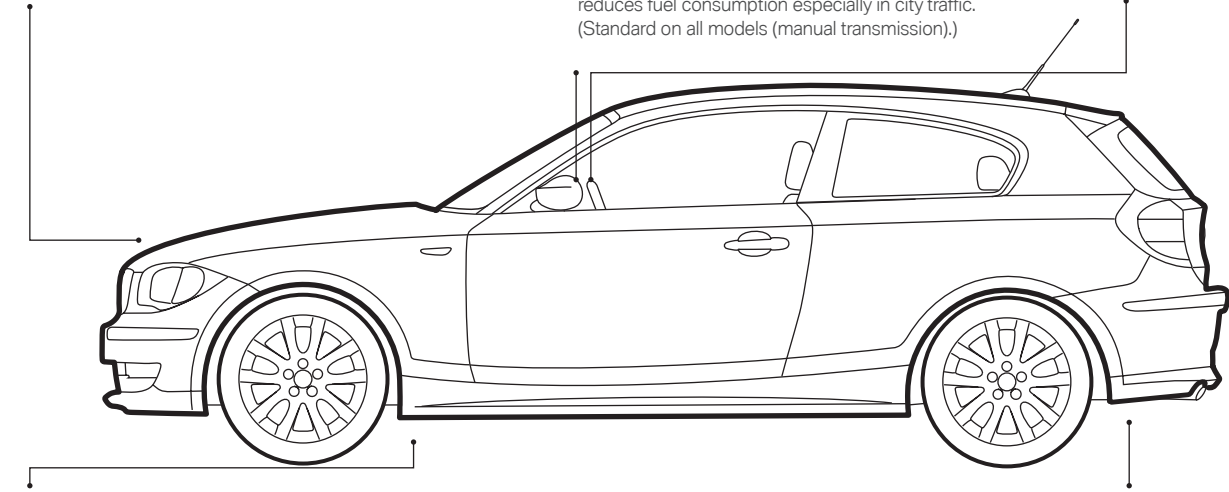

In this cutting-edge generation of petrol direct injection, the Piezo injectors are positioned very close to the spark plugs. They inject the fuel at high pressure and with extreme precision. This ensures an outstanding power-to-consumption ratio. (Standard on 116i, 118i, 120i.)

Auto Start-Stop

BMW four-cylinder engines with six-speed manual transmission automatically shut down when the vehicle is stationary, for example at a red light or in traffic, when the driver shifts to neutral and releases the clutch. The engine restarts as soon as the clutch is activated again. This innovation significantly reduces fuel consumption especially in city traffic. (Standard on all models (manual transmission).)

Optimum Shift Indicator

Timely gear shifts are one of the most effective and easiest ways to save fuel. This is where Optimum Shift Indicator in conjunction with six-speed manual transmission comes in. It shows the driver the most fuel-efficient gear to select for any driving situation. (Standard on all models.)

Electric Power Steering

In comparison with conventional, hydraulic steering systems, the electrical steering only uses energy during actual steering. When the steering wheel is in a constant position – for example at high speed along the motorway – the electronic motor is inactive. (Standard on all models.)

Brake Energy Regeneration

The alternator disengages automatically when the battery is fully charged, only re-engaging when the battery needs charging. In addition, the system engages automatically when the car's brakes are applied or when coasting, to recycle otherwise wasted energy. (Standard on all models.)

BMW already offers 80 models* with CO₂ emissions of 140g/km or less. But that's just for starters. We're carrying on our research – in the quest to bring you more driving pleasure and less consumption.

* In the UK and Republic of Ireland.

Certain BMW EfficientDynamics features may be excluded depending on the optional equipment chosen. Your BMW Dealer will be pleased to provide you with more information.

And this is what comes out.
