THE NEW BMW i3.

BMW i stands for visionary vehicles and mobility services, inspiring design and a new understanding of premium that is strongly defined by sustainability. The new BMW i3 offers an innovative experience that combines impressive agility and exhilaration with the fascination of relaxing, near silent driving. It is an uncompromisingly sustainable vehicle designed for urban areas, driven purely by electric power and purpose-built to meet the demands of sustainable and emission-free mobility.

BMW EFFICIENT DYNAMICS.

EfficientDynamics is BMW's award-winning programme of technologies designed to reduce CO₂ emissions and improve fuel economy, without compromising on performance or driving dynamics. These technologies are standard on every new BMW and could lower your fuel and tax costs, as well as ensure a lower benefit-in-kind tax rating for company car drivers. You can find out more about the benefits of BMW EfficientDynamics, as well as compare your own vehicle against the BMW i3 model at www.bmw.co.uk/EfficientDynamics

EXTERIOR.

The new BMW i3 showcases an exciting and sustainable design, while the vehicle remains unmistakably BMW. The eye-catching kidney grille features a frame with accents in Blue, while the striking U-shaped LED daytime running lights are a fresh interpretation of BMW light design and give the front of the vehicle a distinctively expressive look. Particularly striking is the High-gloss Black element which runs from the bonnet, across the roof and to the rear, to visually divide the new BMW i3 and portray its dynamic character. To the rear, the U-shaped LED taillights behind the black-glazed tailgate are yet another elegant detail.

INTERIOR.

The interior of the new BMW i3 demonstrates a fresh approach to vehicle design. Depending on your choice of interior, the use of natural fibres and naturally tanned leather, or climate active wool and structured textiles, create an innovative interior experience. The open-pore eucalyptus wood makes a strong contribution here, too, bringing the natural approach to life in an entirely new way. The aesthetic contrast in materials combines to create an exclusive and extremely attractive interior, whichever interior world is chosen.

The new BMW i3 also keeps you constantly up-to-date from right inside the vehicle. From dynamic range calculation to current charge status or calculating the most efficient route, the new BMW i3 provides a range of information to ensure you are always one step ahead. The wide range of BMW ConnectedDrive Services allow you to become connected to the world outside your vehicle by keeping up-to-date with friends on Facebook and Twitter, or browsing the internet.

STANDARD EQUIPMENT HIGHLIGHTS.

i3

- 19" BMW i light alloy Streamline Star-spoke style 427
- Aragats Grey / Black Neutronic cloth upholstery
- Bluetooth hands-free facility with USB audio interface
- BMW ConnectedDrive Services
 - Comprises:
 - BMW Apps interface
 - BMW Emergency Call
 - BMW Online Services
 - BMW TeleServices
 - Remote Services
- BMW i3 designation, rear
- BMW Navigation system – Business
- BMW Professional radio
- Conditioned Based Servicing
- DAB digital radio
- Door sill finishers with BMW i designation, front – Black
- Dynamic brake lights
- eDrive designation, rear
- Heat protection glazing with green-tint
- High-level third brake light integrated into rear spoiler
- Illuminated charging socket with visual display of charge status
- Instrument panel – grained metallic finish
- Kidney grille, contrast surround in BMW i Blue with High-gloss Black centre
- LED daytime running lights with BMW i design
- Multi-function leather steering wheel, two-spoke – Black with unique BMW i Blue accent
- Park distance control, rear
- Rain sensor with automatic wiper and headlight activation
- Rear spoiler, Black with integrated LED brake light
- Remote control, including integrated key
- Slide through light-weight front seats, with contrast highlighting in BMW i Blue

RRP from £29,950 inc. VAT

Eligible for Government subsidy up to £5,000. All pricing quoted is before all Government subsidies and grants.

The BMW i3 with Range Extender

The Range Extender model is designed to be able to increase the range with very little strain on the engine therefore making it efficient to run while maintaining the state of charge at a consistent level under normal conditions.

- Manually activated when the vehicle is below 80%
- Charge maintained when driving at higher speeds such as on motorways
- Automatically starts operating when the vehicle is at below 18% state of charge

RRP from £33,100 inc. VAT

Eligible for Government subsidy up to £5,000. All pricing quoted is before all Government subsidies and grants.

INTERIOR WORLDS.

The interior worlds of the new BMW i3 allow you to choose an interior design which best reflects your own tastes. Each of the striking interior worlds provide a different character to the interior of the vehicle, while retaining an exclusive BMW

ambiance. Sustainable materials, from woods to naturally tanned leather, are available and highlight the importance of sustainability throughout the new BMW i3.

STANDARD.

The interior of the new BMW i3 showcases a natural approach to design, while also creating a premium atmosphere. The use of new materials, for example the stylish standard upholstery in Aragats Grey/Black Neutronic cloth, underpins the futuristic ambience inside the vehicle. The dashboard is constructed using lightweight recycled materials on top of a magnesium structure which saves 20% in weight versus conventional materials. The metallic finish interior trim emphasises the high quality of the interior. Highlights in BMW i Blue are used throughout, and are particularly noticeable on the unique piping of the standard Black multi-function leather steering wheel.

LOFT.

The Loft interior world is designed to emphasise the spacious interior and generous levels of light, made possible through the new BMW i3's LifeDrive architecture. A harmonious blend of sustainable and modern materials creates a light and dynamic interior, which imparts the impression of stylish equilibrium and balance. Embossing on the seat surface incorporates the graphic design lines of the new BMW i3 and accentuates, together with the eye-catching BMW i Blue accents in the backrest, the modern feel of the new BMW i3. The unique multi-function leather steering wheel in Carum Grey with contrasting BMW i Blue accent further emphasises this elegant interior.

LODGE.

The Lodge interior world makes use of natural high quality materials to create stylish, modern lines with functionality and quality at the core. The climate active wool and naturally tanned leather upholstery is perfectly complemented by the leather instrument panel and eucalyptus wood interior trim, creating a friendly and open atmosphere. The curved wood surface of the dashboard is also an exclusive detail, and emphasises the natural aesthetic of this interior. The Lodge interior world features a unique multi-function leather steering wheel in Carum Grey with a crisp Satin Silver accent, which continues the theme of style and modernity.

SUITE.

The luxurious Suite interior world creates a sophisticated and exclusive atmosphere, whilst still reflecting the new BMW i3's focus on sustainable and natural materials. It features sumptuous leather upholstery which has been naturally tanned using olive leaves, thus ensuring that sustainability remains at the heart of the new BMW i3. The naturally finished eucalyptus wood on the interior trim is sourced from sustainable forestries and the use of natural materials continues with the leather instrument panel, which, like the seats, features naturally tanned leather. The high-quality multi-function leather steering wheel in Black has a contrasting Satin Silver accent.

THE NEW BMW i3.

TECHNICAL INFORMATION.

Model	Power output (hp)	0-62mph (secs)	Combined fuel consumption (mpg)	CO ₂ emissions (g/km)
i3	170	7.2	0	0
i3 with Range Extender	170	7.9	470.8	13

Model	Total average energy consumption (kWh/62miles)	NEDC Test Cycle electric range (miles)	Customer-orientated electric range (miles)	Customer-orientated additional range (miles)	Customer-orientated total range (miles)

BMW i CONNECTED DRIVE SERVICES.

1. General information

BMW (UK) Limited of Ellesfield Avenue, Bracknell, Berkshire, RG12 8TA (hereafter referred to as "BMW") provides the customer with vehicle specific information and support services under the name "BMW ConnectedDrive" (hereinafter referred to as "Services"). Except where the following description of the individual Services explicitly states otherwise, BMW does not collect, store or process customer data for the Services listed here. For the provision of Services for which the collection, storage and processing of personal data is necessary, the customer shall be informed in advance in order to obtain his/her consent. Services are provided by means of a SIM card installed in the vehicle. Call and data connection costs are included in the price of the Services. Insofar as it is necessary for the substantive organisation and utilisation of the Services BMW collects, stores and processes vehicle related data within the legal stipulations.

2. BMW ConnectedDrive basic Services

The BMW ConnectedDrive basic Services "TeleServices" (6AE) and "BMW Emergency Call" (6AC) have already been activated at the point of vehicle transfer.

a. TeleServices (6AE)

The "TeleServices" Service ensures the mobility of the customer. If required or when triggered or commissioned by the customer, the vehicle's technical data (e.g. service information concerning wear parts, vehicle status information such as check control notifications, battery charge status, data for identifying and locating the vehicle in the event of a breakdown) shall be transferred to BMW. In the event that a service is required, these items of data shall be forwarded to the responsible service partner, BMW Mobile Care or respective service providers for the purposes of making contact and arranging an appointment, where they shall be retained until all procedures have been properly completed. Beyond this, no data shall be forwarded to third parties. On occasion technical data shall be transferred from the vehicle to BMW where it shall be evaluated to aid the further development of BMW products. This is known as the "Teleservice Report". This data is exclusively technical, vehicle related data. Other data such as positioning data shall not be transferred as part of the "Teleservice Report". The "TeleService Battery Guard" continuously monitors the battery charge status of the vehicle. If the battery charge status falls below a fixed value, the responsible service partner will be informed. The responsible service partner will then contact the customer if necessary to arrange a service appointment.

b. BMW Emergency Call (6AC)

The vehicle's identification and location is required for the use of the "BMW Emergency Call", and it is also necessary to transmit the information required to provide assistance to the respective emergency service centre. The user's request and the data required may be transmitted to service providers commissioned by BMW to provide the Service – in that case, these items of data shall only be used to help provide the Service and shall be retained until all procedures have been properly completed. Beyond this, no data shall be forwarded to third parties.

3. BMW Online Services (6AK)

The "BMW Online" (6AK) Service is activated for 36 months after first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

The vehicle's identification is required for the use of the Service and it shall also be necessary to process the information required to provide assistance. The data shall then be deleted. When Points of Interest queries are used, the customer request may be transmitted to service providers commissioned by BMW to provide the Service – in that case, these items of data shall only be used to help provide the Service and shall be retained until all procedures have been properly completed. The data shall then be deleted. Beyond this, no data shall be forwarded to third parties.

4. Information Plus (6AN)

The "Information Plus" (6AN) Service is activated for 36 months after first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

To use the Service, the customer is connected to the BMW call centre at the push of a button using the integrated telephone unit. In this way, data concerning the vehicle's identification, location and – if route guidance is activated – the selected route may be transmitted to the service providers commissioned by BMW to provide the Service – in that case, this data shall only be used to help process the provision of the Service and shall be retained until all procedures have been properly completed. The data shall then be deleted. Beyond this, no data shall be forwarded to third parties.

5. Real Time Traffic Information (6AM)

The "Real Time Traffic Information" (6AM) Service is activated for 36 months after first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

The traffic information required for the Service is calculated by a variety of means including using what is known as Floating Car Data. In this sense, every ConnectedDrive capable BMW functions as a "mobile traffic reporter" (Floating Car). The individual position and sensor data of the vehicle calculated during the trip is transferred – completely anonymously – to BMW and a service provider together with up-to-date time information.

6. Internet (6AR)

The "Internet" (6AR) Service runs for a period of one year after the vehicle's first registration. The customer can extend the Service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal.

7. Remote Services (6AP)

Use of the "Remote Services" (6AP) either upon request to BMW Customer Support or via the "BMW i Remote" smartphone application requires registration in the BMW ConnectedDrive Customer Portal.

8. Online Entertainment (6FV)

The "Online Entertainment" (6FV) Service is valid for a period of one year from activation in the vehicle. Upon purchase of this Service, a voucher is provided which is redeemable within three years of the vehicle's first registration and enables a 12 month subscription with a chosen BMW music provider. During the subscription period no data quantity restrictions apply and the subscription is accessible on third party applications which are supported by the music provider.

9. Availability of the Service

The complete range of Services is only available for customers whose vehicles are approved in United Kingdom, and only within United Kingdom.

"BMW Emergency Call" (6AC) is available to customers in United Kingdom, Germany, Austria, Italy, France, the Netherlands, Switzerland, Belgium, Republic of Ireland, Spain, Portugal, Sweden and Norway. "TeleServices" (6AE), "Information Plus" (6AN), "Remote Services" (6AP) and "BMW Online" (6AK) can be accessed on any mobile communication network in Europe. When used abroad, the range and characteristics of the service may vary from the range and characteristics described above and may vary from country to country. "Real Time Traffic Information" (6AM) is available in United Kingdom, Germany, Austria, Italy, France, the Netherlands, Switzerland, Belgium, Republic of Ireland, Spain, Portugal, Sweden and Norway. The "Internet" (6AR) service is only available in United Kingdom. "Online Entertainment" (6FV) is available in United Kingdom, Germany, France, Italy, Spain and the Netherlands.

10. Deactivation

The customer may have the BMW ConnectedDrive basic Services "TeleServices" (6AE) and "BMW Emergency Call" (6AC) deactivated at any time at an authorised BMW i Agent or BMW i Service Authorised Workshop. Deactivation of this Service will also deactivate the SIM card installed in the vehicle. This results in the Emergency Call in the vehicle also not functioning. The other Services can also be deactivated by the customer (from August 2014) via the BMW ConnectedDrive Customer Portal ("My BMW ConnectedDrive").

For further information on BMW ConnectedDrive and the General Terms and Conditions of Service for ConnectedDrive, please see:

www.bmw.co.uk/connecteddrive-information.

The BMW ConnectedDrive Hotline is available on:
+44 (0) 800 561 0555 from Monday to Sunday, 9:00 – 18:00.
