	pressure, when pressure in all tyres is correct.									
2VH		0	0	0						£995.00
	A variable-ratio four-wheel steering system that delivers significantly greater manoeuvrability at low and parking speeds with enhanced stability and passenger comfort at higher speeds. Speed-dependent adaptation of the steering angle of front and rear wheels combined with reduced effort applied to steering wheel for more agile handling that is more comfortable when parking									
2VR	Adaptive 2-axle air suspension	0	0	0	С				) ()	£1,670.00
	With automatic self-levelling suspension, manual raising by 20mm up to 21mph, automatic lowering by 10mm from 74mph.									
2VT	Executive Drive	-	-	0	С		0 0			£3,340.00
	Ensures a reduction in the roll of the vehicle body when cornering at high speed or taking sudden evasive action thanks to conventional anti-roll bars at the front and rear axle. Allows optimal and safe driving behaviour with excellent suspension comfort. Due to active roll stabilisation there is a reduction in roll when cornering, an increase in driving safety and comfort, high agility and stability in all driving conditions and light-footed sporty handling.									
	Includes 2VR Only with 2VH									
Safety a 3AG	nd Technology Reversing Assist camera		•				•			Std
	Activated automatically with PDC when reverse gear is engaged. Shows an image in the Control Display of the area behind the car.

552	BMW Icon adaptive LED headlights	•	•	•	•		•		•	Std
	Full 'white' LED headlights for both low and high beam, offering a greater resemblance to daylight. Includes automatic height adjustment, 'white' LED BMW Icon light design used for Daytime Driving Lights and LED front indicators. Featuring Adaptive Headlights, which improve visibility by following the steering angle of the front wheels, providing better illumination of the road ahead through corners. Adaptive Headlights not active when car is reversing or when car is stationary and steering turned to offside, to avoid dazzling oncoming traffic. Additional LED cornering lights improve vision at close range, operated with activation of the direction indicator or with corresponding steering wheel input at a speed up to approximately 35mph.									
	BMW Selective Beam functionality is supported in combination with High-beam Assistant (option 5AC) to provide an intelligent anti-glare system that provides autonomous control of the left and right headlights and high-beam distribution to optimise illumination of the road ahead without glaring other road users. BMW Selective Beam can vary high and low beam simultaneously to direct the light distribution around other vehicles according to the traffic situation, ensuring unparalleled levels of illumination. For further information please refer to the Technology Hub on LaunchPad.									
5A1	LED fog lights	•	-	•	-		• -		-	Std
	Integrated into the bumper system, with LEDs aligned horizontally.									
5AC	High-beam Assistant Automatic switching on and off of the high-beam headlights depending on the traffic situation, controlled via a sensor on the front side of the interior mirror.								•	Std
5AL	Automatic switching on and off of the high-beam headlights depending on the traffic situation, controlled via a sensor on the front side of the interior mirror.           Dynamic Safety	0	0	0	С		0			£280.00
	Safety package for initiating protective measures for the occupants if an accident situation is imminent. Includes: seat belt tensioning, automatic closing of windows until there is just a small gap, closure of sliding sunroof (if fitted), automatic braking after impact.									
5AS	Driving Assistant	0	0	0	С					£895.00
	A range of camera-based driver assistance systems that enhance safety and reduce the risk of potential collisions, at both high and low speeds. Systems included in this option are: - Lane Departure Warning for detecting lane markings at speeds above approximately 45mph. If the car deviates from the lane of travel without the use of indicators, the steering wheel vibrates as an alert. If the indicators are used to signal, the system recognises this as an intentional lane change and the steering wheel will not vibrate.									
	- Lane Change Warning permanently monitors the zones to each side of the vehicle. Detects vehicles in the 'blind spot' when above approx. 6 mph for desired lane change (indicator is activated or stalk is held in 'short on' position), warning via the steering wheel (vibration) and flashing symbol in the exterior mirror.									
	- Approach control warning and person warning with city braking function: gives warning and brakes within a speed range from approx. 6 mph to 37mph (for persons) and up to 50 mph (for vehicles). If an accident cannot be avoided completely, the city braking function helps to reduce the impact speed and hence, the severity of the accident. Approach control warning also warns of potential collision with a vehicle ahead at higher speeds, with preconditioning of the brakes for faster brake response and shorter braking distances. Operation by means of a button in the control unit for driver assistance systems.									
	- Crossing-traffic warning rear: supports the driver, for example, when reversing out of parking spaces and warns of potential collisions with intersecting traffic in situations where it is difficult to see everything around them. In combination with option code 3AG 'Rear view camera', the Crossing-traffic warning rear is extended by an additional real-image display.									
	- Prevention of rear collision: detects the threat of rear collisions via rear sensors and warns the traffic behind via the hazard warning lights (flashing in double frequency). Preventive measures will also be taken in unavoidable accident situations (e.g. belt tensioning, closing windows, etc.).									
	- Speed Limit Info and no-overtaking indicator									
	Please note: the system scopes contained in the option code only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.

The function can be overridden by the driver at any time.         - Lane keeping assistant with active side collision protection: assists the driver in keeping in lane and actively preventing potential side collisions by means of confortable corrective steering interventions in the speed range of 43 mph to 130 mph. (Restricted function in the speed range of 18 mph to 43 mph; warning via a single steering impuse in the opposite direction).         - Crossing traffic warning front: supports the driver when entering intersecting traffic and warns of potential collisions in traffic situations where It is difficult for them to see everything around them.         - Evasion aid: Assistance in critical approach situations when evading is still possible. At the request of the driver, steering assistant the driver when entering in priority situations and at stop signs. Additional steering warning of crossing traffic in a speed range of up to 52 mph (visual advance warning).         - Wrong-way warning: detection of "no entry" signs with visual and acoustic driver warning.         Please note: the system scopes contained in the option code only provide assistance within defined system limits. It remains the			0	<b>64</b>	0.	<b>63</b>		0.00	£2,250.00
5DF	Not with 5DF         Active cruise control with Stop&Go function         Camera- and radar-based driver assistance system which enables the vehicle's speed to be set in the range from approx. 18 mph to 130 mph and the speed-dependent distance to be maintained from the vehicle ahead can then be set in any of 4 selectable stages.         - Approach control warning warns of collision with a vehicle ahead at approximately 9mph or higher speeds, preconditioning the brakes for faster response and shorter braking distances.         - Includes emergency braking if there is an acute risk of collision.         - The stop & go function makes it possible to automatically maintain queue speed and distance in stop-and-go traffic and in traffic jams, right down to complete standstill.         - Speed Limit info and no-overtaking indicator.         - Speed Limit Assist: predictive detection of speed limits.		0	0	0	0	0	0	0	£965.00
5DM	Included in 5AT         Parking Assistant         Camera and ultrasound-based parking assistance system consisting of:         - Parking assistant: calculation of the optimum line to be followed for parking and automatic parking (steering, acceleration, braking and gear selection in the case of vehicles with automatic transmission) into parallel and lateral parking spaces. Parking space size measurement via ultrasonic sensors. Activation in selector lever position "R" or manually via button at speeds below 21 mph. The parking space search is shown on the Control Display. The function can be overridden by the driver at any time.         - Including Active Park Distance Control for braking assistance when reversing into a parking space (up to 3 mph). Including lateral parking aid: the system takes note of obstructions when driving past and takes these into account when parking (additionally: display of lateral obstructions in the Control Display).         Please note: the system scopes contained in the option code only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.		0	0	0	0	0	0	0	£195.00
5DN	Parking Assistant Plus         Camera and ultrasound-based parking assistance system consisting of:         - 5DM - Parking Assistant         - Surround View: offers the camera-based functions Top View, Panorama View and 3D View. Cameras at the front and in the exterior mirrors provide a 360° view around the vehicle. Panorama View front and rear makes it more safe to approach junctions and exits. It shows the situation to the right and left of the vehicle on the Control Display. Automatic activation is possible via the storage of personal locations.         - Remote 3D View: transfer of static images from 3D View to mobile terminal devices via the mobile phone network (only in combination with 6AP 'Remote Services').         Please note: the system scopes contained in the option code only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.				0		0		0	£695.00
5DV	Remote Control Parking For use in parking spaces where the vehicle is difficult for the driver and occupants to access. The vehicle can be automatically parked into and out of lateral parking spaces by activating the function "Remote Control Parking" on the BMW display key. The driver is outside the vehicle during the parking process. The position of the vehicle to the longitudinal axis of the parking space can deviate very slightly. Activation of the function is possible up to max. 5 % downhill / uphill gradients.	0	0	0	0	0	0	0	0	£395.00
610	Only with 322, 3DS, 5DN         Head-Up Display         Full-colour projection of information relevant to driving and specific to the situation onto the windscreen, with automatic brightness control, 3D graphics for junction view (realistic display of turns and junctions). User-friendly adjustment possible via the iDrive Controller. Large-scale display with 7" x 3" opening angle and a throw of approx 2.3m.         Display of:         - Navigation information in different display modes         - Speed         - Country-specific display of traffic signs in the relevant colours (subject to optional equipment)         - Information from BMW Night Vision and driver assistance systems (subject to optional equipment)         - Statiational display of Entertainment and communication lists (two-line list display)         - Display of BMW EfficientDynamics functional contents         - Check control messages with 3D graphics			0	0	0			0	£995.00
6UK	Night Vision with pedestrian recognition         An infra-red night vision system that enables pedestrians to be seen more readily in poor-visibility situations. Images of objects identified as pedestrians are highlighted by a yellow warning symbol on the control display and optional Head-up Display. In critical situations an acute-approach warning with red warning symbol will appear and an acoustic warning will sound, including a warning without an image and preconditioning of the brakes.         Including Dynamic Light Spot: Illumination of the endangered objects through the main headlights.         SE models only with 502	0	0	0	0	0	0	0	0	£1,595.00

A manual or automatic call can be deployed from the vehicle to establish a voice call connection to the UK based emergency services via a BMW call centre and sends additional data including the vehicle's current location and other rescue relevant data (e.g. severity of the accident). All calls are sent via the built-in vehicle telematics system (PSIM) and require no pairing of a mobile phone.								Std
	Available and active for the lifetime of the vehicle.								
6AE	BMW TeleServices Offers a range of telematic services that provide support and notification of the technical condition of the vehicle. Services include Automatic Service Call (ASC), TeleServices Breakdown Call (B-call), TeleServices Report (TSR), TeleServices Battery Guard (TSBG) and Teleservices Update (TSU). For specific information on these services please contact your Aftersales Service centre.		•	•	•				Std
6AK	Available and active for the lifetime of the vehicle. BMW Online Services	•	•	•	•	•	•	• •	Std
	Access to a WAP based BMW Online portal to view a wide range of general and location-based information services. These include the latest news and sports headlines, a five-day weather forecast and live POI searches via Online Search. The in-vehicle BMW Application store offers a choice of apps that can be managed individually to build a personalised portfolio including Wiki Local, BMW Routes and Qype. Further personalised content includes My News and Online Office for access to a personal email account in the vehicle (these require configuration in the ConnectedDrive portal). Also includes BMW Apps interface in combination with option 609 – BMW Navigation system Professional. BMW Apps enables Apple device applications to be seamlessly integrated into the vehicle Control Display including Twitter, Web Radio and an ECO PRO Analyser tool. Note: a specific snap-in-adaptor is required to use BMW Apps; please check EPC (Electronic Parts Catalogue) for more information. BMW Online Services are initially available for three years and can then be extended or renewed. BMW Apps is available and active for the lifetime of the vehicle and requires the free BMW Connected app to be installed on the Apple device.								
6AM	Real Time Traffic Information	•		•	•	•		• •	Std
	RTTI provides enhanced traffic data over TMC by combining information from a significant number of sources and broadcasting over the GSM network via the embedded telematic system (PSIM), to accurately present the current traffic situation in real time. Traffic flows are displayed on the Navigation map using a colour coding scheme and the data is automatically updated every three minutes. Intelligent route guidance actively monitors time efficient alternatives and recommends for or against potential detours. Real Time Traffic Information is initially available for three years and can then be extended or renewed. Concierge service A telematic call service that provides access to the BMW Customer Information Centre 24 hours a day, 7 days a week. A trained team of agents can discuss a variety of enquiries and provide location-	0	0	0	0	0	0	0 0	£200.00
	based information. POI information, addresses and telephone numbers can be sent to the vehicle which can be transferred into the Navigation system. All calls and data transfer is via the embedded telematic system (PSIM) and do not require a Bluetooth paired device.								
	Concierge service is initially available for three years and can then be extended or renewed.				L

	Smartphone holder within the centre console featuring inductive charging for compatible mobile telephones (using QI wireless cahrging format) and connection to the vehicle's external aerial. Includes LED charge level indicator and forgotten mobile phone warning.									
	To ensure the Smartphone charges function and connects to the external aerial, the Smartphone must be positioned with its back flat to the charging surface. For Smartphones without an inductive charging function, special charging cases are available to purchase via BMW Parts and Accessories for selected devices.									
	Extended functionality may depend on the features of the Bluetooth / USB device in use. For confirmation, please check the Bluetooth Compatibility Checker on www.bmw.co.uk.									
6U8	Only with 6WD BMW Gesture Control	0	0	0	0	0	0	0	0	£160.00
	Using 3D sensors above the front centre console, specifically defined functions of the control display can be controlled using specific hand gestures.									
	<ul> <li>Use of simple hand gestures to interact with the infotainment system (e.g. swiping, pointing, turning, pushing).</li> <li>Functions that can be operated by gestures include volume control, accepting and rejecting an incoming telephone call, closing externally triggered popups (e.g. traffic news), confirmation of Check-Control messages, triggering of a personally configured function and Surround View.</li> <li>Permanently available gestures for direct interaction (e.g. volume)</li> <li>Context-specific gestures as a reaction (e.g. rejecting an incoming telephone call)</li> <li>Operating aid through the display of currently available gesture interactions</li> </ul>									
	Note: - No separate activation of gesture control necessary (e.g. by pressing a button) - Direct system feedback to gesture interaction (acoustic and visual)									
6WD	WiFi hotspot preparation	0	0	0	0	0	0	0	0	£0.00
	Enables connection of mobile devices to the internet via the SIM card installed in the vehicle. Depending on the local LTE availability, up to 10 devices can surf the internet with max. 100 Mbit/s. Its use is subject to cost, data plans can be purchased via the mobile network operator when connected to the vehicle.									
	Only with 6NW
