Steering and Chassis							
2NH	M Sport braking system	-	●	-	●	●	Std
	Blue painted brake calipers with 'M' designation						
2T4	M Sport differential	○	○	○	○	●	Only with: 2VW or 3E3
	The rear axle differential lock, which is infinitely adjustable depending on the driving situation, prevents a single rear wheel from slipping and hence provides optimal traction in all driving situations						
2VF	Adaptive M suspension	-	-	-	-	●	Std
	Sport suspension settings with tuned adaptive dampers; adjustable via driving modes						
2VH	Integral Active Steering	○	○	○	○	○	£995.00
	Speed-dependent adaptation of the steering angle of front and rear wheels combined with reduced effort applied to steering wheel for more agile handling that is more comfortable when parking. Combined steering of the rear axle. M50d - Only with 2VR, 2VW or 4UB						
2VR	Adaptive 2-axe air suspension	●	●	●	●	○	£1,150.00
	Automatic self-levelling suspension: - Manual raising up to 30 km/h by 40 mm (30 km/h to 55 km/h by 20 mm) - Automatic lowering above approx. 140 km/h by 10 mm (above approx. 200 km/h by 20 mm) - Entire height adjustment travel of 80mm selectable on five levels via toggle switch on the centre console - Control of height level from outside the vehicle via the 3DS BMW Display Key - Vehicle can be lowered (for loading) via switch in bottom of tailgate M50d only with 2VH						
2VW	Adaptive M Suspension Professional	-	-	-	-	○	£3,195.00
	Includes: - Anti roll stabilisation - 2VH Integral Active Steering Not available with 2VR and 4UB Price includes 2VH						
Safety and Technology							
3DS	BMW Display key	○	○	○	○	○	Only with: Z0J
	Key size: approx. 90 mm x 55 mm x 15 mm Functional scopes: - LCD colour display incl. touch control panel - display option of vehicle status information (e.g. range, service information, vehicle locking, etc.) - control of the ventilation inside the vehicle - in combination with option code 2VR 'Adaptive 2-axe air suspension' control of vehicle height from outside (from 12/18 production) - wireless charging of the key - additional USB charger cable - range of function: 300m Notes: 1 BMW display key and 1 standard vehicle keys are included						
322	Comfort access with smart opener	○	○	○	○	○	Only with: ZGM or ZGX
	Access to the vehicle without removing key from pockets or bag. Sensors detect proximity of keys to the vehicle and allow doors to be unlocked by holding the door handle closest to the key. Locking by touching ribbed section of door handle when key is not inside the car. Including touch free opening and closing of the tailgate. Access can also be set up within BMW Operating System 7.0 to allow automatic locking and unlocking upon driver approach to the vehicle, with key on their person. An acoustic sound will identify when the vehicle unlocks upon approach and locks upon exit. Includes touch free opening and closing of the tailgate. Includes BMW Digital Key technology allowing locking and unlocking of the driver's door and starting of the engine via smartphone, removing the need for a conventional car key. Smartphone needs to be held within 5cm of door handle to lock and unlock, and placed in Wireless Charging smartphone tray to start and drive vehicle. The BMW Digital Key will initially be available for selected Android platform NFC-capable smartphones at launch. One "owner" digital key is provided from factory with a service duration of 1 year. In addition, additional BMW Digital Keys can be purchased via the ConnectedDrive Store and shared with up to five other people with applicable smartphones. Additional keys are purchased in packs of five and have a 1 year service duration from purchase. In addition, from December 2018 production a high quality NFC "Key Card" (credit card sized) is included to enable keyless access to the vehicle for users without a compatible Smartphone. Just like the Digital Key on the smartphone, the Key Card offers the functionalities locking/unlocking and starting the engine. All customers without a capable smartphone (e.g. Apple iPhone) will thereby get a substitute solution.						
552	Adaptive LED headlights	○	○	○	○	●	£700.00 Std
	Expanded lighting functions for improved visibility: - Adaptive headlights - Anti-glare selective high beam - Light colour close to that of ordinary daylight - Optimum, homogeneous illumination of the carriageway Includes 5AC						
5AC	High-beam Assistant	○	○	○	○	●	Only with Z0C
	Automatic switching on and off of the high-beam headlights depending on the traffic situation. Control via sensor on the front side of the interior mirror. Included with 552 and 5AZ						
5A1	LED fog lights	●	●	●	●	●	Std
	Integrated into the bumper system, with LED lights in horizontal arrangement

5AU	Driving Assistant Professional Camera/radar-based driver assistance system comprising of the following functions: - Steering and lane control assistant: Supports the driver in keeping to the middle of the lane by means of corrective steering interventions in the speed range of 0–210 km/h. This results in relaxed vehicle operation and relieves the driver of monotonous tasks (particularly in heavy traffic). In narrow passages on motorways (e.g. road works), the steering assistance ensures a proper distance to vehicles at the sides, roadside structures, and lane markings. The driver is requested to keep both hands on the steering wheel during vehicle guidance to ensure that they are paying attention and able to react if necessary. If this is not complied with, the control is deactivated after a few seconds, and the driver is requested to take full control of the steering. - Active Cruise Control and automatic Speed Limit Assist: Consists of cruise control with approach control, speed limit info, no-overtaking indicator, manual and automatic speed limit assist, front collision warning and brake intervention. - Lane keeping assistant with active side collision protection: Assists the driver in keeping in lane and actively preventing potential side collisions by means of corrective steering interventions in the speed range of 70 km/h to 210 km/h (Lane Change Warning and Lane Departure Warning, side collision warning). A visual warning is displayed in addition to the active steering intervention, and the steering wheel vibrates. Applies to Lane Change Warning and Lane Departure Warning from approx. 20 km/h. - Crossing traffic warning front: Warns of crossing traffic while leaving/entering a parking space as well as while turning into crossing traffic in situations with restricted visibility. Active at up to 7 km/h. Depending on vehicle configuration, information is shown in the camera display (panorama/Surround View) or in the PDC display. - Evasion aid: Assists in critical approach situations when evading is still possible. Evasion aid is available in the speed range of 30-160 km/h. Reacts to vehicles ahead and pedestrians. - Crossroads warning with city braking function: Braking assistance with visual/acoustic warning incl. active brake intervention in the event of a potential collision with intersecting traffic. Comprises the partial functions: warning in priority situations and at stop signs. Active at up to 85 km/h. - Crossing traffic-warning rear - warns of potential collision with intersecting traffic when reversing out of parking spaces. Rear collision prevention – Detects the potential of rear collisions via rear sensors and warns traffic behind the vehicle by activating hazard lights. - Wrong-way warning: Detects "no entry" signs on motorways, at roundabouts and at one-way roads. Issues a visual/acoustic driver warning.	○	○	○	○	○	£2,295.00
5AZ	BMW Laserlights Unique 'X' design with blue 'X' signature on both sides (illuminated), supports the feeling of width. Functionality - Accent lighting with turn indicators - 3 lighting levels: LED low-beam headlights, LED high-beam headlights with laser module (above 60 km/h) - LED position light, LED daytime driving light in 'L'-shape, LED direction indicator, LED cornering light - Adaptive headlights - Incl. BMW Selective Beam, the dazzle-free high-beam assistant from BMW Technical content - LED for high amount of light and wide illumination - Laser high-beam module doubles the light intensity compared to Bi-LED (up to a range of 500 m) - Light emitted from blue high-performance laser diodes is concentrated to white light with high intensity on a small phosphor plate) Including specific design elements and exclusive designation 'BMW Laserlight' Includes 5AC	○	○	○	○	○	Only with Z0C
5DM	Parking Assistant Camera and ultrasound-based assistance system consisting of parking assistant, reversing assistant, lateral parking aid and rear view camera. - Parking assistant: The parking assistant facilitates parking into parallel parking spaces as well as leaving parking spaces parallel to the road. For this purpose, the system measures potential parking spaces while driving by at speeds below approx. 35 km/h even without prior activation. After displaying the information in the central display and activation by the driver, the parking assistant completely takes over vehicle control by steering, braking and shifting gears. Activation when reverse gear is engaged or transmission position "R" is selected or manually by button at speeds below 35 km/h. The function can be overridden by the driver at any time. - Reversing Assistant: While driving forward, the function saves the last 50 m of an entry path taken by the driver themselves at a speed of up to 35km/h in order to follow this path while reversing upon request by the driver. This relieves the driver of steering tasks so they can focus entirely on monitoring the surroundings of the vehicle. The driver remains responsible for longitudinal control via accelerator and brakes (speed below 10 km/h) and for monitoring the surroundings of the vehicle to avoid collisions with objects in the vicinity. While reversing, the function assists the driver with longitudinal control by reducing driving speed as appropriate. - Lateral parking aid: Assists in damage minimisation while manoeuvring. Based on information from the Park Distance Control, the system memorises obstacles while driving past and shows their distance to the vehicle sides in the Control Display. - Rear view camera: Supports the driver when reversing into a parking space and manoeuvring at speeds below 20 km/h by showing the area in the rear of the vehicle in the control display. The function provides better visibility while reversing. Interactive tracer lines show the vehicle's trajectory. In combination with Park Distance Control, distance information is displayed inside the camera image. A zoom function for the trailer tow hitch facilitates backing up to couple a trailer. The camera is activated by engaging reverse gear. Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.	●	●	●	●	●	Std
5DN	Parking Assistant Plus Camera and ultrasound-based assistance system consisting of Surround View system and Remote 3D View as well as the functions of option code '5DM - Parking Assistant'. - Surround View system: Offers the camera-based functions Top View, Panorama View and 3D View. Cameras at the front and rear and in the exterior mirrors provide a 360° view around the vehicle including a three-dimensional visualisation. Panorama View front and rear makes it more safe to approach intersections and exits. In combination with radar-based monitoring of the area in front of the vehicle, the system warns of crossing traffic. An additional view on the Control Display shows the situation to the right and left of the vehicle. The displayed positioning lines facilitate positioning the vehicle at the stop line. The function is activated by the Panorama View button. Automatic activation is possible via the storage of personal locations. The view towards the front or rear depends on which gear is engaged. - Remote View 3D: Transfer of static images from 3D View to mobile terminal devices via the mobile phone network (only in combination with option code 6AP 'Remote Services'). In surround view, the vehicle and its surroundings can be viewed from any perspective. Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.	○	○	○	○	○	Only with: Z0J
610	Head-up Display Full-colour projection onto the windscreen of information related to driving and specific to the situation, with automatic brightness control, 3D graphics for junction view (realistic display of turns and intersections). User-friendly adjustment possible by means of iDrive Controller. Large-scale display with 7° x 3.5° opening angle and a throw of approx. 2.5 m. Display of: - Navigation information in different display modes - Speed - Country-specific display of traffic signs in the relevant colours (e.g. no-overtaking indicator, Speed Limit Info) - Warning information from driver assistance systems - Situational display of entertainment and communication lists - Display of Driving Experience Control modes (via coloured highlighting) - Display of BMW EfficientDynamics functional contents - Check control messages with 3D graphics Display of contents depending on optional equipment ordered.	○	○	○	○	○	Only with: Z0J

6AE	Teleservices Offers a range of telematic services that provide support and notification of the technical condition of the vehicle. Services include Automatic Service Call (ASC), TeleServices Breakdown Call (B-call), TeleServices Report (TSR), TeleServices Battery Guard (TSBG) and Teleservices Update (TSU). For specific information on these services please contact your Aftersales Service centre. Available and active for the lifetime of the vehicle.	●	●	●	●	●	Std
6AF	Legal Emergency Call Establishment of connection to the responsible rescue centre without involvement of call centre agents. Immediate transmission of the vehicle location and further relevant data. Please note the customer will be served in the language of the country that the vehicle head-unit is registered in regardless of where the call was made.	●	●	●	●	●	Std
6AK	BMW Online Services BMW Online Services include the following services and are initially standard for three years subscription from production and can then be extended or renewed via a customer's ConnectedDrive portal and the ConnectedDrive store. BMW Vehicle Apps. Formerly known as BMW Online. Access to a WAP based online services to view a wide range of general and location-based information. Included Apps are News, Weather and Country Information. Online-based content like News can be read out loud to minimize distraction while driving and offer the maximum in safety and comfort. The weather app shows the weather forecast for the upcoming 4 days. Country information contains all the relevant information when entering a different country with your BMW, for example information on tolls. Remote Software Upgrade. With Remote Software Upgrade your BMW stays up-to-date and is future-proof. The Upgrades are downloaded via a smartphone with the Connected app and ideally a Wi-Fi connection (quicker and therefore recommended) or over the air directly into the car and provide security updates and functionality upgrades. The customers are always informed about the content of every Remote Software Upgrade as there are Release Notes displayed in the car and in the Connected App similar to an iOS upgrade. BMW Connected+. An update of the personalization function in the vehicle and display of smartphone content on the Control Display in the BMW. Including: Send my Routes to Car, Share Live Trip Status, Navigate Door-to-Door and seamless link of My Destinations between you Connected App and vehicle. USB and Over the Air map updates. Manual and Automatic updates of the navigation map data either via USB or over-the-air. A USB map update can be completed via the BMW ConnectedDrive portal to integrate the latest European wide map data, or as soon as a new navigation map version is available for the country that your vehicle is registered in, the update is transferred via the integrated SIM card directly into the vehicle's navigation system, completely over-the-air. During the update process, the navigation system remains fully functional. Always have the most up-to-date navigation map data. Over-the-air updates up to 4-times annually. Updates take place automatically as soon as the latest version of map data is available. Intelligent Voice Control. Off-board voice processing offers a functional extension of the intelligent voice assistant through server-based processing of speech input. Examples of the features include online-based points of interest for the navigation (e.g. Italian restaurant in the vicinity), the dictation function for messages and an improvement in the recognition of natural speech input. Benefits at a glance: Flexible input of addresses and points of interest, More up-to-date data for the speech-based search for addresses and points of interest, Improvement in voice recognition for the input of addresses and points of interest. Flexible dictation of text messages and e-mail (Smartphone dependant).	●	●	●	●	●	Std
6C4	Connected Package Professional Included Services are initially standard for three years subscription from production (unless stated) and can then be extended or renewed via a customer's ConnectedDrive portal and the ConnectedDrive store. Remote Services. Open/lock doors, display of vehicle location on the map in vehicle finder, flash headlights. Remote 3D View*. Allows real time image to be taken of area surrounding vehicle environment. Access via smartphone app and can be retrieved on the smartphone as a 3D representation. Concierge Services. Direct access to UK based call centre, 24 hours a day, 365 days per year. No Smartphone required within vehicle, calls made using in-built 4G SIM card. Access to telephone and industry directories, points of interest, opening times of cultural facilities, flight information, addresses of restaurants, hotels, emergency pharmacies, cash machines, golf courses etc. Navigation data can be transferred directly to the driver's navigation system, and/or sent as a message to the vehicles control display with additional relevant information when required, e.g. telephone numbers, email addresses. Real-Time Traffic Information (RTTI). Displays real-time traffic information on motorways, roads and urban streets for the driver's current route and recommends potential diversions. Exact display of the traffic situation in real time, with updates being received every 3 minutes. Greater comfort and safety thanks to precise warnings of congestion and hazards (including Heavy Rain, Fog, Slippery Roads). Inclusion of traffic situation on recommended diversions. Connected Navigation. BMW Connected Navigation offers customers a unrivalled navigation experience on their off board touchpoints as well as a unique in car experience. Get proactive suggestions, based on your behaviour and share locations from other apps including Google and Apple maps. Parking Place Assistant to give intelligent parking route guidance close to your final destination based on the current parking situation, offering car parks close to destination or on-street parking availability. On-Street Parking Information**, shows probability of finding a parking spot. Manage your favourite locations via BMW Connected app. Apple CarPlay (1 year Subscription). Apple CarPlay® Preparation enables an iPhone® to be used wirelessly, conveniently and safely via the user interface in the vehicle. Smartphone contents and functions such as music, iMessages/SMS, telephony, SIRI and selected third-party apps can thus be displayed and operated in the customary manner via the user interface in the vehicle. Subscription for Apple CarPlay valid for 1 year from production, can be extended thereafter on 1 year, 3 years or lifetime subscriptions. Connected Teaser Package. Gives a 3 month trial period of the following services; Connected Music and In-car productivity (Microsoft Office 365). *Available on vehicles fitted with 5DN Parking Assistant Plus. **Currently available in London, Birmingham, Glasgow, Leeds, Bristol, Liverpool, Sheffield, Manchester, Edinburgh, Cardiff and Belfast.	●	●	●	●	●	Std
