	axles and is in constant operation when the car is on the move. Driving comfort is further increased by integrating additional information from the navigation system, driving style analysis and camera projection data.							
	Only with 2VH on M Performance models							
Cafabra								
5AQ	d Technology Active Guard Plus	•		•	•	•		Sto
	Includes the manual Speed Limit Device (SLD) features including Speed Limit Info with no passing info and preview (only with nav), the Lane Departure Warning with steering impulse, and the Front Collision Warning							
	with brake intervention.							
	- Speed Limit Assist combines the Speed Limit Info with the Speed Limiter incl. no passing info and preview of speed limits. Thus, the allowed speed limit is transferred after manual confirmation in the Speed Limiter.							
	- Lane departure warning with steering impulse, detects lane markings from about 70 km / h, warns via steering wheel vibration from accidentally leaving the lane and steers the vehicle back into the lane. Suppressed with set turn signal or tipp turn signal (wanted lane change). Display in the instrument cluster.							
	- Front collision warning with brake intervention includes the approach control warning and person warning with city brake intervention. The system detects and reacts automatically with a braking intervention on							
	vehicles (up to 210km/h) as well as cyclists and pedestrians (up to 65km/h). Above these limits, cyclists and pedestrians (up to 85km/h) are warned and prepared for braking by the driver. In addition, the system reacts on vehicles with a brake pressure up to 250km/h. The automatic braking can reach a maximum delay of 9m / s² (full deceleration).							
	Please note: The system volumes included in the optional equipment only support within defined system limits. Responsibility and reaction to the real traffic situation remain with the respective driver.							
302	Alarm system	•		•			,——	Sto
	For monitoring the vehicle's doors, engine-compartment lid and tailgate. System includes interior movement sensor, tilt sensor and siren with emergency power supply.							
3DS	BMW display key	•		•			,	Sto
	Key size: approx. 90 mm x 55 mm x 15 mm							
	Functional scopes:							
	- LCD colour display incl. touch control panel - display option of vehicle status information (e.g. range, service information, vehicle locking, etc.)							
	- control of the ventilation inside the vehicle - in combination with option code 2VR 'Adaptive 2-axle air suspension' control of vehicle height from outside (from 12/18 production)							
	- wireless charging of the key - additional USB charger cable							
	- range of function: 300m							
	Notes: 1 BMW display key and 1 standard vehicle key included.							
322	Comfort access system	•		•	•	•		Sto
	Access to the vehicle without removing key from pockets or bag. Sensors detect proximity of keys to the vehicle and allow doors to be unlocked by holding the door handle closest to the key. Locking by touching							
	Access to the vehicle without removing key from pockets or bag. Sensors detect proximity of keys to the vehicle and allow doors to be unlocked by holding the door handle closest to the key. Locking by touching inibided section of door handle when key is not inside the car. Welcome light setting from 2.5m distance of vehicle. System allows for touch-free opening and closing of the tailgate.							
	Also includes Digital Key technology allowing locking and unlocking of the driver's door via smartphone, removing the need for a conventional car key. Smartphone needs to be held within 5cm of door handle to lock and unlock, and placed in Wireless Charging smartphone tray to start and drive vehicle. The BIMW Digital Key will initially be available for selected Android platform NFC-capable smartphones at launch - a fright quality							
	key card is included to enable keyless access to the vehicle for users without a compatible Smartphore. BMW Digital Keys can be shared with up to five other people with applicable smartphones. BMW Digital keys							
323	are available via the ConnectedDrive store with a service duration of 1 year from purchase.  Soft-Close function for doors	•		•	•			Sto
323	Enables the doors to be closed conveniently and safety without much effort or noise nuisance in quiet surroundings. If a door is inadvertently left partly open it is automatically pulled to the fully closed position and	"		1		<b>ו</b>		Sto
	lacked							
552	Adaptive LED headlights	•	•	•	•	•		Sto
	Expanded lighting functions for improved visibility:							
	- Adaptive headlights - Anti-dare selective high beam							
	- Nuirglar securioning todan - Light colour close to that of ordinary daylight - Optimum, homopeneous illumination of the carriageway							
5AC	High beam assist				•			Sto
0,10	Automatic switching on and off of the high-beam headlights depending on the traffic situation. Control via sensor on the front side of the interior mirror.							Ju.

	Surror (if present) and automatic braking after crash.							
5AU	Driving assistant professional	С		0	0	0		Only with ZOJ
	Camera and radar-based driver assistant system including:							
	- Lane departure warning At speeds above 70 km/h, land departure warning defects lane makings and helps prevent inadvertent departure from the lane by transmitting vibrations via the steering wheel as a warning. This function is suppressed							
	if the indicators are active.							
	- Lane change warning permanently monitors the zones either side of the car and detects other vehicles in its blind spot from 20km/h. Includes haptic vibration warning via the steering wheel and flashing symbol in the exterior mirror.							
	- Approach control and person warning with city braking function							
	Includes front collision warning with brake intervention. Warning and braking within a speed range from approx. 5-85km/h for vehicles and 5-65km/h for people. If accident cannot be avoided, city braking helps reduce impact speed through braking intervention. Approach control warning also warns of potential collision with a vehicle ahead at speeds >85km/h, with pre-conditioning of brakes for faster brake response and shorter							
	braking distance.							
	- Crossroads warning with city braking function: Braking assistance with visual/acoustic warning incl. active brake intervention in the event of a potential collision with intersecting traffic. Comprises the partial functions: warning in priority situations and at stop signs.							
	Active at up to 85 km/h.							
	- Evasion aid: Assists in critical approach situations when evading is still possible. Evasion aid is available in the speed range of 30-160 km/h. Reacts to vehicles ahead and pedestrians.							
	- Wrong-way warning:							
	Detects "no entry" signs on motorways, at roundabouts and at one-way roads. Issues a visual/acoustic driver warning							
	- Steering and lane control assistant: Supports the driver in keeping to the middle of the lane by means of corrective steering interventions in the speed range of 0-210 km/h. This results in relaxed vehicle operation and relieves the driver of monotonous							
	tasks (particularly in heavy traffic). In narrow passages on motorways (e.g. road works), the steering assistance ensures a proper distance to vericles at the sides, roadside structures, and lane markings. The driver is requested to keep both hands on the steering wheel during vehicle guidance to ensure that they are paying attention and able to react if necessary. If this is not complied with, the control is deactivated after a few							
	seconds, and the driver is requested to take full control of the steering.							
	- Active Cruise Control and automatic Speed Limit Assist: Consists of cruise control with approach control, speed limit info, no-overtaking indicator, manual and automatic speed limit assist, front collision warning and brake intervention.							
	- Lane keeping assistant with active side collision protection: Assists the driver in keeping in lane and actively preventing potential side collisions by means of corrective steering interventions in the speed range of 70 km/h to 210 km/h (Lane Change Warning and Lane Departure							
	Warning, side collision warning). A visual warning is displayed in addition to the active steering intervention, and the steering wheel vibrates. Applies to Lane Change Warning and Lane Departure Warning from approx. 20 kmh.							
	Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.							
5AZ	Laserlights	С		) (	0 0	0 0	+	Only with Z00
	Functionality:							
	- 3 lighting levels: LED low-beam headlights, LED high-beam headlights with laser module (above 60 km/h) - LED position light, LED daytime driving light in 'L'-shape, LED direction indicator, LED comering light							

- incl. BMW Selective Beam, the dazzle-free high-beam assistant from BMW (note: refer to country-specific offer) - light setting in same blue colour as 'X' signature						-	
- light setting in same blue coccur as 'X' signature  Technical content:							
- LED for high amount of light and wide illumination - laser module for high-beam headlights doubles the light intensity compared to Bi-LED (up to 600 m - light emitted from blue high-performance laser diodes is concentrated to white light with high intensity on a	small						
phosphor plate)							
Including specific design elements and exclusive designation 'BMW Laserlight'							
5DN Parking Assistant Plus		•	•	•	•	•	Std
Camera and ultrasound-based assistance system consisting of parking assistant, reversing assistant, lateral parking aid and rear view camera.							
- Parking assistant: Facilitates parking into parallel and lateral parking spaces as well as leaving parking spaces parallel to the road. For this purpose, the system measures potential parking spaces while driving by at speeds below a	nnrox						
35 km/h even without paraller at lateral parally spaces as were as reaving parally spaces and addition to the driver, the parking assistant completely takes over whole control by steering, braking and shifting gears. Activation when reverse gear is engaged or transmission position "R" is selected or manually by button at speeds below 35 km/h. The function can be overridden by the driver at any time.							
- Reversing Assistant:							
While driving forward, the function saves the last 50 m of an entry path taken by the driver themselves at a speed of up to 35km/h in order to follow this path while reversing upon request by the driver. This reliev driver of steering tasks so they can focus entirely on monitoring the surroundings of the vehicle. The driver remains responsible for longitudinal control via accelerator and brakes (speed below 10 km/h) and for	ves the						
monitoring the surroundings of the vehicle to avoid collisions with objects in the vicinity.							
- Lateral parking aid: Assists in damage minimisation while manoeuvring. Based on information from the Park Distance Control, the system memorises obstacles while driving pest and shows their distance to the vehicle sides in the C	Santral						
Assists in darrage minimisation while malbetoning, based or information the Park Distance Control, the system neutronses distances while divining past and shows their distance to the vertice sites in the C Display.	ZOFILITO						
- Rear view camera:  Supports the driver when reversing into a parking space and manoeuvring at speeds below 20 km/h by showing the area in the rear of the vehicle in the control display. The function provides better visibility while							
reversing, Interactive tracer lines show the vehicle's trajectory. In combination with Park Distance Control, distance information is displayed inside the camera image.  A zoom function for the trailer tow hitch facilitates backing up to couple a trailer. The camera is activated by engaging reverse gear.							
- Surround View system:							
offers the camera-based functions Top View, Panorama View and 3D View. Cameras at the front and rear and in the exterior mirrors provide a 360° view around the vehicle including a three-dimensional visualisa Panorama View front and rear makes it safer to approach intersections and exits. In combination with radar-based monitoring of the area in front of the vehicle, the system warns of crossing traffic. An additional vi							
the Control Display shows the situation to the right and left of the vehicle. The displayed positioning lines facilitate positioning the vehicle at the stop line. The function is activated by the Panorama View button. Automatic activation is possible via the storage of personal locations. The view towards the front or rear depends on which gear is engaged.							
- Remote View 3D:							
r restruct view but the state of static images from 3D View to mobile terminal devices via the mobile phone network (only in combination with option code 6AP 'Remote Services'). In surround view, the vehicle and its surroundings of viewed from any perspective.	an be						
' Active Park Distance Control:							
Prevention or minimisation of damage while reversing into parking spaces with reaction to collision-critical obstacles towards the rear and sides. If the accelerator is depressed and an obstacle is detecte function brakes slightly to alert the driver (at speeds of up to 5 km/h). If the accelerator is not depressed and the distance to the obstacle is very short, the function applies the maximum possible braking							
up to a complete standstill to prevent a collision or minimise the resulting damage.							
Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.			0		0		
610 BMW Head-up Display	'		0	0	0	0	Only with Z0J
Full-colour projection onto the windscreen of information relevant to driving and specific to the situation, with automatic brightness control, 3D graphics for junction view (realistic display of turns and intersections	). User						
friendly adjustment possible by means of Drive Controller. 3D predictive view with points of reference for orientation, intultive display of comering situations, dynamic area usage, improved list displays	,, 000						
Large-scale display with 7° x 3.5° opening angle and a throw of approx. 2.3 m.							
Display of: - Navigation information in different display modes							
- Speed - Country-specific display of traffic signs in the relevant colours (e.g. no-overtaking indicator, Speed Limit Info)							
Warning information from driver assistance systems     Situational display of entertainment and communication lists (two-line list display)							
Extended display modes such as xView (SAV displays shown directly in the field of view, e.g. roll, gradient), sport displays     Obsplay of BMW Efficient/Dynamics functional contents							
Check control messages with 3D graphics     Additional setting "reduced display mode" for further personalisation options							
Note: - Display of contents depending on optional equipment ordered

	ConnectedDrive Services	•	•	•	•	•	
ı	ncluded Services are initially standard for three years subscription from production (unless stated) and can then be extended or renewed via a customer's ConnectedDrive portal and the ConnectedDrive store.						
F	BMW Vehicle Apps.  Comenty known as BMW Online. Access to a WAP based online services to view a wide range of general and location-based information. Included Apps are News, Weather and Country Information. Online-based content like News can be read out loud to minimize distraction while driving and offer the maximum in safety and comfort. The weather app shows the weather forecast for the upcoming 4 days. Country information contains all the relevant information when entering a different country with your BMW, for example information on tolls.						
,	BMW Connected+.^ An update of the personalization function in the vehicle and display of smartphone content on the Control Display in the BMW. Including; Send my Routes to Car, Share Live Trip Status, Navigate Door-to-Door and seamless link of My Destinations between you Connected App and vehicle.						
r a	USB and Over the Air map updates.  Manual and Automatic updates of the navigation map data either via USB or over-the-air. A USB map update can be completed via the BMW ConnectedDrive portal to integrate the latest European wide map data, or as soon as a new navigation map version is available for the country that your vehicle is registered in, the update is transferred via the integrated SIM card directly into the vehicle's navigation system, completely over-the-air. During the update process, the navigation system remains fully functional. Always have the most up-to-date navigation map data. Overthe-air updates up to 4-times annually. Updates take place automatically as soon as the latest version of map data is available.						
1	Intelligent Voice Control.  Off-board voice processing offers a functional extension of the intelligent voice assistant through server-based processing of speech input. Examples of the features include online-based points of interest for the navigation (e.g., Italian restaurant in the vicinity), the dictation function for messages and an improvement in the recognition of natural speech input. Benefits at a glance, Flexible input of addresses and points of interest, More up-to-date data for the speech-based search for addresses and points of interest, Improvement in voice recognition for the input of addresses and points of interest. Flexible dictation of text messages and e-mail Smartphone dependant).						
E A	BMW Intelligent Personal Assistant.  JANW drivers and passengers will be joined by an intelligent, digital character that responds to the prompt "Hey BMW". Communicate in a new and easy way with your car using the BMW Intelligent Personal Assistant. It knows you, learns your behaviours to get better every day and helps out whatever the situation. It can explain everything about your car and help you get better acquainted with your BMW. You can even assign your own personal activation word.						
	Remote Software Upgrade.  With Remote Software Upgrade your BMW stays up-to-date and is future-proof. The Upgrades are downloaded via a smartphone with the Connected app and ideally a Wi-Fi connection (quicker and therefore ecommended) or over the air directly into the car and provide security updates and functionality upgrades. The customers are always informed about the content of every Remote Software Upgrade as there are						
	Connected Package Professional  Included Services are initially standard for three years subscription from production (unless stated) and can then be extended or renewed via a customer's Connected/Drive portal and the Connected/Drive store.	•	•	•	•	•	
,	Apple CarPlay (1 year Subscription).  Apple CarPlay® Preparation enables an iPhone® to be used wirelessly, conveniently and safety via the user interface in the vehicle. Smartphone contents and functions such as music, iMessages/SMS, telephony, SiRI and selected thirt-capt apps can thus be displayed and operated in the customery manner via the user interface in the vehicle. Subscription for Apple CarPlay valid for 1 year from production, can be extended thereafter on 1 year, 3 years or lifetime subscriptions.						
1	Concierge Services.  Direct access to UK based call centre, 24 hours a day, 365 days per year. No Smartphone required within vehicle, calls made using in-built 4G SIM card. Access to telephone and industry directories, points of interest, popening times of cultural facilities, flight information, addresses of restaurants, hotels, emergency pharmacies, cash machines, golf courses etc. Navigation data can be transferred directly to the driver's navigation system, and/or sent as a message to the vehicles control display with additional relevant information when required, e.g. telephone numbers, email addresses.						
E	Connected Navigation.  BMW Connected Navigation offers customers a unrivalled navigation experience on their off board touchpoints as well as a unique in car experience. Get proactive suggestions, based on your behaviour and share ocations from other apps including Google and Apple maps.						
ŀ	Connected Parking.  Parking Place Assistant to give intelligent parking route guidance close to your final destination based on the current parking situation, offering car parks close to destination or on-street parking availability. On-Street Parking Information**, shows probability of finding a parking spot. Manage your favourite locations via BMW Connected app.						
8	Intelligent Functionalities.  Small Interior offers personalised, content based, and intelligent car related services in the vehicle and the Connected App. It automates vehicle functions to enhance the experience inside of the vehicle. Includes automate my habits service, where you can define your healing and cooling preferences. The vehicle then automatically adjusts the seat healing i ventilation settings to your liking. Also includes Weather Guard to warn the driver if the car is parked in adverse weather conditions via the BMW Connected App. This feature's deliverables is dependent on your vehicles capabilities and specification.						
	Real-Time Traffic Information (RTTI). Displays real-time traffic information on motoways, roads and urban streets for the driver's current route and recommends potential diversions. Exact display of the traffic situation in real time, with updates being eceived every 3 minutes. Greater confort and safety thanks to precise warnings of congestion and hazards (including Heavy Rain, Fog., Slippery Roads). Inclusion of traffic situation on recommended diversions.						
	Remote Services. Openflock doors, display of vehicle location on the map in vehicle finder, flash headlights.  Remote 3D View*. Allows real time image to be taken of area surrounding vehicle environment. Access via smartphone app and can be retrieved on the smartphone as a 3D representation.						
	Connected Teaser Package.						
	Gives a 3 month trial period of the following services.  In-Car Productivity (Microsoft Office 365)†:						
	Turn your BMW into a mobile office and use time in your car to be even more productive. With Microsoft Office 365 and your existing Microsoft Office 365 Business account, you can work while on the move. Ability to didate text and enter a recipient or select a name directly from your contacts lists. 	- Navigation function (navigation data is leaded into the navigation unit when the vehicle is delivered) with image of the current course of the road, arrow pointer, map display north-up, heading-up and perspective view, 3D landmarks, Micro City Models, free-test search for addresses and special destinations, destination guidance about a construction.  Head data are proceed a stemper institution with a final processor of the road, arrow pointer, map display north-up, heading-up and perspective view, 3D landmarks, Micro City Models, free-test search for addresses and special destinations, destination guidance and a final processor of the road, arrow pointer, map display north-up, heading-up and perspective view, 3D landmarks, Micro City Models, free-test search for addresses and special destinations, des						
	- Hard drive-supported system including up to 50 GB memory for audio files (34 GB music files and 16 GB Connected Music); quadruple tuner with diversity reception, RDS and TMC - 2 USB connections for charging smartphones and tablets and transferring data (e.g. media players), Bluetooth / WiFi interface for wireless connection of mobile terminal devices (e.g. Bluetooth audio streaming) and WiFi hotspot preparation (use of SIM card installed in the vehicle; fee-based registration required).						
	- 4G LTE Connectivity: hard-wired SIM card with 4G network in the vehicle for keeping the customer mobile; Intelligent Emergency Call, Teleservices, online services (e.g. weather, news) as well as BMW  ConnectedDrive services included in content.						
6U8	Gesture Control	•	•		•	•	Std
	Specifically defined functions can be controlled in the detection range above the front centre console using hand gestures:						
	- Use of simple hand gestures to interact with the infotairment system (e.g. swiping, pointing, turning, pushing). Functions that can be operated by gestures include volume control, accepting and rejecting an incoming telephone call, closing externally triggered pop-ups (e.g. traffic news), speech dialogue, confirmation of Check Control messages, triggering of a personally configured function and Surround View (360°).						
	- Destination guidance of the ravigation system can be continued and cancelled with gestures such as "pointing" or "swipring" Permanently available gestures for direct interaction (e.g., volume) - Context-specific gestures as a reaction (e.g., rejecting an incoming telephone call)						
	Context-specialic gestures as a reaction (e.g. rejecting an incoming telephone can)     Operating aid through the display of currently available gesture interactions						
6WD	WiFihotspot	•	•	•	•	•	Std
	Enables connection of mobile devices to the internet via the SIM card installed in the vehicle. Depending on the local LTE availability, up to 10 devices can surf the internet with max. 100 Mbit/s. Its use is subject to cost, data plans can be purchased via the mobile network operator when connected to the vehicle.
