322	Comfort Access with Smart Opener	0	0	0	0	0	0	Only w
	Access to the vehicle without removing key from pockets or bag. Sensors detect proximity of keys to the vehicle and allow doors to be unlocked by holding the door handle closest to the key. Locking by touching							ZGM or Z
	ribbed section of door handle when key is not inside the car. Including touch free opening and closing of the tailgate. Access can also be set up within BMW Operating System 7.0 to allow automatic looking and unlocking upon driver approach to the vehicle, with key on their person. An accustic sound will identify when the vehicle unlocking upon driver approach to the vehicle, with key on their person. An accustic sound will identify when the vehicle unlocks upon exit. Includes touch free opening and closing of the							
	allocks, growing approach to the vertice, with key of their person. An access, social will be may be the clinical state of the clini							
	Includes BMW Digital Key technology allowing locking and unlocking of the driver's door and staring of the engine via smartphone, removing the need for a conventional car key. Smartphone needs to be held within							
	Scm of door handle to lock and unlock, and placed in Wireless Changing smartphone tray to start and drive vehicle. The BMW Digital Key will initially be available for selected Android platform NFC-capable smartphones at learned. One "owner" digital key is now loaded from factory with a service duration of 1 year. In addition, additional BMIDIAI Keys can be purchased via the Connected/the Store and shared with up							
	to five other people with applicable smartphones. Additional keys are purchased in packs of five and have a 1 year service duration from purchase.							
	In addition, from December 2018 production a high quality NFC "Key Card" (credit card sized) is included to enable keyless access to the vehicle for users without a compatible Strantphone. Just like the Digital Key on the smartphone, the Key Card offers the functionalities locking unlocking and starting the engine. All customers without a capable smartphone (e.g. Apple iPhone) will thereby get a substitute solution.							
	M Sport and M Performance models now feature an NFC with specific M design.

5DM	Parking Assistant				1	•		Sta
	Camera and ultrasound-based assistance system consisting of parking assistant, active PDC, reversing assistant, lateral parking aid and rear view camera. - Parking assistant:							
	- Far for gassisant. Ta calitates parking into parallel parking spaces as well as leaving parking spaces parallel to the road. For this purpose, the system measures potential parking spaces while driving by at speeds below approx. 35 km²h even without prior activation. After displaying the information in the central display and activation by the driver, the parking assistant completely takes over vehicle control by steering, braking and shifting gears. Activation when reverse gear is engaged or transmission position "R" is selected or manually by button at speeds below 35 km²h. The function can be overridden by the driver at any time.							
	- Active Park Distance Controt: Prevention or minimisation of damage while reversing into parking spaces (at up to 5 km/h) with reaction to collision-critical obstacles towards the rear and sides. If the accelerator is depressed and an obstacle is detected, the fluction brakes slightly to alert the driver. If the accelerator is not depressed and the distance to the obstacle is very short, the function applies the maximum possible braking force up to a complete standstill to prevent a collision or minimise the resulting damage.							
	- Reversing Assistant: While driving forward, the function saves the last 50 m of an entry path taken by the driver themselves at a speed of up to 35km/h in order to follow this path while reversing upon request by the driver. This relieves the driver of steering tasks so they can focus entirely on monitoring the surroundings of the vehicle to avoid collisions with objects in the vicinity. While reversing, the function assists the driver with longitudinal control by reducing driving speed as appropriate.							
	- lateral parking aid: assists in damage minimisation while manoeuvring. Based on information from the Park Distance Control, the system memorises obstacles while driving past and shows their distance to the vehicle sides in the Control Display.							
	- rear view camera: supports the driver when reversing into a parking space and manoeuvring at speeds below 20 km/h by showing the area in the rear of the vehicle in the control display. The function provides better visibility while reversing, Interactive tracer lines show the vehicle's trajectory. In combination with Park Distance Control, distance information is displayed inside the camera image. A zoom function for the trailer tow hitch facilitates backing up to couple a trailer. The camera is activated by engaging reverse gear.							
	Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.							
5DN	Not with 5DN Parking Assistant Plus	0	0	0	0	0)	Only with: Z0J
	Camera and ultrasound-based assistance system consisting of Surround View system and Remote 3D View as well as the functions of option code (5DM - Parking Assistant).							200
	- Surround View system: Offers the camera-based functions Top View, Panorama View and 3D View. Cameras at the front and rear and in the exterior mirrors provide a 360° view around the vehicle including a three-dimensional visualisation. Panorama View front and near makes it more safe to approach intersections and exist. In combination with natar-based monitoring of the area in front of the vehicle, the system warns of crossing traffic. An additional view on the Control Display shows the situation to the right and left of the vehicle. The displayed positioning lines facilitate positioning the vehicle at the stop line. The function is activated by the Panorama View button. Automatic activation is possible via the storage of personal locations. The view towards the front or rear depends on which gear is engaged.							
	- Remote View 3D: Transfer of static images from 3D View to mobile terminal devices via the mobile phone network (only in combination with option code 6AP Remote Services*). In surround view, the vehicle and its surroundings can be viewed from any perspective.							
	Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.							
5AU	Not with 5DM Driving Assistant Professional	0	0	0	0	0 0)	£2,295.00
	Camera/radar-based driver assistance system comprising of the following functions:			_				
	- Steering and lane control assistant: Supports the driver in keeping to the middle of the lane by means of corrective steering interventions in the speed range of 0-210 km/h. This results in releved vehicle operation and releves the driver of monotonous tasks (particularly in heavy traffic), in rearnow passages on motoways (e.g. road works), the steering assistance ensures a proper distance to vehicles at the sides, roadside structures, and lane markings. The driver is requested to keep both hands on the steering wheel during vehicle guidance to ensure that they are paying attention and able to react if necessary. If this is not compiled with, the control is deactivated after a few seconds, and the driver is requested to take full control of the steering.							
	- Active Cruise Control and automatic Speed Limit Assist: Consists of chaise control with approach control, speed limit and, no-overtaking indicator, manual and automatic speed limit assist, front collision warning and brake intervention. - Lane keeping assistant with active side collision protection. - Lane keeping assistant with active side collision protection. - Lane keeping assistant with active side collision protection. - Lane keeping assistant with active side collision protection.							
	Warning side collision warning). A visual warning is displayed in addition to the active steering intervention, and the steering wheel vibrates. Applies to Lane Change Warning and Lane Departure Warning from approx. 20 km/h. - Crossing traffic warning front: Warns of crossing traffic warning front: Warns of crossing traffic warning front:							
	shown in the camera display (panoramal/Surround View) or in the PDC display. - Evasion aid:							
	Assists in critical approach situations when evading is still possible. Evasion aid is available in the speed range of 30-160 km/h. Reacts to vehicles ahead and pedestriens. - Crossroads warming with city braking function: Braking assistance with visualizacustic warming incl. active brake intervention in the event of a potential collision with intersecting traffic. Comprises the partial functions warming in priority situations and at stop signs. Active at two 16-58 km/h.							
	- Crossing traffic-warning rear - warns of potential collision with intersecting traffic when reversing out of parking spaces.							
	Rear collision prevention - Detects the potential of rear collisions via rear sensors and warns traffic behind the vehicle by activating hazard lights.							
	- Wrong-way warning: Detects "no entry" signs on motorways, at roundabouts and at one-way roads. Issues a visual/acoustic driver warning.							
	- Lane Change Assistant: assistance for comfortable and automatic lane changing in the speed range between 43 - 110 mph via a long press of the turn indicator. - Real time 3D environment visualisation in the instrument duster							
6DR	Please note, the function "Lane change assistant", which is a part of option 5AU "Driving assistant professional" has to be deactivated for X6 models when ordered in combination with C28 Donnington Grey. You must add option 8TR which will decode that specific function - if you do not do this, the factory will add option 8TR to the order regardless. BMW Drive Recorder	0	0	0	0	0 0)	Only with: ZOJ
	The DriveRecorder makes it possible to record a video of the vehicle's surroundings and to play this video back on the central information display or even on the CE device via USB export. Important vehicle information, such as speed and GPS position, are saved in sync with the video.

	Smartphone holder within the centre console featuring inductive charging for compatible mobile telephones (using QI wireless charging format) and connection to the vehicle's external aerial. Includes LED charge level indicator and forgotten mobile phone warning.						
	To ensure the Smartphone charges function and connects to the external aerial, the Smartphone must be positioned with its back flat to the charging surface. For Smartphones without an inductive charging function,						
	special charging cases are available to purchase via BMW Parts and Accessories for selected devices. Extended functionality may depend on the features of the Bluetooth / USB device in use. For confirmation, please check the Bluetooth Compatibility Checker on www.bmw.co.uk.						
6WD	Wiff hotspot	•	•	•	•		Std
	Enables connection of mobile devices to the internet via the SIM card installed in the vehicle. Depending on the local LTE availability, up to 10 devices can surf the internet with max. 100 Mbit/s. Its use is subject to		-				Siu
	cost, data plans can be purchased via the mobile network operator when connected to the vehicle.						
6U3	BMW Live Cockpit Professional	•	•	•	•	•	Std
	- Display cluster consisting of a fully digital, customisable 12.3" instrument display and a high-resolution (1920x1080 pixels) 12.3" Control Display incl. split screen function						
	- BMW Operating System 7.0 with variable, configurable widgets (e.g. media player with album cover, vehicle status, etc.) that display information in real time.						
	- Intuitive operation options through natural voice control, direct-selection buttons, iDrive Controller with turn and press function, touch operation on the Control Display or gesture control (where fitted).						
	-Personal user account: enables unique identification and authentication of vehicle user with their stored profiles (via key and PIN); all settings related to the respective person (seat, air conditioning, entertainment, etc.) are adopted together with the profile.						
	-When navigation is not active, an orientation map can be shown on the instrument display; when navigation is active, a roadbook with all required instructions is displayed (alternatively, display in the HUD).						
	- Navigation function (navigation data is loaded into the navigation unit when the vehicle is delivered) with image of the current course of the road, arrow pointer, map display north-up, heading-up and perspective view, 3D landmarks, Micro City Models, free-text search for addresses and special destinations, destination guidance instructions with auto-zoom function.						
	- Quadruple tuner with diversity reception						
	- Hard drive-supported system including up to 50 GB memory for audio files (34 GB music files and 16 GB Connected Music)						
	- 2 USB connections for charging smartphones and tablets and transferring data (e.g. media players), Bluetooth / WiFi interface for wireless connection of mobile terminal devices (e.g. Bluetooth audio streaming) and WiFi hotspot preparation (use of SIM card installed in the vehicle; fee-based registration required).						
	- 4G LTE Connectivity, hard-wired SIM card with 4G network in the vehicle for keeping the customer mobile; Intelligent Emergency Call, Teleservices, Online Services (e.g. weather, news) as well as BMW ConnectedDrive services included in content or purchased individually, 8356						
6U8	Gesture Control	•	•	•	•	•	Std
	Specifically defined functions can be controlled in the detection range above the front centre console using hand gestures:						
	Use of simple hand gestures to interact with the infotainment system (e.g. swiping, pointing, turning, pushing). Functions that can be operated by gestures include volume control, accepting and rejecting an incoming telephone call, closing externally triggered pop-ups (e.g. traffic news), speech dialogue, confirmation of Check Control messages, triggering of a personally configured function and Surround View (360°).						
	Teeting from early considered that any inaggered purpose (e.g. control reasy), speech calculated in the control reasonables, inaggered purpose and cancelled with gestures such as "pointing" or "swiping". - Permanently available gestures for direct relacation (e.g., volume)						
	- Context-specific gestures as a reaction (e.g. rejecting an incoming telephone call) - Operating aid through the display of currently available gesture interactions
