## BMW X5 xDrive45e

BMW UK  
December 2019

		X5 45e xLine (TA82)	X5 45e M Sport (G05H)	Retail price (incl. VAT at 20%)
<p>○ =optionally available ● =standard equipment - =not available / = or</p>				
Option Code				
<b>Transmission</b>				
<b>2TB</b>	<b>Sport automatic transmission</b>  Dynamic and sporty gear changes via the steering wheel paddles or selector lever.  Sport button activates Sport Mode where gear shifts are almost instantaneous in either up or down shifts.  Includes Launch control.	●	●	Std
<b>Steering and Chassis</b>				
<b>2NH</b>	<b>M Sport braking system</b>  Blue painted brake calipers with 'M' designation	-	●	Std
<b>2T4</b>	<b>M Sport differential</b>  The rear axle differential lock, which is infinitely adjustable depending on the driving situation, prevents a single rear wheel from slipping and hence provides optimal traction in all driving situations	-	-	Only with: 2VW or 3E3
<b>2VF</b>	<b>Adaptive M suspension</b>  Sport suspension settings with tuned adaptive dampers; adjustable via driving modes	-	-	Std
<b>2VH</b>	<b>Integral Active Steering</b>  Speed-dependent adaptation of the steering angle of front and rear wheels combined with reduced effort applied to steering wheel for more agile handling that is more comfortable when parking. Combined steering of the rear axle.  M50d - Only with 2VR, 2VW or 4UB	○	○	£995.00
<b>2VR</b>	<b>Adaptive 2-axle air suspension</b>  Automatic self-levelling suspension: - Manual raising up to 30 km/h by 40 mm (30 km/h to 55 km/h by 20 mm) - Automatic lowering above approx. 140 km/h by 10 mm (above approx. 200 km/h by 20 mm) - Entire height adjustment travel of 80mm selectable on five levels via toggle switch on the centre console - Control of height level from outside the vehicle via the 3DS BMW Display Key - Vehicle can be lowered (for loading) via switch in bottom of tailgate  M50d only with 2VH	●	●	£1,150.00
<b>2VW</b>	<b>Adaptive M Suspension Professional</b>  Includes: - Anti roll stabilisation - 2VH Integral Active Steering  Not available with 2VR and 4UB (Price includes 2VH)	-	-	£3,195.00
<b>Safety and Technology</b>				
<b>4UB</b>	<b>Acoustic protection for pedestrians</b>  Artificially generated sound when driving electrically up to 30 km/h to protect other road users (so they are able to hear the vehicle) Always active when the vehicle is started (default on)  Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.  Note: refer to the country-specific offer.	●	●	Std
<b>5AL</b>	<b>Active protection</b>  Safety package for initiating protective measures for the occupants if an accident situation is imminent: - reversible belt tensioning - automatic closing of the windows - closure of sliding sunroof, depending on equipment	-	○	Only with ZMS Std
<b>5AQ</b>	<b>Active Guard Plus</b>  Includes the manual Speed Limit Device (SLD) features including Speed Limit Info with no passing info and preview (only with nav), the Lane Departure Warning with steering impulse, and the Front Collision Warning with brake intervention.  - Speed Limit Assist combines the Speed Limit Info with the Speed Limiter incl. no passing info and preview of speed limits. Thus, the allowed speed limit is transferred after manual confirmation in the Speed Limiter.  - Lane departure warning with steering impulse, detects lane markings from about 70 km/h, warns via steering wheel vibration from accidentally leaving the lane and steers the vehicle back into the lane. Suppressed with set turn signal or turn signal (wanted lane change). Display in the instrument cluster.  - Front collision warning with brake intervention includes the approach control warning and person warning with city brake intervention. The system detects and reacts automatically with a braking intervention on vehicles (up to 210km/h) as well as cyclists and pedestrians (up to 65km/h). Above these limits, cyclists and pedestrians (up to 85km/h) are warned and prepared for braking by the driver. In addition, the system reacts on vehicles with a brake pressure up to 250km/h. The automatic braking can reach a maximum delay of 9m/s² (full deceleration).  Please note: The system volumes included in the optional equipment only support within defined system limits. Responsibility and reaction to the real traffic situation remain with the respective driver.	●	●	Std
<b>3DS</b>	<b>BMW Display key</b>  Key size: approx. 90 mm x 55 mm x 15 mm  Functional scopes: - LCD colour display incl. touch control panel - display option of vehicle status information (e.g. range, service information, vehicle locking, etc.) - control of the ventilation inside the vehicle - in combination with option code 2VR 'Adaptive 2-axle air suspension' control of vehicle height from outside (from 12/18 production) - wireless charging of the key - additional USB charger cable - range of function: 300m  Notes: 1 BMW display key and 1 standard vehicle keys are included	○	○	Only with: 2OJ
<b>322</b>	<b>Comfort access with smart opener</b>  Access to the vehicle without removing key from pockets or bag. Sensors detect proximity of keys to the vehicle and allow doors to be unlocked by holding the door handle closest to the key. Locking by touching ribbed section of door handle when key is not inside the car. Including touch free opening and closing of the tailgate. Access can also be set up within BMW Operating System 7.0 to allow automatic locking and unlocking upon driver approach to the vehicle, with key on their person. An acoustic sound will identify when the vehicle unlocks upon approach and locks upon exit. Includes touch free opening and closing of the tailgate.  Includes BMW Digital Key technology allowing locking and unlocking of the driver's door and starting of the engine via smartphone, removing the need for a conventional car key. Smartphone needs to be held within 5cm of door handle to lock and unlock, and placed in Wireless Charging smartphone tray to start and drive vehicle. The BMW Digital Key will initially be available for selected Android platform NFC-capable smartphones at launch. One "owner" digital key is provided from factory with a service duration of 1 year. In addition, additional BMW Digital Keys can be purchased via the ConnectedDrive Store and shared with up to five other people with applicable smartphones. Additional keys are purchased in packs of five and have a 1 year service duration from purchase.  In addition, from <b>December 2018 production</b> a high quality NFC "Key Card" (credit card sized) is included to enable keyless access to the vehicle for users without a compatible Smartphone. Just like the Digital Key on the smartphone, the Key Card offers the functionalities locking/unlocking and starting the engine. All customers without a capable smartphone (e.g. Apple iPhone) will thereby get a substitute solution.  <b>M Sport and M Performance models now feature an NFC with specific M design.</b>	○	○	Only with: ZGM or ZGX
<b>552</b>	<b>Adaptive LED headlights</b>  Expanded lighting functions for improved visibility: - Adaptive headlights - Anti-glare selective high beam - Light colour close to that of ordinary daylight - Optimum, homogeneous illumination of the carriageway  Includes 5AC	○	○	£700.00 Std

Option Code						
5AC	<b>High-beam Assistant</b>  Automatic switching on and off of the high-beam headlights depending on the traffic situation. Control via sensor on the front side of the interior mirror.  <i>Included with 552 and 5AZ</i>	○	○			<b>Only with Z0C</b>
5A1	<b>LED fog lights</b>  Integrated into the bumper system, with LED lights in horizontal arrangement	●	●			<b>Std</b>
5AU	<b>Driving Assistant Professional</b>  Cameral/radar-based driver assistance system comprising of the following functions:  - Steering and lane control assistant: Supports the driver in keeping to the middle of the lane by means of corrective steering interventions in the speed range of 0-210 km/h. This results in relaxed vehicle operation and relieves the driver of monotonous tasks (particularly in heavy traffic). In narrow passages on motorways (e.g. road works), the steering assistance ensures a proper distance to vehicles at the sides, roadside structures, and lane markings. The driver is requested to keep both hands on the steering wheel during vehicle guidance to ensure that they are paying attention and able to react if necessary. If this is not complied with, the control is deactivated after a few seconds, and the driver is requested to take full control of the steering.  - Active Cruise Control and automatic Speed Limit Assist: Consists of cruise control with approach control, speed limit info, no-overtaking indicator, manual and automatic speed limit assist, front collision warning and brake intervention.  - Lane keeping assistant with active side collision protection: Assists the driver in keeping in lane and actively preventing potential side collisions by means of corrective steering interventions in the speed range of 70 km/h to 210 km/h (Lane Change Warning and Lane Departure Warning, side collision warning). A visual warning is displayed in addition to the active steering intervention, and the steering wheel vibrates. Applies to Lane Change Warning and Lane Departure Warning from approx. 20 km/h.  - Crossing traffic warning front: Warns of crossing traffic while leaving/entering a parking space as well as while turning into crossing traffic in situations with restricted visibility. Active at up to 7 km/h. Depending on vehicle configuration, information is shown in the camera display (panorama/Surround View) or in the PDC display. <div>- Real time 3D environment visualisation in the instrument cluster</div> - Evasion aid: Assists in critical approach situations when evading is still possible. Evasion aid is available in the speed range of 30-160 km/h. Reacts to vehicles ahead and pedestrians.  - Crossroads warning with city braking function: Braking assistance with visual/acoustic warning incl. active brake intervention in the event of a potential collision with intersecting traffic. Comprises the partial functions: warning in priority situations and at stop signs. Active at up to 85 km/h.  - Crossing traffic-warning rear - warns of potential collision with intersecting traffic when reversing out of parking spaces.  Rear collision prevention – Detects the potential of rear collisions via rear sensors and warns traffic behind the vehicle by activating hazard lights.  - Wrong-way warning: Detects "no entry" signs on motorways, at roundabouts and at one-way roads. Issues a visual/acoustic driver warning.  - Lane Change Assistant: assistance for comfortable and automatic lane changing in the speed range between 43 - 110 mph via a long press of the turn indicator. <div>*Please note, the function "Lane change assistant", which is a part of option 5AU "Driving assistant professional" has to be deactivated for X5 models when ordered in combination with C28 Donnington Grey. You must add option 8TR which will decode that specific function - if you do not do this, the factory will add option 8TR to the order regardless.</div>	○	○			<b>£2,295.00</b>
5AZ	<b>BMW Laserlights</b>  Unique "X" design with blue "X" signature on both sides (illuminated), supports the feeling of width.  Functionality - Accent lighting with turn indicators - 3 lighting levels: LED low-beam headlights, LED high-beam headlights with laser module (above 60 km/h) - LED position light, LED daytime driving light in "L"-shape, LED direction indicator, LED cornering light - Adaptive headlights - Incl. BMW Selective Beam, the dazzle-free high-beam assistant from BMW  Technical content - LED for high amount of light and wide illumination - Laser high-beam module doubles the light intensity compared to Bi-LED (up to a range of 500 m) - Light emitted from blue high-performance laser diodes is concentrated to white light with high intensity on a small phosphor plate)  Including specific design elements and exclusive designation 'BMW Laserlight'  <i>Includes 5AC</i>	○	○			<b>Only with Z0C</b>
5DM	<b>Parking Assistant</b>  Camera and ultrasound-based assistance system consisting of parking assistant, reversing assistant, lateral parking aid and rear view camera.  - Parking assistant: The parking assistant facilitates parking into parallel and perpendicular parking spaces as well as leaving parking spaces parallel and perpendicular to the road. For this purpose, the system measures potential parking spaces while driving by at speeds below approx. 35 km/h even without prior activation. After displaying the information in the central display and activation by the driver, the parking assistant completely takes over vehicle control by steering, braking and shifting gears. Activation when reverse gear is engaged or transmission position "R" is selected or manually by button at speeds below 35 km/h. The function can be overridden by the driver at any time.  - Reversing Assistant: While driving forward, the function saves the last 50 m of an entry path taken by the driver themselves at a speed of up to 35km/h in order to follow this path while reversing upon request by the driver. This relieves the driver of steering tasks so they can focus entirely on monitoring the surroundings of the vehicle. The driver remains responsible for longitudinal control via accelerator and brakes (speed below 10 km/h) and for monitoring the surroundings of the vehicle to avoid collisions with objects in the vicinity. While reversing, the function assists the driver with longitudinal control by reducing driving speed as appropriate.  - Lateral parking aid: Assists in damage minimisation while manoeuvring. Based on information from the Park Distance Control, the system memorises obstacles while driving past and shows their distance to the vehicle sides in the Control Display.  - Rear view camera: Supports the driver when reversing into a parking space and manoeuvring at speeds below 20 km/h by showing the area in the rear of the vehicle in the control display. The function provides better visibility while reversing. Interactive tracer lines show the vehicle's trajectory. In combination with Park Distance Control, distance information is displayed inside the camera image. A zoom function for the trailer tow hitch facilitates backing up to couple a trailer. The camera is activated by engaging reverse gear.  - <b>Active Park Distance Control:</b> <b>Prevention or minimisation of damage while reversing into parking spaces with reaction to collision-critical obstacles towards the rear and sides. If the accelerator is depressed and an obstacle is detected, the function brakes slightly to alert the driver (at speeds of up to 5 km/h). If the accelerator is not depressed and the distance to the obstacle is very short, the function applies the maximum possible braking force up to a complete standstill to prevent a collision or minimise the resulting damage.</b>  Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.	●	●			<b>Std</b>
5DN	<b>Parking Assistant Plus</b>  Camera and ultrasound-based assistance system consisting of Surround View system and Remote 3D View as well as the functions of option code '5DM - Parking Assistant'.  - Surround View system: Offers the camera-based functions Top View, Panorama View and 3D View. Cameras at the front and rear and in the exterior mirrors provide a 360° view around the vehicle including a three-dimensional visualisation. Panorama View front and rear makes it more safe to approach intersections and exits. In combination with radar-based monitoring of the area in front of the vehicle, the system warns of crossing traffic. An additional view on the Control Display shows the situation to the right and left of the vehicle. The displayed positioning lines facilitate positioning the vehicle at the stop line. The function is activated by the Panorama View button. Automatic activation is possible via the storage of personal locations. The view towards the front or rear depends on which gear is engaged.  - Remote View 3D: Transfer of static images from 3D View to mobile terminal devices via the mobile phone network (only in combination with option code 6AP "Remote Services"). In surround view, the vehicle and its surroundings can be viewed from any perspective.  Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.	○	○			<b>Only with Z0J</b>
610	<b>Head-up Display</b>  Full-colour projection onto the windscreen of information related to driving and specific to the situation, with automatic brightness control, 3D graphics for junction view (realistic display of turns and intersections). User-friendly adjustment possible by means of iDrive Controller.  Large-scale display with 7° x 3.5° opening angle and a throw of approx. 2.5 m.  Display of: - Navigation information in different display modes - Speed - Country-specific display of traffic signs in the relevant colours (e.g. no-overtaking indicator, Speed Limit Info) - Warning information from driver assistance systems - Situational display of entertainment and communication lists - Display of Driving Experience Control modes (via coloured highlighting) - Display of BMW EfficientDynamics functional contents - Check control messages with 3D graphics  <i>Display of contents depending on optional equipment ordered</i>	○	○			<b>Only with Z0J</b>
