	Limited slip differential. Improved traction, agility, stability and driving behaviour. Comfort thanks to smooth transitions even with sudden steering movements. System-side adjustment of locking degree (rear axle) between 0 and 100% depending on driving situation and road surface conditions.  - Traction: more torque is directed to the wheel with better grip; this enables better (pull-away) torque (also when cornering)  - Agility: enables higher lateral acceleration and driving dynamics potential and improves cornering ability of the vehicle  - Stability: stable and smooth load change behaviour thanks to targeted dynamic damping (counteracting undesirable yaw movements of the vehicle)  Additional functions:  - change of setup depending on position of Driving Experience Switch (e.g. more dynamic/agile driving behaviour in 'Sport' mode)  - also available in 'DTC/DSC-off' mode  - can be opened, e.g. to ensure optimum wheel slip control performance (ABS)  - detection of wheels with different rolling circumference (e.g. inflation pressure, tread depth) and corresponding response  - detection of drift (DSC-off) and response with maximum locking torque	330	330e	330	330e	
2VF	Only available on 330i M Sport as part of ZMS.  Adaptive M Suspension  Adaptive Suspension that can be controlled via Driving Experience Control buttons, offering a comfortable, yet sporty suspension setup. Consists of adaptive damper control with lowering of 10mm and automatic ride height adjustment depending on vehicle load. Includes sporty setup of elasto/kinematics (stiffer bearings, higher camber angle, body struts for increased rigidity) and, in addition to option code 704 'M Sport suspension', electronically controlled variable dampers on both axles with wheel-specific control.	-	-	0	•	Only as part of ZMS
2VL	Only as part of ZMS.  Variable Sport Steering At small steering angles: comfort, precision, high directional stability - at larger steering angles: reduced steering angle requirement for parking and turning, improved handling and greater agility during evasive actions for sporty driving Standard on all 3 series M Sport models apart from 330e M sport.	-	-	-	-	Standard
	On 330e M sport, only with ZMS.	-	-	0	-	Only as part of ZMS.

	Crossing traffic warning front:  - warns of crossing traffic while leaving/entering a parking space as well as while turning into crossing traffic in situations with restricted visibility.  - active at up to 7 km/h.  - depending on vehicle configuration, information is shown in the camera display (panorama/Surround View) or in the PDC display.  Evasion aid:  - assists in critical approach situations if evasion is still possible.  - evasion aid is available in the speed range of 30-160 km/h.  - reacts to vehicles and pedestrians ahead.  Crossroads warning with city braking function:  - braking assistance with visual/acoustic warning incl. active brake intervention in the event of a potential collision with intersecting traffic.  - warning in priority situations and at stop signs (only with option code 6U3).  - active at up to 85 km/h.  Wrong-way warning:  - detects "no entry" signs on motorways, at roundabouts and at one-way roads.  - issues a visual/acoustic driver warning.  Please note: the system scopes contained in the optional equipment only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.	8			3

	Only with 2TB and 205.	က	3	က	8	
<u>/</u>	Only with 6U3.  Parking Assistant	•	•	•	•	Standa
	Camera and ultrasound-based assistance system consisting of parking assistant, reversing assistant, lateral parking aid and rear view camera.					
	- Park Distance Control (PDC)					
	Facilitates manoeuvring into and out of parking spaces by acoustic and visual distance warning of obstacles at the front and rear.  Obstacles are displayed as coloured markers in the schematic view of the vehicle on the central display. At distances < 25 cm the					
	acoustic signal switches to a steady tone. Due to Auto PDC, the function automatically activates automatically from a speed of < 4 km/h when the vehicle starts to drive forwards					
	from a distance of 0.6m to the vehicle ahead or from a distance of 1.5m while reversing. PDC can be deactivated manually.					
	- Parking assistant:					
	the parking assistant facilitates parking into parallel and lateral parking spaces as well as leaving parking spaces parallel to the road. For this purpose, the system measures potential parking spaces while driving by at speeds below approx. 35 km/h even without prior					
	activation. After displaying the information in the central display and activation by the driver, the parking assistant completely takes over vehicle control by steering, braking and shifting gears. Activation when reverse gear is engaged or transmission position "R" is selected					
	or manually by button at speeds below 35 km/h. The function can be overridden by the driver at any time.					
	- Reversing Assistant: While driving forward, the function saves the last 50 m of an entry path taken by the driver themselves at a speed of up to 36 km/h in					
	order to follow this path while reversing upon request by the driver. This relieves the driver of steering tasks so they can focus entirely on monitoring the surroundings of the vehicle. The driver remains responsible for longitudinal control via accelerator and brakes (speed					
	below 10 km/h) and for monitoring the surroundings of the vehicle to avoid collisions with objects in the vicinity.					
	- Lateral parking aid:					
	assists in damage minimisation while manoeuvring. Based on information from the Park Distance Control, the system memorises obstacles while driving past and shows their distance to the vehicle sides in the Control Display.					
	- Rear view camera: supports the driver when reversing into a parking space and manoeuvring at speeds below 20 km/h by showing the area in the rear of					
	the vehicle in the control display. The function provides better visibility while reversing. Interactive tracer lines show the vehicle's trajectory. In combination with Park Distance Control, distance information is displayed inside the camera image. The camera is					
	activated by engaging reverse gear. The camera is located in the tailgate.					
	Please note: the system scopes contained in the option code only provide assistance within defined system limits. It remains the responsibility of the respective driver to react to the actual traffic situation.					
N	Parking Assistant Plus  Camera and ultrasound-based assistance system consisting of Surround View system and Remote 3D View as well as the functions of	1		0	0	£ 650.
	option code 5DM 'Parking Assistant' and option code 508 'Park Distance Control (PDC)'.					
	- Surround View system: offers the camera-based functions Top View, Panorama View and 3D View. Cameras at the front and rear and in the exterior mirrors					
	provide a 360° view around the vehicle including a three-dimensional visualisation. Panorama View front and rear makes it more safe to approach intersections and exits. In combination with radar-based monitoring of the area in front of the vehicle, the system warns of					
	crossing traffic. An additional view on the Control Display shows the situation to the right and left of the vehicle. The displayed positioning lines facilitate					
	positioning the vehicle at the stop line. The function is activated by the Panorama View button. Automatic activation is possible via the storage of personal locations (only with					
	navigation). The view towards the front or rear depends on which gear is engaged.					
	- Remote View 3D: transfer of static images from 3D View to mobile terminal devices via the mobile phone network (only in combination with <b>Remote</b>					
	<b>Services</b> ). In surround view, the vehicle and its surroundings can be viewed from any perspective.					
	Only with 6DR. Not with 5DM.				0	
R	<b>Drive Recorder</b> Drive Recorder allows the recording of 360° video of car surroundings (picture resolution: 1280x960) and play back on centre display or	-	-	0		Only with 5D
	export of video files via USB for play back on external devices. Important drive data (e.g. speed, GPS-position, date, time) are saved within video recordings.					
	The Drive Recorders two sub-functions are:					
	- Event recorder: ability to create manual activation video of driving events. Event recorder is activated by hold and press of parking					
	camera button within centre console.  - Crash recorder: the system starts video recording automatically (triggered via shock sensor) to document accidents the BMW is					
	involved in, while driving.					
	Up-to 10 videos, each 40 seconds in length can be saved to the in-car hard-drive. 20 seconds before and 20 seconds after the event will be saved.					
	Please note that heavy accidents with hard disc damages or camera damages are owing to circumstances where videos may not be recorded or saved.					
erior Ec	Only with 5DN. uipment					
<u>C</u>	Towbar, fully electric Concealed and permanently installed behind the bumper. Released and retracted electrically by means of a button in the luggage	0	0	0	0	£ 850.
	compartment. Comes with a 13-pin European electrical socket and adaptor to convert to 7-pin. Additional wiring connectors may be					
	required depending on towing usage (available through Aftersales). Trailer Stability Control is included when this option is specified.

F ii r	Formerly known as BMW Online. Access to a WAP based online services to view a wide range of general and location-based information. Included Apps are News, Weather and Country Information. Online-based content like News can be read out loud to ininimize distraction while driving and offer the maximum in safety and comfort. The weather app shows the weather forecast for the approximation contains all the relevant information when entering a different country with your BMW, for example information on tolls.					
A I	BMW Connected+.^ An update of the personalization function in the vehicle and display of smartphone content on the Control Display in the BMW. ncluding; Send my Routes to Car, Share Live Trip Status, Navigate Door-to-Door and seamless link of My Destinations between you Connected App and vehicle.					
ii C a ii	Intelligent Voice Control.  Activation through "Hey BMW" (no requirement to press push to talk button) and ability to assign your own personal activation word. Dff-board voice processing offers a functional extension of the intelligent voice assistant through server-based processing of speech input. Examples of the features include online-based points of interest for the navigation (e.g. Italian restaurant in the vicinity), the dictation function for messages and an improvement in the recognition of natural speech input. Benefits at a glance; Flexible input of addresses and points of interest, More up-to-date data for the speech-based search for addresses and points of interest, Improvement in voice recognition for the input of addresses and points of interest. Flexible dictation of text messages and e-mail (Smartphone dependant).					
N E t s	JSB and Over the Air map updates.  Manual and Automatic updates of the navigation map data either via USB or over-the-air. A USB map update can be completed via the BMW ConnectedDrive portal to integrate the latest European wide map data, or as soon as a new navigation map version is available for he country that your vehicle is registered in, the update is transferred via the integrated SIM card directly into the vehicle's navigation system, completely over-the-air. During the update process, the navigation system remains fully functional. Always have the most up-to-date navigation map data. Overthe-air updates up to 4-times annually. Updates take place automatically as soon as the latest version of map data is available.					
I	ncluded and available on vehicles fitted with 6U3 (BMW Live Cockpit Professional) only:					
t S	BMW Intelligent Personal Assistant.  Building upon the Intelligent Voice Control, BMW drivers and passengers will be joined by an intelligent, digital character that responds to the prompt "Hey BMW". Communicate in a new and easy way with your car using the BMW Intelligent Personal Assistant. It knows you, learns your behaviours to get better every day and helps out whatever the situatio. It allows functions within the vehicle to be controlled, can explain everything about your car and help you get better acquainted with your BMW. You can also assign your own personal activation word.					
s a t	Intelligent Functionalities.  Smart Interior, working in conjunction with Intelligent Personal Assistant, offers personalised content based, and intelligent car related services in the vehicle and the Connected App. It automates vehicle functions to enhance the experience inside of the vehicle. Includes automate my habits service, where you can define your heating and cooling preferences. The vehicle then automatically adjusts the seat neating / ventilation settings to your liking. Also includes Weather Guard to warn the driver if the car is parked in adverse weather conditions via the BMW Connected App. This feature's deliverables is dependent on your vehicles capabilities and specification.					
t s	Remote Software Upgrade.  With Remote Software Upgrade your BMW stays up-to-date and is future-proof. The Upgrades are downloaded via a smartphone with he Connected app and ideally a Wi-Fi connection (quicker and therefore recommended) or over the air directly into the car and provide security updates and functionality upgrades. The customers are always informed about the content of every Remote Software Upgrade					
,	s there are Release Notes displayed in the car and in the Connected App similar to an iOS upgrade.  Currently only available on vehicles fitted with 6U2 with limited functionality (Send Routes to Car to follow within 2019). Service will ollow on vehicles fitted with 6U3 via a Remote Software Upgrade within 2019.
