BMW Motorrad Riders' Apparel Venting Machine suit – it doesn't get much breezier than this

Munich. For all motorcyclists that live in, or especially like to travel in hot countries, BMW Motorrad now offers the suit Venting Machine. It has extremely high air circulation and is still a functional motorcycling suit.

For trips in the USA, Australia, Africa or Southern Europe where summer temperatures often start at 80°F, the suit Venting Machine is ideal. The jacket and trousers consist mainly of highly resilient polyamide in net structure, achieving a high level of body ventilation. The rider feels a pleasant cooling effect while on the road and thus remains fit for longer and can concentrate better. The suit Venting Machine is also especially pleasant to wear: stretch material on the knees, elbows and seat and a soft collar provide maximum comfort and freedom of movement. The integrated reflective yarn is woven into the silver fabric inserts on the sleeves and in the chest area, which greatly increases visibility for other road users. It is additionally fitted with a back protector and Prosafe protectors at the shoulders, elbows and knees, thus fulfilling all the requirements of a high-quality motorcycling suit.

The Venting Machine suit bears a small BMW logo on the jacket seam and trouser waist. It is available in a discreet colour combination in black/silver for women in the sizes 4-16, men's sizes range from 36-56 and 40L-50L. The suit is available at BMW Motorrad Apparel Retailers. To locate the retailer nearest you, call 1800-3454BMW, or visit <http://www.bmw-riders-gear.com>
