BMW Manufacturing Continues as Largest U.S. Automotive Exporter by Value.

Export Value From South Carolina Totals More Than \$8.4 Billion in 2018.

Plant Produces 4.5 Millionth BMW Built in South Carolina.

September 8th Marks 25 Years of Production in South Carolina.

Spartanburg, S.C. For the fifth consecutive year, BMW Manufacturing led the nation in automotive exports by value, according to data released this week by the U.S. Department of Commerce. BMW exported 234,689 X models from its Spartanburg, SC, plant during 2018. About 81 percent of these Sports Activity Vehicles and Coupes were exported through the Port of Charleston with an export value of more than \$8.4 billion, according to Commerce Department data. This confirms that the South Carolina factory is the leading U.S. automotive exporter by value.

The remaining 19 percent of BMW X models were exported through five other southeastern ports: Savannah, GA; Brunswick, GA; Jacksonville, FL; Miami, FL; and Everglades, FL. All totaled, the Spartanburg plant exported nearly 66 percent of its total production volume of 356,749 units. BMW Manufacturing's production volume and exports declined slightly in 2018 due to model updates of the popular BMW X4 and BMW X5.

"Despite last year's model changeovers and the ongoing uncertainty regarding trade and tariffs, Plant Spartanburg is still positively contributing to the U.S. balance of trade," said Knudt Flor, president and CEO of BMW Manufacturing. "This achievement clearly reinforces BMW's ongoing commitment in the U.S. With additional models such as the first-ever BMW X7, the BMW X3 M and X4 M, and the recently-announced BMW X3 and X5 plug-in hybrid vehicles, we anticipate an increase in production and exports for 2019."

In 2017, BMW announced an additional \$600 million investment in the Spartanburg plant from 2018 through 2021 for manufacturing infrastructure for future generations of X models. Last

month, the plant produced the 4.5 millionth BMW built in South Carolina. Later in the year, associates will mark 25 years of BMW production in the state.

“The remarkable partnership between BMW and South Carolina continues to thrive, and this is evident by the fact that our state remains the nation’s leader in the export sales of completed passenger vehicles,” said South Carolina Secretary of Commerce Bobby Hitt. “I offer my congratulations to BMW and its Upstate workforce on another strong year. Together, we’re showing the world that South Carolina truly is ‘Just right.’”

“BMW is a significant port user whose operations are a tremendous asset to the Port and the state of South Carolina,” said Jim Newsome, president and CEO of the South Carolina Ports Authority. “As customers of both Inland Port Greer and the Port of Charleston, BMW’s continued expansion has been a driver of our strong import and export volumes. We are proud to serve the nation’s leading automotive exporter and look forward to supporting their future growth.”

BMW Group Plant Spartanburg produces more than 1,400 vehicles each day. In 2018, the Spartanburg plant produced 356,749 vehicles. The factory has a production capacity of 450,000 vehicles and employs more than 11,000 people.
