POSTCARD STORY. MINI COOPER S CLUBMAN UNTOLD EDITION.

The MINI Cooper S Clubman in the Untold Edition combines sporty aesthetics with the unique characteristic features of the Untold Edition. The unmistakable appearance is particularly characterised by the model-typical split doors at the rear and the exclusive bodycolor Sage Green.

P90497206

The MINI Cooper S Clubman has a four-cylinder gasoline engine that accelerates from 0 to 100 km/h in 7.2 seconds with 131 kW/178 hp, guaranteeing that incomparable go-kart feeling. The dynamics are explicitly emphasised by the Sport Stripes running narrowly across the bonnet and transferred to the interior by the sports seats in the MINI Yours Leather Lounge Sage Green finish. These also underline the sporty character of the MINI Cooper S Clubman in the Untold Edition.

The color of the 18-inch alloy wheels - Refined Brass - also shows the elegant side of the MINI Cooper S Clubman in the Untold Edition. The color is also reflected in the side sill trims and the edging of the air intakes, creating a harmonious overall appearance. The combination of sporty, refreshing characteristics and the discreet use of color accents makes the MINI Cooper S Clubman in the Untold Edition an impressive eye-catcher.

Fuel consumption, CO₂ emission figures and power consumption were measured using the methods required according to Regulation VO (EC) 2007/715 as amended. They refer to vehicles on the German automotive market. For ranges, the NEDC figures take into account differences in the selected wheel and tyre size, while the WLTP figures take into account the effects of any optional equipment. For vehicles newly type-approved since 01.01.2021, the official specifications exist only according to WLTP. In addition, according to EU Regulation 2022/195, the NEDC values will no longer be included in the EC certificates of conformity as of 01.01.2023.

All figures have already been calculated based on the new WLTP test cycle. NEDC figures listed have been adjusted to the NEDC measurement method where applicable. WLTP values are used as a basis for the assessment of taxes and other vehicle-related duties which are (also) based on CO₂ emissions and, where applicable, for the purposes of vehicle-specific subsidies. Further information on the WLTP and NEDC measurement procedures is also available at www.bmw.de/wltp.

For further details of the official fuel consumption figures and official specific CO₂ emissions of new cars, please refer to the "Manual on the fuel consumption, CO₂ emissions and power consumption of new cars", available at sales outlets free of charge, from Deutsche Automobil Treuhand GmbH (DAT), Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen and at <https://www.dat.de/co2/>.
