BMW M Performance Parts and functional BMW accessories for the new BMW X5 and the first BMW iX5.

- New customization options for the BMW X5 and BMW iX5.
- BMW M Performance Parts: Front splitters, front trims, roof spoilers, rear diffusers and exterior mirror caps accentuate the design.
- BMW M Performance Parts: Summer and winter complete wheels from 21 to 23 inches, including a new 23-inch aluminum light alloy wheel.
- BMW accessories: New aerodynamically optimized BMW Aero roof boxes with volumes of 350, 450 and 550 liters.
- BMW accessories: Tablet holder and smartphone adapter for the Travel & Comfort System.

Woodcliff Lake, NJ – September 14, 2026... To mark the launch of the fifth generation of the BMW X5 and the first all-electric BMW iX5, BMW is offering two different ranges of accessories for customization and for everyday use. BMW M Performance Parts accentuate the dynamic look and include aerodynamic components such as summer and winter complete wheels. While functional BMW accessories expand transport and utilization possibilities. These include the new BMW Aero roof boxes, holders and adapters for the Travel & Comfort System, BMW all-weather floor mats, and the BMW luggage compartment mat.

BMW M Performance Parts: components for aerodynamics and design.

The BMW M Performance Parts for the new BMW X5 and the first BMW iX5 include vehicle-specific components for aerodynamics and design. The M Performance front trims refine the surfaces within the illuminated frame of the redesigned BMW Iconic Glow kidney grille with sporty carbon fiber. The three-part M Performance front splitter in carbon fiber combines aerodynamic functionality with low weight. The offering also includes the M Performance roof spoiler in black high-gloss, and the M Performance flow blades rear in carbon fiber left and right of the rear diffuser.

The M Performance exterior mirror caps and the M Performance rear diffuser are made from the fiber composite aramid. The material is like carbon in terms of appearance, structure and strength, but it can be penetrated by electromagnetic waves meaning that sensors in the exterior mirrors and antennas for operating the tailgate automatically remain fully functional.

BMW M Performance Parts: summer and winter complete wheels from 21 to 23 inches.

The BMW M Performance Parts offering includes summer and winter complete wheels in sizes from 21 to 23 inches, the highlight being the 23-inch M Performance light alloy wheel Y-spoke 1110 M Bicolor in Jet Black, gloss milled. For the future BMW M Performance model with V8 engine, an M Performance Sound silencer system is planned. The matching M Performance carbon fiber tailpipe finishers also enhance the optics of the standard exhaust system for the V8.

BMW accessories: New BMW Aero roof box in three sizes.

As a functional accessory, the BMW Aero roof box for the new BMW X5 and the first BMW iX5 is available with a volume of 350, 450 or 550 liters. Each variant offers 30 liters more volume than its respective predecessor model, as well as enhanced aerodynamics. Varying combinations of the matching BMW Aero and Flex luggage bags make use of the volume of the Aero 350, 450 and 550 roof boxes to ensure optimized luggage handling. In addition, two BMW Flex transport box luggage bags fit in the BMW rear box. This is mounted on a BMW rear cycle carrier and offers 300 liters of storage space. The BMW luggage bags are made from durable ballistic polyester with nubuck accents. They come with ergonomic handles, a padded shoulder strap, side and interior pockets, as well as a separate shoe bag.

BMW accessories: adapters for the Travel & Comfort System.

Holders and adapters for the Travel & Comfort System expand utilization possibilities in the rear of the new BMW X5 and the first BMW iX5. The standard system is located on the back of

the front seat and uses a magnetic holder for smartphones. The Travel & Comfort tablet holder and the Travel & Comfort tablet holder Pro are available as optional extras. With an additional joint, the tablet holder Pro offers more adjustment options and a surface with silver accents. The Travel & Comfort smartphone adapter available separately clicks into both tablet holders. It can accommodate smartphones up to 7 inches in size and keeps the connections accessible. The waterproof BMW all-weather floor mats for front and rear and the waterproof BMW luggage compartment mat are available to protect the vehicle interior and the luggage compartment in bad weather.

Q&A: Brief answers to the most important questions

What do the BMW M Performance Parts include?

The BMW M Performance Parts for the new BMW X5 and the first BMW iX5 include vehicle-specific aerodynamic and design components, as well as summer and winter complete wheels. Tailpipe finishers are also planned for selected models.

What counts as functional BMW accessories?

The functional BMW accessories for the new BMW X5 and the first BMW iX5 include the BMW Aero roof boxes, matching transport box luggage bags, the BMW rear box, as well as tablet holders and smartphone adapters for the Travel & Comfort System.

Will aerodynamic add-ons be available for the new BMW X5 and the BMW iX5?

When the new BMW X5 and the first BMW iX5 are launched, specific BMW M Performance Parts will be available for the vehicles, covering aerodynamics and design. These include front trims, front splitters, rear diffusers, roof spoilers, and exterior mirror caps made from carbon fiber or aramid.

Will BMW be offering roof boxes again for the new BMW X5 and BMW iX5? As part of the range of functional BMW accessories, three sizes of new, aerodynamically enhanced BMW roof boxes will be available for the new BMW X5 and the first BMW iX5; they will offer an additional 30 liters of capacity compared with their predecessors.

Will the new BMW X5 also have a performance exhaust system?

For the future BMW M Performance model with V8 engine, a specific M Performance silencer system is planned.

BMW Group in the United States

BMW Group began operations in the U.S. over 50 years ago. In addition to the sales, marketing, and distribution of BMW, MINI, Rolls-Royce, and BMW Motorrad vehicles, BMW Group's business in the U.S. spans 30 locations in 12 states including BMW Group Financial Services, BMW Manufacturing, Designworks, BMW Technology Office USA, and BMW i Ventures. The company's U.S. plant in South Carolina is the largest single BMW production facility in the world and the global center of competence for BMW Sports Activity Vehicles. The BMW Group sales organization is represented by a nationwide network of 355 BMW retailers, 147 BMW motorcycle retailers, 104 MINI passenger car dealers, and 38 Rolls-Royce Motor Car dealers. Taken together, BMW Group's business activities in the U.S. provide and support over 120,000 jobs and contribute more than \$43.3 billion to the U.S. economy annually.
